 Architectural Design is a particularly dynamic field that is developing through the actions of architects software developers
 researchers technologists users and society alike CAAD tools in the architectural office are no longer prominent outsiders but
 have become ubiquitous tools for all professionals in the design disciplines At the same time techniques and tools from other
 fields and uses are entering the field of architectural design This is exemplified by the tendency to speak of Information and
 Communication Technology as a field in which CAAD is embedded Exciting new combinations are possible for those who are
 firmly grounded in an understanding of architectural design and who have a clear vision of the potential use of ICT CAAD
 Futures 2005 called for innovative and original papers in the field of Computer Aided Architectural Design that present
 rigorous high quality research and development work Papers should point towards the future but be based on a thorough
 understanding of the past and present *Design Creativity 2010* Toshiharu Taura,Yukari Nagai,2010-11-04 What is design
 creativity It is impossible to answer this question without considering why human beings can and do design Design creativity
 is instrumental in not only addressing social problems faced across the world but also evoking an innate appreciation for
 beauty and a sense of personal contentment Design Creativity 2010 comprises advanced research findings on design
 creativity and perspectives on future directions of design creativity research The papers included were presented and
 discussed at the first ICDC International Conference on Design Creativity which was held at Kobe Japan in 2010 Design
