It studies how despite recording high levels of corruption persistently some governments in least developed countries (LDCs) like Bangladesh have achieved impressive online transformation level through digital electronic or e-Government implementation. The book investigates the historical and political context and examines the different policies and strategies adopted by successive governments of Bangladesh for facilitating digital service delivery transformation of traditional paper-based circuitous public service delivery processes. It reviews public administration reforms introduced over several decades and other initiatives launched with the specific objective of improving service delivery management. The volume also contextualizes the new e-Government development initiatives in light of the various approaches such as traditional public administration, new public management, digital era governance, new public governance and design thinking. Drawing on a host of published and unpublished materials, interviews with senior public officials, academics, representatives of international donor agencies, think tanks and non-governmental organizations and a survey of more than 400 plus bureaucrats, the book analyzes the progress of digital government in Bangladesh from a soft behavioral perspective. It will be of great interest to scholars and researchers of public policy and public administration, politics, innovation and South Asian studies. It will be an essential reading for bureaucrats and government officials as well as think tanks and NGOs. *The Role of the State and Individual in Sustainable Land Management* Peter C. Reforming the Malawian Public Sector Richard Tambulasi, 2010-06-01 Reforming the Malawian Public Sector argues that the new public management model that Malawi like most African countries adopted under the influence of donor organisations has not led to the intended development The book examines decentralisation performance contracting and publicprivate partnerships as key aspects of the reforms and comes to the conclusion that at best it can be argued that the failures have been due to poor implementation and this could be attributed to the fact that the process was led by donors who lacked the necessary institutional infrastructure The book uses the 2005 6 fertiliser subsidy programme which the government embarked on despite donor resistance that it went against market models but which turned out to be overwhelmingly successful to demonstrate the states developmental ability and potential This volume is essential reading for academics students and practitioners seeking a deeper understanding of public administration management policy development and governance in Africa and the rest of the developing world The book is dedicated to the memory Guy Mhone a Malawian who was among Africa's leading scholars in public administration and governance His works focused mainly on public sector reforms and development **The Politics of Public Sector Performance** Michael Roll, 2014-01-10 It is widely believed that the state in developing countries is weak The public sector in particular is often regarded as corrupt and dysfunctional This book provides an urgently needed corrective to such overgeneralized notions of bad governance in the

developing world It examines the variation in state capacity by looking at a particularly paradoxical and frequently overlooked phenomenon effective public organizations or pockets of effectiveness in developing countries Why do these pockets exist How do they emerge and survive in hostile environments And do they have the potential to trigger more comprehensive reforms and state building This book provides surprising answers to these questions based on detailed case studies of exceptional public organizations and state owned enterprises in Africa Asia the Caribbean Latin America and the Middle East The case studies are guided by a common analytical framework that is process oriented and sensitive to the role of politics The concluding comparative analysis develops a novel explanation for why some public organizations in the developing world beat the odds and turn into pockets of public sector performance and service delivery while most do not This book will be of strong interest to students and scholars of political science sociology development organizations public administration public policy and management

Decentralizing Governance G. Shabbir Cheema, Dennis A. Rondinelli, 2007-08-01 The trend toward greater decentralization of governance activities now accepted as commonplace in the West has become a worldwide movement. This international development largely a product of globalization and democratization is clearly one of the key factors reshaping economic, political and social conditions throughout the world. Rather than the top-down centralized decisionmaking that characterized communist economies and Third World dictatorships in the twentieth century, today's world demands flexibility, adaptability and the autonomy to bring those qualities to bear. In this thought-provoking book, the first in a new series on Innovations in Governance, experts in government and public management trace the evolution and performance of decentralization concepts from the transfer of authority within government to the sharing of power, authority and responsibilities among broader governance institutions. This movement is not limited to national government; it also affects subnational governments, NGOs, private corporations and even civil associations. The contributors assess the emerging concepts of decentralization, e.g., devolution, empowerment, capacity building and democratic governance. They detail the factors driving the movement, including political changes such as the fall of the Iron Curtain and the ascendance of democracy, economic factors such as globalization and outsourcing, and technological advances, e.g., increased information technology and electronic commerce. Their analysis covers many different contexts and regions. For example, William Ascher of Claremont McKenna College chronicles how decentralization concepts are playing out in natural resources policy, while Kadmeil Wekwete of the United Nations outlines the specific challenges to decentralizing governance in sub-Saharan Africa. In each case, contributors explore the objectives of a decentralizing strategy as well as the benefits and difficulties that will likely result.

Policy Making and Implementation Ronald James May, 2009-09-01 There is a vast literature on the principles of public administration and good governance and no shortage of theoreticians, practitioners and donors eager to push for public sector reform, especially in less developed countries. Papua New Guinea has had its share of public sector reforms, frequently under the influence of multinational agencies and aid donors. Yet there seems to be a general consensus both within and outside Papua New Guinea that policy making and implementation have fallen short of expectations; that there has been a failure to achieve good governance. This volume, which brings together a number of Papua New Guinean and Australian-based scholars and practitioners with deep familiarity of policy making in Papua New Guinea, examines the record of policy making and implementation in Papua New Guinea since independence. It reviews the history of public sector reform in Papua New Guinea and provides case studies of policy making and implementation in a number of areas, including the economy, agriculture,

mineral development health education lands environment forestry decentralization law and order defence women and foreign affairs privatization and AIDS Policy is continuously evolving but this study documents the processes of policy making and implementation over a number of years with the hope that a better understanding of past successes and failures will contribute to improved governance in the future

Managing Development in a Globalized World Habib

Zafarullah,Ahmed Shafiqul Huque,2017-09-25 Traditionally development has been rooted in ideologies and assumptions prevalent in the developed world and in practices and strategies adopted by leading industrial nations However historically eclectic ideas and approaches often clash with existing long established notions of progress and modes of realizing social and economic change Managing Development in a Globalized World Concepts Processes Institutions explores this topic by incorporating ideas and interpretations that have previously been neglected or given inadequate attention in the discourse on developing countries It underscores development as a continuous process that must be supported by sound policies and efficient management supplying a wider understanding of the field The authors argue that the application of innovative development techniques and best practices is essential for obtaining optimum results in meeting the needs of society They examine the style of managing development with a new perspective that links the phenomenon with changing demands and the interplay of internal external actors and a host of stakeholders An exploration of key sectors in development provides clear comprehension of problems and solutions A careful synthesis of theoretical conceptual and empirical literature the book assesses real world situations and provides insight into the operational dynamics of development policies programs and institutions It focuses on goals values and dynamics of development management that are undergoing rapid changes and continue to be enhanced to alleviate poverty and improve living standards in an era of globalization and inter regional and inter institutional synergies It highlights best practices essential for the efficient and effective delivery of human development services that are designed and put in place to obtain optimum results in meeting the needs of society

The Changing Role of Government R. Batley,G. Larbi,2004-05-25 Batley and Larbi examine how governments of developing countries are organized to deliver public services The book is based on comparative international studies of four service sectors Health care urban water business promotion and agricultural marketing Governments everywhere are being driven to adopt an indirect approach managing contracting and regulating public agencies or private partners rather than providing services directly It questions how governments are responding and whether this approach is appropriate to the capacities of developing countries

The Conundrum of Corruption Michael Johnston,Scott Fritzen,2020-12-30 This book argues that it is time to step back and reassess the anti corruption movement which despite its many opportunities and great resources has ended up with a track record that is indifferent at best Drawing on many years of experience and research the authors critique many of the major strategies and tactics employed by anti corruption actors arguing that they have made the mistake of holding on to problematical assumptions ideas and strategies rather than addressing the power imbalances that enable

and sustain corruption The book argues that progress against corruption is still possible but requires a focus on justice and fairness considerable tolerance for political contention and a willingness to stick with the reform cause over a very long process of thoroughgoing sometimes discontinuous political change Ultimately the purpose of the book is not to tell people that they are doing things all wrong Instead the authors present new ways of thinking about familiar dilemmas of corruption politics contention and reform These valuable insights from two of the top thinkers in the field will be useful for policymakers reform groups grant awarding bodies academic researchers NGO officers and students
