principles operate in the context of species specific behavioral organizations and developmental histories but detailed consideration of just how these interpretations were accomplished for different animal forms was another enterprise Here the authors limit their task to abstracting from the enormous literature facts and ideas which seemed general enough to be of interest and perhaps utility to investigators in other disciplines at the time Volume 1 presented an overview of the field and introduced the principal theoretical and methodological issues that persistently recurred in the expanded treatments of specific research areas that comprise the later volumes Volume 3 looks at human learning and motivation while the last 3 volumes range over the many active lines of research identified with human cognitive processes at the time *Technology and Innovation in Learning, Teaching and Education* Arsénio Reis, José P.
