The Cumulative Book Index, 1996 A world list of books in the English language Shaping Science Janet
Vertesi, 2020-11-06 Drawing on a decade of immersive ethnography with NASA's robotic spacecraft teams to create a
comparative account of two great space missions of the early 2000s Janet Vertesi uncovers how the social organization of a
scientific team affects their scientific practices and results In Shaping Science Janet Vertesi draws on a decade of immersive
ethnography with NASA's robotic spacecraft teams to create a comparative account of two great space missions of the early
2000s Although these missions featured robotic explorers on the frontiers of the solar system bravely investigating new
worlds their commands were issued from millions of miles away by a very human team By examining the two teams formal
structures decision making techniques and informal work practices in the day to day process of mission planning Vertesi
shows just how deeply entangled a team's local organizational context is with the knowledge they produce about other
worlds Using extensive embedded experiences on two NASA spacecraft teams this is the first book to apply organizational
studies of work to the laboratory environment in order to analyze the production of scientific knowledge itself Engaging and
deeply researched Shaping Science demonstrates the significant influence that the social organization of a scientific team
can have on the practices of that team and the results they yield Saturn Vue, '02-'07 J.J. Haynes, 2009-05-15 Haynes
