The Science of Photobiology Kendric C. Smith, 2013-03-08 The first edition of *The Science of Photobiology* was published in 1977 and was the first textbook to cover all of the major areas of photobiology The science of photobiology is currently divided into 14 subspecialty areas by the American Society for Photobiology In this edition however the topics of phototechnology and spectroscopy have been combined in a new chapter entitled Photophysics The other subspecialty areas remain the same i e Photochemistry Photosensitization UV Radiation Effects Environmental Photobiology Photomedicine Circadian Rhythms Extraretinal Photoreception Vision Photomorphogenesis Photomovement Photosynthesis and Bioluminescence This book has been written as a textbook to introduce the science of photobiology to advanced undergraduate and graduate students The chapters are written to provide a broad overview of each topic They are designed to contain the amount of information that might be presented in a one to two hour general lecture The references are not meant to be exhaustive but key references are included to give students an entry into the literature Frequently a more recent reference that reviews the literature will be cited rather than the first paper by the author making the original discovery The chapters are not meant to be a repository of facts for research workers in the field but rather are concerned with demonstrating the importance of each specialty area of photobiology and documenting its relevance to current and or future problems of man
