**Public Sector Reforms in Developing Countries** Charles Conteh,Ahmed Shafiqul Huque,2014-04-03 The underpinning assumption of public management in the developing world as a process of planned change is increasingly being recognized as unrealistic In reality the practice of development management is characterized by processes of mutual adjustment among individuals agencies and interest groups that can constrain behaviour as well as provide incentives for collaborative action Paradoxes inevitably emerge in policy network practice and design The ability to manage government departments and operations has become less important than the ability to navigate the complex world of interconnected policy implementation processes Public sector reform policies and programmes as a consequence are a study in the complexities of the institutional and environmental context in which these reforms are pursued Building on theory and practice this book argues that advancing the theoretical frontlines of development management research and practice can benefit from developing models based on innovation collaboration and governance The themes addressed in Public Sector Reforms in Developing Countries will enable public managers in developing countries cope in uncertain and turbulent environments as they seek optimal fits between their institutional goals and environmental contingencies

Civil Society in Bangladesh Farhat Tasnim,2021-02-13 This book is the first of its kind to offer an understanding analysis and prediction of the state of civil society in Bangladesh in relation to development and democracy It is a research attempt to reveal the paradox found in developing countries like Bangladesh where there are numerous and active civil society organizations CSOs that have had almost no influence in consolidating democracy This book however also qualifies the normative assumption on the positive relationship between civil society and democracy asserted by the mainstream neo Tocquevillean School that has a profound influence on donor policies Readers are introduced to civil society in Bangladesh from a broad perspective Rather than confining the analysis to NGOs chapters explore the origin nature and function of both modern and conventional CSOs which helps to provide a more

authentic understanding of the genuine state of civil society in relation to other actors in the political system. Combining survey data analyses and empirical observations with carefully chosen case studies, the book reveals that CSOs participate very actively in social services. This research also reveals that these highly active CSOs in the field of social development lack the necessary attributes for ensuring participation, proper interest articulation and monitoring of the state. Through systematic analysis, the book shows that political structures and for Bangladesh particularly political parties along with vertical social relationships such as clientelism, patronage, nepotism and corruption have contributed to a non-vigilant civil society in Bangladesh, although it is often spoken of in different terms. This book is highly recommended for researchers, students and development practitioners interested in South Asia as well as in understanding the potentials and limitations of civil society in relation to development and democracy. Farhat Tasnim's book is a comprehensive treatment of civil society in Bangladesh. It will serve as a useful resource for future researchers in this field for a long time to come. Harry Blair, Yale University, USA. Farhat Tasnim provides in this book a new perspective on one of the essential cases of civil society study, Bangladesh. Her penetrating analysis of the relationship of civil society organizations and democracy in Bangladesh should attract a wide readership. This is an important book not only for students of Bangladesh but for scholars and practitioners interested in the relationship of civil society organizations and democracy. Robert J. Pekkanen, University of Washington, USA.

**Administrative Culture in Developing and Transitional Countries** Ishtiaq Jamil, Steinar Askvik, Farhad Hossain, 2016-03-17. The book explores theoretical, methodological and empirical underpinnings of administrative culture as well as prospects and challenges associated with it in the context of and across developing and transitional countries. Referring to dominant norms and values in public organizations, administrative culture is about the attitudes and perceptions of public officials. In many countries, civil servants are criticised for being corrupt, incompetent, unreliable and self-centred. Their attitudes, norms and values and the way they act are in constant conflict with the rule of law. Recently, the virtues of the Weberian model of bureaucracy have been reclaimed as an alternative to New Public Management (NPM), i.e. as a model which emphasizes impartiality, rule following, expertise and hierarchy rather than manipulation of incentive structures and market competition. In particular, it has been argued that a system of meritocratic recruitment and predictable long-term careers increases the professional competence of the bureaucrats and fosters a culture of professionalism among them. Still, it is unclear how and under what conditions such a model can be adopted. Among main hindrances, it seems to be established power structures and the existing political and societal culture which undermine the effective implementation of the Weberian model. This book was published as a special issue of the International Journal of Public Administration. Public Policy and Governance in Bangladesh Nizam Ahmed, 2016-07-01. Good policies are an important prerequisite of good governance and any effort to change one is likely to affect the other. In emerging democracies such as Bangladesh, a redefinition of roles and responsibilities of different actors in the policy and governing process can be noticed. This book identifies and analyses issues

related to the making and implementation of public policies in Bangladesh over the last four decades 1972-2012. It explores the implications of the change that has taken place in policy and governance environment in Bangladesh. Focusing on several important sectoral and sub sectoral policies, it examines the impact and limitations of the change. Chapters are structured into four parts: Public Policy, Bureaucracy and Parliament, Cases of Public Policy, Women in Governance and Public Administration, Ethics, Innovations and Public Service Delivery, and the book is a valuable resource for researchers in the field of development studies, public policy and South Asian politics.
