PM: Program Manager (Online) January February 2003 Issue , Coaching Roi: Delivering Strategic Value Employing Executive Coaching in Defense Acquisition Alphonzo Moseley, 2011-10-13 Alphonzo Moseley's Doctor of Strategic Leadership final project forms the basis for this relevant book *Coaching ROI Delivering Strategic Value Employing Executive Coaching in Defense Acquisition*. Clearly Moseley has done a very good job of providing a new addition to Defense acquisition studies. Moseley is an executive coach through the Cambridge Group Worldwide Boston MA. His research is one taken at Regent University for the purpose of enhancing leadership development among executive acquisition managers to provide a global learning environment to support a mission ready defense acquisition workforce that develops, delivers and sustains effective and affordable war fighting capabilities. The progress for Moseley and his colleagues as executive coaches at DAU is measured according to how well the defense acquisition workforce does its mission. Since the executive coaching initiative is the first of its kind at the university, a level 5 evaluation, the fifth level of evaluating coaching measured by a return on investment ROI, would provide a deeper understanding of the sources of business value and especially how coaching creates monetary value in Defense acquisition. The results indicated that the executive coaching program delivered strategic value represented by a conservative ROI of 106.6 percent. Similarly, the coachees and their organizations experienced six business results: increased customer satisfaction, increased resources, increased work group productivity, reduced cycle time, increased organizational efficiency, and increased personal productivity. *Air University Library Index to Military Periodicals*, 1999

Net Loss Nathan Newman, 2010-11-01 Newman first tells the story of the US federal government's crucial role in the early development of the internet with the promotion of open computer standards and collaborative business practices that became the driving force of the Silicon Valley model. He then examines the complex dynamic of the process whereby regional economies have been changing as business alliances built around industries like the internet replace the broader public investments that fuelled regional growth in the past. A radical restructuring of once regionally confused industries like banking, electric utilities and telephone companies is under way with changes in federal regulation helping to undermine regional planning and the power of local community actors.

Big-Box Swindle Stacy Mitchell, 2007-10-01 A Book Sense Pick and Annual Highlight With a New Afterword In less than two decades large retail chains have become the most powerful corporations in America In this deft and revealing book Stacy Mitchell illustrates how mega retailers are fueling many of our most pressing problems from the shrinking middle class to rising pollution and diminished civic engagement and she shows how a growing number of communities and independent

businesses are effectively fighting back Mitchell traces the dramatic growth of mega retailers from big boxes like Wal Mart Home Depot Costco and Staples to chains like Starbucks Olive Garden Blockbuster and Old Navy and the precipitous decline of independent businesses Drawing on examples from virtually every state in the country she unearths the extraordinary impact of these companies and the big box mentality on everything from soaring gasoline consumption to rising poverty rates failing family farms and declining voting levels Along the way Mitchell exposes the shocking role government policy has played in the expansion of mega retailers and builds a compelling case that communities composed of many small locally owned businesses are healthier and more prosperous than those dominated by a few large chains More than a critique Big Box Swindle provides an invigorating account of how some communities have successfully countered the spread of big boxes and rebuilt their local economies Since 2000 more than two hundred big box development projects have been halted by groups of ordinary citizens and scores of towns and cities have adopted laws that favor small scale local business development and limit the proliferation of chains From cutting edge land use policies to innovative cooperative small business initiatives Mitchell offers communities concrete strategies that can stave off mega retailers and create a more prosperous and sustainable future
