## Introduction: What is a habitat?

A habitat is the living environment of a plant or animal. A habitat provides food, water, shelter, and place to raise their young. Plants and animals living in an environment are able to adapt and change in their habitat over time. Georgia has five areas where certain plants and animals have adapted to live. These habitat regions are mountains, piedmont, coastal plains, marsh/swamp, and ocean. Many plants and animals can be found in these regions.
