use new technologies to push toward reform From Sit Ins to revolutions promises to shed new light on key questions within activism from campaign organization and leadership to messaging and direct action      Speaking Power to Truth Michael Keren, Richard Hawkins, 2015-11-20 Online discourse has created a new media environment for contributions to public life one that challenges the social significance of the role of public intellectuals intellectuals who whether by choice or by circumstance offer commentary on issues of the day The value of such commentary is rooted in the assumption that by virtue of their training and experience intellectuals possess knowledge that they understand what constitutes knowledge with respect to a particular topic are able to distinguish it from mere opinion and are in a position to define its relevance in different contexts When intellectuals comment on matters of public concern they are accordingly presumed to speak truth whether they are writing books or op ed columns or appearing as guests on radio and television news programs At the same time with increasing frequency discourse on public life is taking place online This new digital environment is characterized by abundance an abundance of speakers discussion and access But has this abundance of discourse this democratization of knowledge as some describe it brought with it a corresponding increase in truth Casting doubt on the assertion that online discourse with its proliferation of voices will somehow yield collective wisdom Speaking Power to Truth raises concerns that this wealth of digitally enabled commentary is in fact too often bereft of the hallmarks of intellectual discourse an epistemological framework and the provision of evidence to substantiate claims Instead the pursuit of truth finds itself in competition with the quest for public reputation access to influence and enhanced visibility But as knowledge is drawn into the orbit of power and as the line between knowledge and opinion is blurred what role will the public intellectual play in the promotion and nurturing of democratic processes and goals In exploring the implications of the digital transition the contributors to Speaking Power to Truth provide both empirical evidence of and philosophical reflection on the current and future role of the public intellectual in a technologically mediated public sphere Contributions by Barry Cooper Jacob Foster Karim Ally Kassam Boaz Miller Liz Pirnie and Eleanor Townsley      **Ethics Under Capital** Jason Hannan, 2019-11-14 We in the West are living in the midst of a deadly culture war Our rival worldviews clash with increasing violence in the public arena culminating in deadly riots and mass shootings A fragmented left now confronts a resurgent and reactionary right which threatens to reverse decades of social progress Commentators have declared that we live in a post truth world one dominated by online trolls and conspiracy theorists How did we arrive at this cultural crisis How do we respond This book speaks to this critical moment through a new reading of the thought of Alasdair MacIntyre Over thirty years ago MacIntyre predicted the coming of a new Dark Ages The premise of this book is that MacIntyre was right all along It presents his diagnosis of our cultural crisis It further presents his answer to the challenge of public reasoning without foundations Pitting him against John Rawls Jürgen Habermas and Chantal Mouffe Ethics Under Capital argues that MacIntyre offers hope for a critical democratic politics in the face of the culture wars      Visual Security Studies Juha Vuori, Rune Saugmann, 2018-08-06

The present volume engages visibility in security from a variety of angles and explores what the subfield of Visual Security Studies might be To structure this experimentation and to encourage a more careful and multifaceted approach to visibility and security the main conceptual move in this volume is to envision three different transversal meeting points between security and visibility visibility as a modality active in representations and signs of security visibility as practice active in enacting security and visibility as a method active in investigating security These three approaches structure the book together with three areas in which we see visibility as especially pertinent in relation to security in security technologies that envision security and are themselves the objects of visions of security in spectacles of security and security spectatorship and in ways of making security visible In this way the volume works to sensitize International Relations research to visual forms of knowledge and practice by examining visual aspects of security At the same time it allows for debate on how this particular modality of the sensible not only affects what is visible and what is not but also how authority and truth claims come about and how they are compared and evaluated Through engagement with security via the language or code of the visual it is possible to interrogate how scholars in the field understand visibility as well as the economy grammar and performativity of visual articulation and the production of knowledge The volume also examines how visibility can be used as a method in doing research and as a way of presenting research results Visual Security Studies is not a new theory of security or its study instead the present volume suggests that visibility should be envisioned as an aspect of security studies that can be incorporated into pre existing approaches The aim is to highlight how much of contemporary practice is visual and to foster an increased attentiveness to visibility in security politics security practice and to the possibilities of employing visual research methods in security scholarship This book will be of much interest to students of critical security media studies surveillance studies visual sociology and IR in general
