Ostroff,1995 This textbook is intended for use in introductory biostatistics courses for health science nursing and biology students It deals with research designs used for collecting data methods for summarizing data and testing hypotheses in health and related fields The emphasis is on illustrating how statistics are generated and used by practitioners in health fields and interpreting crucial aspects of journal articles Concepts are stressed rather than the usual computational methods Every major concept is accompanied by an exercise and correct answers and these form an integral part of the text Resources in education ,1989-04 The professional needs of teachers of English Willis Branson Coale,1928 *Strategies* ,1997 *English for academic purposes : learning english through the web* Barahona Fuentes, Claudia; Arnó Macià, Elisabet;,2001 This is a virtual elective course for university students who need to use English in their academic work This means that this subject is not related to a particular degree course engineering biology law etc but it aims to help students develop their language learning skills and at the same time to foster extensive practice in language use with the Internet as the basic learning tool Therefore this is an instrumental course which is essentially practical and emphasizes communication rather than language study It differs from a traditional language course in that it has been designed basically as a tool to help students learn to learn English That is to say the syllabus is not based on specific language content graded in terms of difficulty but it is composed of a series of practical activities to encourage students to learn English effectively and independently by choosing materials suited to their level of English and to their learning style For this reason this course can be taken by students with different levels of English as long as they are familiar with the basic structures of the language and can more or less communicate in English **Contributions to Education** Columbia University.
