adequate donor tissue and a profound knowledge of the human anatomy and the various harvesting techniques are paramount in ensuring successful reconstruction. Reflecting current surgical approaches, this book presents the most frequently used flaps in head and neck surgery including detailed overviews as well as their respective pearls and pitfalls. Moreover, each section contains a synopsis and pre-operative checklist. The overlay technique merges high quality photographs with drawings and precisely illustrates the step to step descriptions of the different flap harvesting techniques, making this manual in pocket size a unique and accessible reference for both doctors in training and specialists in the field of otolaryngology, head and neck plastic, maxillofacial and skull base surgery.

Manual of Diagnostic Antibodies for Immunohistology Anthony Siew-Yin Leong, Kumarasen Cooper, F. Joel W-M. Leong, 2003. The rapid acceptance of immunohistochemistry as an important and even indispensable adjunct to morphological examination and diagnosis requires the modern anatomical pathology laboratory to be conversant with and proficient in immunostaining procedures as well as methods of tissue processing and antigen retrieval and the underlying characteristics of the increasing number of antibodies and antisera available. This fully revised, expanded and updated edition provides a comprehensive list of antisera and monoclonal antibodies that have useful diagnostic applications in tissue sections and cell preparations. Various clones which are commercially available to detect the same antigen are listed and the sensitivities and specificities of the antibodies are discussed. Importantly, the authors, all pathologists with a wealth of experience in immunostaining procedures, provide fully referenced details and expert advice on each reagent with the reader will find invaluable. Finally, the appendices provide easily accessible and clear summaries of selected antibody panels for specific diagnostic situations, details of heat induced antigen epitope retrieval including the use of microwaves and a useful reference to the websites of the main antibody suppliers.
