14 Days to Sustainable Happiness Loretta Breuning, 2021-05-28. You have power over your emotions, but it's limited, so you need to understand it. Here is a simple explanation of the chemicals that make us feel good: dopamine, serotonin, oxytocin, and endorphin. You'll find out what turns them on in animals and how you manage them with the animal part of your brain. Then you'll learn to rewire your happy chemicals by feeding your brain new inputs in a new way. We'll do the same for the unhappy chemical, cortisol, too. It's a step-by-step method with no jargon, based on the work of the Inner Mammal Institute. A more complete presentation of the science is in the companion book, Habits of a Happy Brain. Retrain your brain to boost your serotonin, dopamine, oxytocin, and endorphin levels. With one lesson a day for fourteen days, you will discover your power over your happy brain chemicals. This is not a checklist of activities; it's a guide to the way your brain got wired long ago and the way to add on new wiring. We humans get wired by early experience, so we all need updates. You can learn to blaze a new trail through your jungle of neurons to reach your happy chemicals in natural, healthy ways. Realistic expectations are the key. Our happy chemicals are not designed to flow all the time for no reason. They evolved to reward you for taking a step that meets your needs. Our brain defines needs in a quirky way, alas. You will learn about these quirks so you can design realistic steps toward your happy chemicals. You cannot rewire your whole brain in 14 days. You can build one new neural pathway at a time. You will learn to target the new pathway you want and the steps that will build it. It will build with repetition, so you will flow there as smoothly.

as you now flow into your old happy chemical pathways You can replace an unsustainable habit with a new habit designed by you You ll be glad you did **Why Me?** Stella V Furlong MA,2025-06-05 Stella Furlong knows what it feels like to be labeled bipolar and sectioned In a chain of events that did not happen overnight she was first sectioned while in her twenties and then several times after As a result she oftentimes quietly wondered Why me In an inspiring informative memoir Stella leads others through her journey from poverty and insanity while growing up in post war Britain to eventually pursuing an education and ripening into a cocky funny and happy woman After describing in harrowing detail how she was sectioned under the Mental Health Act several times she reveals how a lifeline in later life prompted a transformation fresh hope and a new way of viewing life Included are practical tips for those battling mental health challenges a critique of medication and details about the importance of diet exercise a social life education meditation and lifelong learning Throughout her story Stella provides living proof that it is possible to break down stigmas to attain a better quality of life Why Me is the true story of one woman s personal experiences as life led her from a dysfunctional childhood into the challenges of mental illness and ultimately to embracing an incredible transformation **The "More or Less" Definitive Guide to Self-Care** Anna
