Assembly Michael Hardt,Antonio Negri,2017-08-01 In recent years leaderless social movements have proliferated around the globe from North Africa and the Middle East to Europe the Americas and East Asia Some of these movements

have led to impressive gains the toppling of authoritarian leaders the furthering of progressive policy and checks on repressive state forces They have also been at times derided by journalists and political analysts as disorganized and ineffectual or suppressed by disoriented and perplexed police forces and governments who fail to effectively engage them Activists too struggle to harness the potential of these horizontal movements Why have the movements which address the needs and desires of so many not been able to achieve lasting change and create a new more democratic and just society Some people assume that if only social movements could find new leaders they would return to their earlier glory Where they ask are the new Martin Luther Kings Rudi Dutschkes and Stephen Bikos With the rise of right wing political parties in many countries the question of how to organize democratically and effectively has become increasingly urgent Although today s leaderless political organizations are not sufficient a return to traditional centralized forms of political leadership is neither desirable nor possible Instead as Michael Hardt and Antonio Negri argue familiar roles must be reversed leaders should be responsible for short term tactical action but it is the multitude that must drive strategy In other words if these new social movements are to achieve meaningful revolution they must invent effective modes of assembly and decision making structures that rely on the broadest democratic base Drawing on ideas developed through their well known Empire trilogy Hardt and Negri have produced in Assembly a timely proposal for how current large scale horizontal movements can develop the capacities for political strategy and decision making to effect lasting and democratic change We have not yet seen what is possible when the multitude assembles

Software, Infrastructure, Labor Ned Rossiter, 2016-06-23 Infrastructure makes worlds Software coordinates labor Logistics governs movement These pillars of contemporary capitalism correspond with the materiality of digital communication systems on a planetary scale Ned Rossiter theorizes the force of logistical media to discern how subjectivity and labor economy and society are tied to the logistical imaginary of seamless interoperability Contingency haunts logistical power Technologies of capture are prone to infrastructural breakdown sabotage and failure Strategies of evasion anonymity and disruption unsettle regimes of calculation and containment We live in a computational age where media again disappear into the background as infrastructure Software Infrastructure Labor intercuts transdisciplinary theoretical reflection with empirical encounters ranging from the Cold War legacy of cybernetics shipping ports in China and Greece the territoriality of data centers video game design and scrap metal economies in the e waste industry Rossiter argues that infrastructural ruins serve as resources for the collective design of blueprints and prototypes demanded of radical politics today

Handbook of Digital Public History Serge Noiret, Mark Tebeau, Gerben Zaagsma, 2022-04-04 This handbook provides a systematic overview of the present state of international research in digital public history Individual studies by internationally renowned public historians digital humanists and digital historians elucidate central issues in the field and present a critical account of the major public history accomplishments research activities and practices with the public and of their digital context The handbook applies an international and comparative

approach looks at the historical development of the field focuses on technical background and the use of specific digital media and tools Furthermore the handbook analyzes connections with local communities and different publics worldwide when engaging in digital activities with the past indicating directions for future research and teaching activities **Look Who's Watching, Revised Edition** Fen Osler Hampson, Eric Jardine, 2017-11-08 The Internet ecosystem is held together by a surprisingly intangible glue trust To meet its full potential users need to trust that the Internet works reliably and efficiently when providing them with the information they are seeking while also being secure private and safe When trust in the Internet wanes the network's stock of digital social capital falls and users begin to alter their online behaviour These often subtle changes in behaviour tend to be collectively highly maladaptive hindering the economic developmental and innovative potential of the globe spanning network of networks Look Who's Watching Surveillance Treachery and Trust Online confirms in vivid detail that the trust placed by users in the Internet is increasingly misplaced Edward Snowden's revelations that the United States National Security Agency and other government agencies are spying on Internet users the proliferation of cybercrime and the growing commodification of user data and regulatory changes which threaten to fragment the system are all rapidly eroding the confidence users have in the Internet ecosystem Based on a combination of illustrative anecdotal evidence and analysis of new survey data Look Who's Watching clearly demonstrates why trust matters how it is being eroded and how with care and deliberate policy action the essential glue of the Internet can be restored Selfie Democracy Elizabeth Losh, 2022-09-06 How politicians' digital strategies appeal to the same fantasies of digital connection access and participation peddled by Silicon Valley Smartphones and other digital devices seem to give us a direct line to politicians But is interacting with presidential tweets really a manifestation of digital democracy In Selfie Democracy Elizabeth Losh examines the unintended consequences of politicians' digital strategies from the Obama campaign's pioneering construction of an online community to Trump's Twitter dominance She finds that politicians who use digital media appeal to the same fantasies of digital connection access and participation peddled by Silicon Valley Meanwhile smartphones and social media don't enable participatory democracy so much as they incentivize citizens to perform attention getting acts of political expression Losh explores presidential rhetoric casting digital media as tools of democracy describes the conflation of gender and technology that contributed to Hillary Clinton's defeat in 2016 chronicles the Biden campaign's early digital stumbles in 2020 and recounts the TikTok campaign that may have spoiled a Trump rally She shows that although Obama and Trump may seem diametrically opposed in both style and substance they both used mobile digital media in ways that reshaped the presidency and promised a new kind of digital democracy Obama used data and digital media to connect to citizens without intermediaries Trump followed this strategy to its most extreme conclusion What were the January 6 insurrectionists doing as they livestreamed themselves and their cohorts attacking the Capitol but practicing their own brand of selfie democracy **A Century of Repression** Ralph Engelman, Carey Shenkman, 2022-10-04 A Century of

Repression offers an unprecedented and panoramic history of the use of the Espionage Act of 1917 as the most important yet least understood law threatening freedom of the press in modern American history. It details government use of the Act to control information about U.S. military and foreign policy during the two World Wars, the Cold War, and the War on Terror. The Act has provided cover for the settling of political scores, illegal break-ins, and prosecutorial misconduct. *Digital Culture & Society (DCS)* Annika Richterich, Karin Wenz, Pablo Abend, Mathias Fuchs, Ramón Reichert, 2017-06-15. Digital Culture Society is a refereed international journal fostering discussion about the ways in which digital technologies, platforms, and applications reconfigure daily lives and practices. It offers a forum for inquiries into digital media theory, methodologies, and socio-technological developments. The fourth issue, *Making and Hacking*, sheds light on the communities and spaces of hackers, makers, DIY enthusiasts, and fabbers. Academics, artists, and hackerspace members examine the meanings and entanglements of maker and hacker cultures from conceptual, methodological, as well as empirical perspectives. With contributions by Sabine Hielscher, Jeremy Hunsinger, Kat Braybrooke, Tim Jordan, among others, and an interview with Sebastian Kubitschko. Asian Video Cultures Joshua Neves, Bhaskar Sarkar, 2017-11-16. The contributors to this volume theorize Asian video cultures in the context of social movements, market economies, and local popular cultures to complicate notions of the Asian experience of global media. Whether discussing video platforms in Japan and Indonesia, K-pop reception, videos, amateur music videos, circulated via microSD cards in India, or the censorship of Bollywood films in Nigeria, the essays trace the myriad ways Asian video reshapes media politics and aesthetic practices. While many influential commentators overlook, denounce, and trivialize Asian video, the contributors here show how it belongs to the shifting core of contemporary global media, thereby moving conversations about Asian media beyond static East-West imaginaries, residual Cold War mentalities, triumphalist declarations about resurgent Asia, and budding jingoisms. In so doing, they write Asia's vibrant media practices into the mainstream of global media and cultural theories while challenging and complicating hegemonic ideas about the global, as well as digital media. Contributors: Conerly Casey, Jenny Chio, Michelle Cho, Kay Dickinson, Bishnupriya Ghosh, Feng Mei, Heberer Tzu-hui, Celina Hung, Rahul Mukherjee, Joshua Neves, Bhaskar Sarkar, Nishant Shah, Abhigyan Singh, SV Srinivas, Marc Steinberg, Chia-chi Wu, Patricia Zimmerman. **Copyrighting God** Andrew Ventimiglia, 2019. By using copyright in sacred texts, American religious organizations help to create, manage, and control emerging spiritual communities. Deconstructing Digital Capitalism and the Smart Society Mel van Elteren, 2025-01-01. Today's critics of big online platforms tend to consider privacy breaches, monopolistic practices, and the deployment of surveillance technologies as the main problems. Internet reformers suggest the answers to these issues reside in more and better regulations. While the questions of privacy, data, and size are indeed important, they are secondary, however, to a deeper set of concerns about platform ownership and control, and who benefits from the current status quo. This book examines these issues and offers an historical overview and in-depth analysis of digital capitalism and its prevailing practices, as it has

become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future

Weaving the Dark Web Robert W. Gehl, 2018-08-14 An exploration of the Dark Web websites accessible only with special routing software that examines the history of three anonymizing networks Freenet Tor and I2P The term Dark Web conjures up drug markets unregulated gun sales stolen credit cards But as Robert Gehl points out in Weaving the Dark Web for each of these illegitimate uses there are other legitimate ones the New York Times s anonymous whistleblowing system for example and the use of encryption by political dissidents Defining the Dark Web straightforwardly as websites that can be accessed only with special routing software and noting the frequent use of legitimate and its variations by users journalists and law enforcement to describe Dark Web practices judging them legit or sh t Gehl uses the concept of legitimacy as a window into the Dark Web He does so by examining the history of three Dark Web systems Freenet Tor and I2P Gehl presents three distinct meanings of legitimate legitimate force or the state s claim to a monopoly on violence organizational propriety and authenticity He explores how Freenet Tor and I2P grappled with these different meanings and then discusses each form of legitimacy in detail by examining Dark Web markets search engines and social networking sites Finally taking a broader view of the Dark Web Gehl argues for the value of anonymous political speech in a time of ubiquitous surveillance If we shut down the Dark Web he argues we lose a valuable channel for dissent
