

H00500 SERIES HEIGHT CONTROL VALVE INSTRUCTIONS

HCV INSTALLATION NOTES:

1. At full up or down suspension travel:
OPTIMAL LEVER ANGLE IS 45°
MINIMUM LEVER ANGLE IS 30°
2. Mount HCV parallel to frame rail
3. If **NOT** using the integral dump option, vent dump port with a 3 inch (minimum) length of hose.
4. If using integral dump option, remove dump pilot port vent and connect directly to 3-way selector valve. Ensure that selector system is vented to atmosphere at all times (even when not being activated).

Note: Dump pilot port/system must not be plugged at any time as this may affect valve centering.

HCV INSTALLATION INSTRUCTIONS

Caution: Air lines are pressurized and may blow debris, **USE EYE PROTECTION.**

1. Disconnect and remove old valve.
2. Attach the Hadley H00500 HCV to the same mounting bracket. Or use the enclosed brackets as needed to mount the valve.
3. **Attach the proper length lever** to achieve 30° minimum fill and exhaust angle (see above notes). Check for any interference or straight lining of the valve lever and linkage through the entire suspension travel.
4. Reconnect the air lines to the H00500 HCV per the picture above. Connect the dump pilot port to a normally closed control valve.
5. Adjust the ride height of the suspension utilizing the H00500 HCV lever and the vehicle manufacturer's ride height recommendations. Install centering dowel to insure the valve dead band is at ride height.
6. Tighten all nuts 60 to 80 in-lbs.
7. Remove centering dowel.
