Emphasizing the nurse's role, clear guidelines cover safe drug handling, types of drugs used for disorders or to affect body systems, injection and enteral administration, and patient education. From a respected PharmD Nursing author team, this full color text also provides an excellent review for the pharmacology questions on the NCLEX examination. Current accurate content ensures that the most current drugs and treatment protocols are presented. Application of the nursing process includes general principles of nursing care for each disorder along with nursing considerations for drug treatment plans. An emphasis on safe drug handling and administration includes High Alert and Do Not Confuse icons as well as Medication Safety Alert boxes. A focus on patient education and health promotion equips you for health teaching related to medications. NCLEX preparation sections at the end of each chapter help you get ready for pharmacology related questions on the NCLEX examination. A study guide corresponds to the textbook and offers review questions and clinical scenarios to reinforce your understanding of nursing pharmacology. Available separately, UPDATED drug coverage includes the most recent FDA approvals, withdrawals, and therapeutic uses. UPDATED guidelines cover injection and enteral medication administration with an emphasis on safe medication practice. UPDATED treatment protocols include specific conditions such as asthma, hyperlipidemia, heart failure, COPD, and cancer. NEW Objectives and key terms are listed at the beginning of each chapter, making it easy to see chapter content at a glance.

[Nursing Pharmacology \(Speedy Study Guides\)](#) Speedy Publishing, 2014-05-04. Nursing pharmacology is a class that nurses are required to take before they receive their licenses. The course teaches nurses how various drugs interact in a patient's body and allows these professionals to administer drugs and educate patients on their medications. Nurses can gain an understanding of the medications that they must use on their patients as they are healing. They can use their knowledge to discuss side effects that certain drugs have and make suggestions on how patients can

minimize them Nurses also learn about the toxicity of drugs and may suggest adjustments when drugs are causing a negative reaction in patients
