Creative Context Nissim Otmazgin, Eyal Ben-Ari, 2020-04-23 The purpose of this volume is to broaden scholars analytical perspective by placing the creative industries in frameworks that compare and contrast them with other kinds of entities organizations and social forms that mix creativity and production In other words this volume aims to set out an emerging agenda for the study of creativity in the cultural and media industries Although this work focuses on the media and cultural industries they are investigated in the context of other groups and organizations connecting forms of creativity with an explicit emphasis on turning ideas into concrete practices and products The originality of this book lies in 1 presenting a comparative and interdisciplinary perspective that develops a new framework and analytical concepts to understand the notion of creativity in the media and cultural industries and 2 providing a series of fresh empirically based studies of the process of creativity in fields such as advertising fashion animation and pop culture This comparative move is taken in order to generate new insights about the particular features of the creative industries and new questions for future analysis
