Theory as Ideology in International Relations Benjamin Martill, Sebastian Schindler, 2020-03-13 Are theoretical tools nothing but political weapons How can the two be distinguished from each other What is the ideological role of theories like liberalism neoliberalism or democratic theory And how can we study the theories of actors from outside the academic world This book examines these and related questions at the nexus of theory and ideology in International Relations The current crisis of politics made it abundantly clear that theory is not merely an impartial and neutral academic tool but instead is implicated in political struggles However it is also clear that it is insufficient to view theory merely as a political weapon This book brings together contributions from a number of different scholarly perspectives to engage with these problems The contributors drawn from various fields of International Relations and Political Science cast new light on the ever problematic relationship between theory and ideology They analyse the ideological underpinnings of existing academic theories and examine the theories of non academic actors such as staff members of international organisations Ecovillagers and liberal politicians This edited volume is a must read for all those interested in the contemporary political crisis and its relation to theories of International Relations

The Politics of Orientation Hannah Richter, 2023-10-01 The Politics of Orientation provides the first substantial exploration of a surprising theoretical kinship and its rich political implications between Gilles Deleuze's philosophy and the sociological systems theory of Niklas Luhmann Through their shared theories of sense Hannah Richter draws out how the works of Luhmann and Deleuze complement each other in creating worlds where chaos is the norm and order the unlikely and yet remarkably stable exception From the encounter between Deleuze and Luhmann Richter develops a novel take on postfoundational ontology where subjects and societies unfold in self-productive relations of sense against a background of complexity The Politics of Orientation breaks and rebuilds theoretical alliances by reading core concepts and thinkers of Continental Philosophy from Leibniz to Whitehead and Marx through this encounter Most importantly the book puts Luhmann and Deleuze to work to offer urgently needed insight into the rise of post truth populism In our complex democratic societies Richter argues orientation against complexity has become the ground of political power privileging the simplistic narratives of the populist right

Spatial Justice Andreas Philippopoulos-Mihalopoulos, 2014-10-30 There can be no justice that is not spatial Against a recent tendency to despatialise law matter bodies and even space itself this book insists on spatialising them arguing that there can be neither law nor justice that are not articulated through and in space Spatial Justice presents a new theory and a

radical application of the material connection between space in the geographical as well as sociological and philosophical sense and the law in the broadest sense that includes written and oral law but also embodied social and political norms More specifically it argues that spatial justice is the struggle of various bodies human natural non organic technological to occupy a certain space at a certain time Seen in this way spatial justice is the most radical offspring of the spatial turn since as this book demonstrates spatial justice can be found in the core of most contemporary legal and political issues issues such as geopolitical conflicts environmental issues animality colonisation droning the cyberspace and so on In order to agree this the book employs the lawscape as the tautology between law and space and the concept of atmosphere in its geological political aesthetic legal and biological dimension Written by a leading theorist in the area Spatial Justice Body Lawscape Atmosphere forges a new interdisciplinary understanding of space and law while offering a fresh approach to current geopolitical spatiolegal and ecological issues

Historical Traces and Future Pathways of Poststructuralism Gavin Rae, Emma Ingala, 2020-11-11 This volume brings together an international array of scholars to reconsider the meaning and place of poststructuralism historically and demonstrate some of the ways in which it continues to be relevant especially for debates in aesthetics ethics and politics The book's chapters focus on the works of Butler Deleuze Derrida Foucault Irigaray Kristeva Lacan and Lyotard in combination with those of Agamben Luhman Nancy and Nietzsche and examine issues including biopolitics culture embodiment epistemology history music temporality political resistance psychoanalysis revolt and the visual arts The contributors use poststructuralism as a hermeneutical strategy that rejects the traditional affirmation of unity totality transparency and representation to instead focus on the foundational importance of open ended becoming difference the unknowable and expression This approach allows for a more expansive definition of poststructuralism and helps demonstrate how it has contributed to debates across philosophy and other disciplines Historical Traces and Future Pathways of Poststructuralism will be of particular interest to researchers in philosophy politics political theory critical theory aesthetics feminist theory cultural studies intellectual history psychoanalysis and sociology

students of nursing medicine counselling and occupational health and therapy The Habermas-Luhmann Debate Gorm Harste, 2021-10-29 Fifty years ago the two leading German philosophers and sociologists since the Second World War Jürgen Habermas and Niklas Luhmann embarked on a sweeping and contentious debate that would continue for decades Their coauthored 1971 book *Theory of Society or Social Technology* laid out their opposing positions on meaning communication consensus and dissent and ultimately the foundations of modern social thought Habermas and Luhmann would elaborate their disagreement in the years to come in a controversy whose aftershocks divided social theorists by presenting what appeared to be two fundamentally divergent views of the nature of society and what systems theory was capable of explaining This is the first book in English about one of the most important conflicts in social theory today Gorm Harste analyzes the Habermas Luhmann debate from its inception through Habermas's most recent works exploring issues such as methodology ideology truth history and politics He contextualizes their positions in terms of how each grappled with the legacy of Nazism and sought to provide grounding for an antitotalitarian politics Harste follows the evolution of the debate as the fundamental dispute over the normative and practical desirability of agreement and disagreement came to touch upon political questions including the rule of law the separation of powers human rights individualization and secularization Ultimately Harste emphasizes the convergence between Habermas and Luhmann and the pressing need for social theorists to further unite these two formative accounts of contemporary society **Words in Time** Francesco Benigno, 2017-04-21 Examines the origins and development of the words we use critiquing the ways in which they have traditionally been employed in historical thinking and examining their potential usefulness today Provided by the publisher The Bloomsbury Handbook of World Theory Jeffrey R. Di Leo, Christian Moraru, 2021-11-18 Disciplines from literary studies to environmentalism have recently undergone a spectacular reorientation that has refocused entire fields methodologies and vocabularies on the world and its sister terms such as globe planet and earth The Bloomsbury Handbook of World Theory examines what world means and what it accomplishes in different zones of academic study The contributors raise questions such as What happens when world is appended to a particular form of humanistic or scientific inquiry How exactly does worlding bear on the theoretical operating system and the history of that field What is the theory or theoretical model that allows world to function in a meaningful way in coordination with that knowledge domain With contributions from 38 leading theorists from a vast range of fields including queer studies religion and pop culture this is the first large reference work to consider the profound effect both within and outside the academy of the worlding of discourse in the 21st century *Border Security* Peter Chambers, 2017-09-27 What kind of a world is one in which border security is understood as necessary How is this transforming the shores of politics And why does this seem to preclude a horizon of political justice for those affected Border Security responds to these questions through an interdisciplinary exploration of border security politics and justice Drawing empirically on the now notorious case of Australia the book pursues a range of theoretical perspectives including

Foucault's work on power, the systems theory of Niklas Luhmann and the cybernetic ethics of Heinz Von Foerster in order to formulate an account of the thoroughly constructed and political nature of border security. Through this detailed and critical engagement, the book's analysis elicits a political alternative to border security from within its own logic, thus signaling at least the beginnings of a way out of the cost, cruelty, and devaluation of life that characterises the enforced reality of the world of border security.

Cybernetic Capitalism Jan Overwijk, 2025-01-07 This book offers a conceptual interrogation of how capital navigates its cybernetic environment. Taking an immanent perspective, the book develops a unique synthesis between Niklas Luhmann's systems theory and the critical theory tradition. Overwijk shows how neoliberal capitalism's version of rationalization depends on the organization and management of society on the basis of cybernetic principles. Overwijk seeks to update earlier critiques of cybernetic capitalism that stressed the system's colonization of its environment, its making the entirety of social life communicable. Under today's cybernetic rationalization, things are radically different. Neoliberal political economy aims to incite the incalculability of the market platform capitalists' venture to capitalize on the unpredictable efforts of their users, and post-Fordist management seeks to encourage the creativity of service workers. As this book uniquely shows, capital no longer aims at total communicability but instead seeks to provoke and exploit the incommunicability of its environment. In this sense, it offers an ecological theory of capitalism, laying conceptual groundwork for understanding the extractivist logic of the Anthropocene. Cybernetic Capitalism shows how the cultural obsession with incommunicability that animates cybernetic rationalization has taken an irrationalist turn, resurfacing in the mysticism of conspiracy theory and radical right politics. The book offers a novel and compelling materialist interpretation of today's paradoxical connections between neoliberal rationalism and radical right irrationalism.

Common Immunity Roberto Esposito, 2023-06-08 After two years of global pandemic, it is no surprise that immunization is now at the center of our experience. From the medicalization of politics to the disciplining of individuals, from lockdowns to mass vaccination programs, contemporary societies seem to be firmly embedded in a syndrome of immunity. To understand the ambivalent effects of this development, it is necessary to go back to its modern genesis: when the languages of law, politics, and medicine began to merge into the biopolitical regime we have been living under for some time. This regime places a high priority on immunization and security; no security is more important than health security. The Covid-19 pandemic has taken the dynamic of immunization to a new level: for the first time in history, we see societies seeking to achieve generalized immunity in their entire populations through vaccination. This allows us to glimpse the possibility of a common immunity that strengthens the relation between community and immunity. The dramatic tensions we have experienced in recent years between security and freedom, norm and exception, power and existence all refer to the complex relationship between community and immunity, the decisive features of which are reconstructed in this book. Building on the prescient argument originally developed two decades ago in *Immunitas*, Roberto Esposito demonstrates in this new book how the pandemic and our responses to it have

brought into sharp relief the fundamental biopolitical conditions of our contemporary societies **The Cambridge Handbook of Social Problems**: A. Javier Treviño, 2018-03-22 The introduction of the Affordable Care Act in the United States the increasing use of prescription drugs and the alleged abuse of racial profiling by police are just some of the factors contributing to twenty first century social problems The Cambridge Handbook of Social Problems offers a wide ranging roster of the social problems currently pressing for attention and amelioration Unlike other works in this area it also gives great consideration to theoretical and methodological discussions This Handbook will benefit both undergraduate and graduate students eager to understand the sociology of social problems It is suitable for classes in social problems current events and social theory Featuring the most current research the Handbook provides an especially useful resource for sociologists and graduate students conducting research

Systems Theory and the Sociology of Health and Illness Morten Knudsen, Werner Vogd, 2014-10-30 Modern societies and organizations are characterized by multiple kinds of observations systems or rationalities rather than singular identities and clear hierarchies This holds true for healthcare where we find a range of different perspectives from medicine to education from science to law from religion to politics brought together in different types of arrangements This innovative volume explores how this polycontextuality plays out in the healthcare arena Drawing on systems theory and Luhmann's theory of social systems as communicative systems in particular the contributors investigate how things drugs for example and bodies are observed and constructed in different ways under polycontextual conditions They explore how the different types of communication and observation are brought into workable arrangements without becoming identical or reconciled and discuss how health care organizations observe their own polycontextuality Providing an analysis of healthcare structures that is up to speed with the complexity of healthcare today this book shows how society and its organizations simultaneously manage contexts that do not fit together It is an important work for those with an interest in health and illness social theory Niklas Luhmann organizations and systems theory from a range of backgrounds including sociology health studies political science and management

Corruption and Justice in Colonial Mexico, 1650-1755 Christoph Rosenmüller, 2019-05-02 Provides the first detailed analysis of the evolution of the concept of corruption in colonial Mexico **Handbook of Ecocriticism and Cultural**

Ecology Hubert Zapf, 2016-05-10 Ecocriticism has emerged as one of the most fascinating and rapidly growing fields of recent literary and cultural studies. From its regional origins in late twentieth century Anglo American academia it has become a worldwide phenomenon which involves a decidedly transdisciplinary and transnational paradigm that promises to return a new sense of relevance to research and teaching in the humanities. A distinctive feature of the present handbook in comparison with other survey volumes is the combination of ecocriticism with cultural ecology reflecting an emphasis on the cultural transformation of ecological processes and on the crucial role of literature, art and other forms of cultural creativity for the evolution of societies towards sustainable futures. In state of the art contributions by leading international scholars in the field, this handbook maps some of the most important developments in contemporary ecocritical thought. It introduces key theoretical concepts, issues and directions of ecocriticism and cultural ecology and demonstrates their relevance for the analysis of texts and other cultural phenomena.

Objects in Air Margareta Ingrid Christian, 2021-06-07 Margareta Ingrid Christian unpacks the ways in which around 1900 art scholars, critics and choreographers wrote about the artwork as an actual object in real time and space, surrounded and fluently connected to the viewer through the very air we breathe. Theorists such as Aby Warburg, Alois Riegl, Rainer Maria Rilke and the choreographer Rudolf Laban drew on the science of their time to examine air as the material space surrounding an artwork, establishing its milieu, atmosphere or environment. Christian explores how the artwork's external space was seen to work as an aesthetic category in its own right, beginning with Rainer Maria Rilke's observation that Rodin's sculpture exhales an atmosphere and that Cézanne's colors create a calm, silken air that pervades the empty rooms where the paintings are exhibited. Writers created an early theory of unbounded form that described what Christian calls an artwork's ecstasis or its ability to stray outside its limits and engender its own space. Objects viewed in this perspective complicate the now fashionable discourse of empathy aesthetics, the attention to self-projecting subjects and the idea of the modernist self-contained artwork. For example, Christian invites us to historicize the immersive spatial installations and environments that have arisen since the 1960s and to consider their origins in turn of the twentieth century aesthetics. Throughout this beautifully written work, Christian offers ways for us to rethink entrenched narratives of aesthetics and modernism and to revisit alternatives.

Deleuze and the Humanities Rosi Braidotti, Kin Yuen Wong, Amy K. S. Chan, 2018-03-14 The volume is inspired by Gilles Deleuze's philosophical project which builds on the critique of European Humanism and opens up inspiring new perspectives for the renewal of the field. The book gathers leading scholars in the field of Deleuze while also bringing together scholars from Europe and North America, the West as well as from Asia, the East, in order to create a lively academic debate and contribute to the growth and expansion of the field. It provides both critical and creative insights into some key issues in contemporary social and political thought. More specifically, the volume hopes to start a critical evaluation of the reception and creative adaptation of Deleuze and of other Continental philosophers in the Austral Asian region with special focus on China.
