

GENERAL INFORMATION

ENGINE IDENTIFICATION

Tecumseh has used two different methods of identifying 2 cycle engines. The first method was used until the mid 1980's using the base model number with a type number. The type number was used to identify variations for the OEM's specific needs (Fig. 1)

The second method was put in place to standardize 2 cycle and 4 cycle engine identification. The type number has now become the specification number, which is preceded by the engine model as illustrated in Figure 2 and 3.

INTERPRETATION OF MODEL NUMBER

The letter designations in a model number indicates the basic type of engine.

- AH - Aluminum Horizontal
- AV - Aluminum Vertical
- BV - Outboard Vertical
- HSK - Horizontal Snow King
- TVS - Tecumseh Vertical Styling

The numbers that follow the letter designations indicate the horsepower or cubic inch displacement.

Following the engine size are the engine specification numbers which are used for identification when ordering parts.

The final set of numbers are the date of manufacture (D.O.M.).

Example: HSK600 1688S

- HSK - Horizontal Snow King
- 600 - 6 Cubic Inch displacement
- 1688S - Specification number
- 8023B - Serial number D.O.M. (date of manufacturing previously serial number)
- 8 - First digit is the year of manufacturing (1998)
- 023 - Indicates the calendar day of the year (23th day or Jan. 23, 1998)
- B - Represents the line and shift on which the engine was built at the factory

Tecumseh engine model, specification, and D.O.M. number are now located on a decal adhered to the blower housing.
