M103 Heavy Tank 1950-74 New Vanguard:

M103 Heavy Tank 1950-74 Kenneth W Estes, 2013-03-20 The T43 design represented the pinnacle of U S Army tank engineering of the late 1940s The heavy tank proved fairly popular with its crews who above all respected the powerful armament it carried The outbreak of war in Korea brought a rush order in December 1950 which led to a complete production run of 300 vehicles After 1951 the Marine Corps alone retained confidence in the heavy tank program investing its scarce funds in the improvements necessary to bring about its fielding after a hurried production run in midst of the tank crisis of the year 1950-51 The eventual retirement of the M103 in 1972 over 20 years after manufacture and after 14 years of operational service demonstrated the soundness of its engineering It may have been the unwanted ugly duckling of the Army which refrained from naming the M103 alone of all its postwar tanks For the Marine Corps it served the purpose defined for it in 1949 until the automotive and weapons technology of the United States could produce viable alternatives

Super-heavy Tanks of World War II Kenneth W Estes, 2014-11-20 The super heavy tanks of World War II are heirs to the siege machine tradition a means of breaking the deadlock of ground combat As a class of fighting vehicle they began with the World War I concept of the search for a breakthrough tank designed to cross enemy lines It is not surprising that the breakthrough tank projects of the period prior to World War II took place in the armies that suffered the most casualties of the Great War Russia France Germany All of the principal Axis and Allied nations eventually initiated super heavy development projects with increasingly heavy armor and armament Much as the casualties of World War I prompted the original breakthrough tank developments as Germany found itself on the defensive with diminishing operational prospects and an increasingly desperate leadership so too did its focus turn to the super heavy tanks that could turn the tide back in their favor

M50 Ontos and M56 Scorpion 1956-70 Kenneth W Estes, 2016-11-17 Designed in the 1950s the US Marines M50 Ontos and the US Army's M56 Scorpion were both intended to be fast light air droppable tank killers for the Cold War battlefield an answer to the cumbersome and ineffective World War II vintage tanks that had taken to the battlefield during the Korean War Although they shared the aim of bringing light mobile and lethal antitank firepower to the infantry the two vehicles varied wildly in design to cater for their unique mission demands They first saw service in the Lebanon intervention of 1958 but it was in the Vietnam War that they made their name with the M50 Ontos seeing intense combat action in the Battle of Hue in 1968 Detailed illustrations and expert analysis provide the reader with a comprehensive history of these deadly antitank vehicles from early development through to their combat history and the eventual disbandment of the Marine Corps last antitank battalion with M50A1s in 1971

M48 Patton vs Centurion David R. Higgins, 2016-01-20 The Indo Pakistani War of 1965 witnessed some of the largest tank battles since World War II notably between India's British made Centurion Mk 7s and the American made M48 Pattons fielded by Pakistan The two countries tank regiments many of which shared a proud legacy in the British Indian Army fought one another in the difficult terrain of

Jammu and Kashmir the focus of a long running dispute between India and Pakistan The armoured clashes at Asal Uttar Chawinda and Phillora would demonstrate that the Centurion with its powerful gun and lower profile generally proved superior to the faster lighter but overly complex Patton Featuring full colour artwork expert analysis and archive photographs this is the full story of the clash between two leading tanks of the Cold War era that were never designed to fight each other but rather to line up on battlefields as allies US Battle Tanks 1946-2025 Steven J. Zaloga, 2024-11-07 A comprehensive and detailed illustrated examination of the development and combat performance of US battle tanks from the end of World War II through to the present day In this the second of two highly illustrated volumes telling the full history of the design development and operational use of US Army and US Marine Corps battle tanks Steven J Zaloga takes the story from the end of World War II through the US Soviet rivalry of the Cold War period right up to the latest developments in American armored technology US Battle Tanks 1946 2025 draws and expands on material published in Osprey's New Vanguard and Duel series to explain how the US Army attempted to come to grips with the challenges of the nuclear battlefield and examines the introduction of new tank designs such as the famous Patton tank series as well as short lived attempts to develop more radical tanks such as the T95 It covers the overly ambitious and failed MBT 70 tank program and the more austere M1 Abrams that followed a tank that proved to be the best US tank design of the post World War II period and one that is still in service today Published in association with the AUSA Book Program offering quality books about US Army heritage military theory and policy and security in the modern world **TANKER TECHNIQUES MAGAZINE 01** , We now introduce to you our latest publication TANKER and we are sure that it will herald a new global benchmark for scale modelling magazines This new approach and concept for our new quarterly magazine focuses on amazingly realistic paint schemes and finishes showing you how to accomplish them We have the very best of modellers from around the world showing you how to master not only the very latest techniques but also the old standards too All this is brought to you in a thoroughly modern publication and with our own inimitable character Each issue will be available in 8 languages with around 100 pages TANKER is available in English French German Russian Spanish Czech Chinese and Hungarian *M One Hundred and Three Heavy Tank 1950-74* Kenneth W. Estes, 2013 **M103 Heavy Tank** David Doyle, 2015-01

Super-heavy Tanks of World War II Kenneth W Estes, 2014-11-18 This title explores the conception and design of a range of enormous and powerful tanks that came to be designated as super heavy The fascinating super heavy tanks of World War II were heirs to the siege machine tradition a means of breaking the deadlock of ground combat As a class of fighting vehicle they began with the World War I concept of the search for a breakthrough tank designed to cross enemy lines It is not surprising that the breakthrough tank projects of the period prior to World War II took place in the armies that suffered the most casualties of the Great War Russia France Germany All of the principal Axis and Allied nations eventually initiated super heavy development projects with increasingly heavy armor and armament Much as the casualties of World War I prompted

the original breakthrough tank developments as Germany found itself on the defensive with diminishing operational prospects and an increasingly desperate leadership so too did its focus turn to the super heavy tanks that could turn the tide back in their favor Although only a small number of super heavy tanks were built much less saw active service their impressive appearance and specifications not to mention the possibilities of what might have been have captured the interest of AFV enthusiasts historians and military personnel This illustrated and detailed study explores and compares these designs in unprecedented depth Sherman Medium Tank 1942-45 Steven J. Zaloga,2022-09-15 The M4 Sherman tank was the mainstay of the Western allies between 1942 and 1945 Fast and modern it was better than most of the tanks Britain had to offer The American Chief of Staff claimed in November 1943 that it had been hailed widely as the best tank on the battlefield today However by the time of the Normandy invasion of June 1944 this was not the case The new heavy tanks being produced by the Germans were able to outclass the Sherman in both armour and armament This title describes the development and operational use of the Sherman medium tank throughout World War II and beyond *M41 Light Tank (Walker Bulldog)* Robert Joseph Icks,1972 KV-1 & 2 Heavy Tanks 1939-45 Steven J. Zaloga,1996-01-15 Named after Kliment Voroshilov the People s Commissar for Defence the KVs proved a nasty surprise for German tank crews during the early days of Operation Barbarossa Although slow they were extremely heavily armoured This volume examines the transition from multi turreted tanks to heavy single turret vehicles consisting of the KV 1 and 2 and the increased favour given to the heavy single turret after the Germans began to develop ammunition capable of penetrating even the thickest armour whilst detailing the design development and operational history of the Soviet Union s monstrous KV series of tanks M103 Heavy Tank + M41 Light Tank (Walker Bulldog) Robert Joseph Icks,196? M3 Lee/Grant Medium Tank 1941-45 Steven J. Zaloga,2013-03-20 The highly successful stop gap M3 medium tank was designed in 1941 and as adequate turret casting facilities were not yet ready the M3 used an unusual armament configuration patterned after a French tank British lend lease demands led to the design of a second turret type with the US version called the Lee and the British version the Grant It could penetrate Panzer armor and its explosive firepower was excellent for dealing with German anti tank guns This book covers the design development service and variants of a vehicle that was the backbone of many World War II forces The M47 and M48 Patton Tanks Steve Zaloga,1982
