Grass Roots Civil Defense:

Atomic Americans Sarah E. Robey, 2022-03-15 At the dawn of the Atomic Age Americans encountered troubling new questions brought about by the nuclear revolution In a representative democracy who is responsible for national public safety How do citizens imagine themselves as members of the national collective when faced with the priority of individual survival What do nuclear weapons mean for transparency and accountability in government What role should scientific experts occupy within a democratic government Nuclear weapons created a new arena for debating individual and collective rights In turn they threatened to destabilize the very basis of American citizenship As Sarah E Robey shows in *Atomic Americans* people negotiated the contours of nuclear citizenship through overlapping public discussions about survival Policymakers and citizens disagreed about the scale of civil defense programs and other public safety measures As the public learned more about the dangers of nuclear fallout critics articulated concerns about whether the federal government was operating in its citizens best interests By the early 1960s a significant antinuclear movement had emerged which ultimately contributed to the 1963 nuclear testing ban *Atomic Americans* tells the story of a thoughtful body politic engaged in rewriting the rubric of rights and responsibilities that made up American citizenship in the Atomic Age

Civil Defense Begins at Home Laura McEnaney, 2020-10-06 Dad built a bomb shelter in the backyard Mom stocked the survival kit in the basement and the kids practiced ducking under their desks at school This was family life in the new era of the A bomb This was civil defense In this provocative work of social and political history Laura McEnaney takes us into the secretive world of defense planners and the homes of ordinary citizens to explore how postwar civil defense turned the front lawn into the front line The reliance on atomic weaponry as a centerpiece of U S foreign policy cast a mushroom cloud over everyday life American citizens now had to imagine a new kind of war one in which they were both combatants and targets It was the Federal Civil Defense Administration s job to encourage citizens to adapt to their nuclear present and future As McEnaney demonstrates the creation of a civil defense program produced new dilemmas about the degree to which civilian society should be militarized to defend itself against internal and external threats Conflicts arose about the relative responsibilities of state and citizen to fund and implement a home front security program The defense establishment s resolution was to popularize and privatize military preparedness The doctrine of self help defense demanded that citizens become autonomous rather than rely on the federal government for protection Families would reconstitute themselves as paramilitary units that could quash subversion from within and absorb attack from without Because it solicited an unprecedented degree of popular involvement the FCDA offers a unique opportunity to explore how average citizens community leaders and elected officials both participated in and resisted the creation of the national security state Drawing on a wide variety of archival sources McEnaney uncovers the broad range of responses to this militarization of daily life and reveals how government planners and ordinary people negotiated their way at the dawn of the atomic age Her work sheds new light on the important postwar debate about what

total military preparedness would actually mean for American society *MARS Bulletin* Signal Corps (Army),1951

Appropriations for 1962 United States. Congress. House. Committee on Appropriations,1961 **Armed Actors** Kees Koonings,Dirk Kruijt,2013-04-04 In this volume Latin Americanist scholars explore the recent evidence relating to the ways in which partial state failure in the continent is interacting with new types of organized violence thereby undermining the process of democratic consolidation that has characterized Latin America over the past two decades This new violence stems as this book s case studies from Colombia Peru Argentina Venezuela Brazil and other countries including El Salvador show

from a heterogeneous variety of social actors including drug mafias peasant militias and urban gangs collectively referred to as actores armadas as well as state related actors like the police military intelligence agencies and paramilitary forces These armed actors are reproducing organized social and political violence beyond the confines of democratic politics and civil society The results as the authors warn include both governance voids domains where the legitimate state is effectively absent in the face of armed actors prevailing by force and an erosion of the capacity and willingness of state officials themselves to abide by the rule of law These tendencies in turn pave the way for a possible reinstallation of authoritarian regimes under the control of politicized armies or at the very least the spread of state violence in one form or another Why these tendencies need to be taken so seriously is the authors argue because of the deeper social roots underlying them notably the failure of neoliberal economic policies and weakened state structures to deliver the jobs standards of living and social services every democratic citizenry has a right to expect The Argentinian collapse and persistent Colombian and Venezuelan crises receive special attention in this regard

Revolution at the Grassroots Charles Downs, 1989-07-01 The book outlines the history of the revolutionary process at the national level and as it was experienced in one major Portuguese city While generally little known the achievements of grassroots organizations in Portugal far exceeded those of other developed countries and their examination provides insights poses important questions and suggests unexpected answers relevant far beyond Portugal The Portuguese revolution provides a unique window through which to examine not only the role of community organizations in a time of revolutionary change but also the dynamics potential and limitations of majority participation Over a period of nineteen months beginning with a military coup which ended the longest lasting European dictatorship the period brought to a close 500 years of colonialism in Africa and ending with another military coup the Portuguese society and political debate were significantly transformed largely by the unanticipated development of mass movements advocating direct democracy and social economic and political change
