Get Real with Storytime Julie Dietzel-Glair, Marianne Crandall Follis Ph.D., 2015-11-10 This is a complete year-long programming guide that shows librarians how to integrate nonfiction and poetry into storytime for preschool children in order to build literacy skills and overall knowledge. The right nonfiction titles, ones with colorful photographs and facts that are interesting to young imaginations, give librarians an opportunity to connect with children who are yearning for true stuff. Presenting poetry in storytime encourages a love of language and the chance to play with words. Written by authors with a combined 25 years of experience working with children and books in a library setting. *Get Real With Storytime: 52 Weeks of Early Literacy Programming* goes far beyond the typical storytime resource book by providing books and great ideas for using nonfiction and poetry with preschool children. This book provides a complete year-long programming guide for librarians who work with preschool children in public libraries and school librarians who run special programs for preschoolers as well as parents, childcare providers, and camp counselors. Each of the 52 broad storytime topics, one for each week of the year, includes a sample storytime featuring an opening poem, a nonfiction title, picture books, songs, rhymes, or fingerplays, and a follow-up activity. Early literacy tips that are based on the authors' extensive experience and the principles of Every Child Ready to Read (ECRR) are presented throughout the book

Equipping Space Cadets Emily Midkiff, 2022-04-19 Winner of the 2023 Science Fiction Research Association SFRA Book Award 2022 Longlist Nominee for the Best Non Fiction Award from the British Science Fiction Association Equipping Space Cadets Primary Science Fiction for Young Children argues for the benefits and potential of primary science fiction or science fiction for children under twelve years old Science fiction for children is often disregarded due to common misconceptions of childhood When children are culturally portrayed as natural and simple they seem like a poor audience for the complex scientific questions brought up by the best science fiction The books and the children who read them tell another story Using three empirical studies and over 350 children's books including *If I Had a Robot Dog* *Bugs in Space* and *Commander Toad in Space* Equipping Space Cadets presents interdisciplinary evidence that science fiction and children are compatible after all Primary science fiction literature includes many high quality books that cleverly utilize the features of children's literature formats in order to fit large science fiction questions into small packages In the best of these books authors make science fiction questions accessible and relevant to children of various reading levels and from diverse backgrounds and identities Equipping Space Cadets does not stop with literary analysis but also presents the voices of real children and practitioners The book features three studies a survey of teachers and librarians quantitative analysis of lending records from school libraries across the United States and coded read aloud sessions with elementary school students The results reveal how children are interested in and capable of reading science fiction but it is the adults including the most well intentioned librarians and teachers who hinder children's engagement with the genre due to their own preconceptions about the genre and children
