**Algae in the Bioeconomy** Jean-Luc Wertz, Serge Perez, 2024-02-16 Algae play an important ecological role as oxygen producers and carbon sequesters and are the food base for all aquatic life Algae are economically important as a source of crude oil food and feed and pharmaceutical and industrial products High value and sustainable products from algae are already economically viable and can be a fundamental driver for fuel production Algae in the Bioeconomy provides a detailed overview of the chemical composition of algae and shows that an integrated biorefinery approach is necessary for large scale algae production and conversion where multiple products are produced This book serves as a unique compendium of knowledge covering the essential features of algae and their applications Discusses the structural chemistry and biology of micro and macroalgal components Describes classification occurrence conversion and production of micro and macroalgae Offers strategies for optimal use of micro and macroalgae in the bioeconomy including regional strategies in the EU US China India Malaysia Norway and Chile Features forewords from international experts offering both a scientific and an economic strategic viewpoint This book is intended for an interdisciplinary audience in chemical engineering biotechnology and environmental science and engineering promoting research development and application of algae as a sustainable resource

**Composites from the Aquatic Environment** Sapuan S. M., Imran Ahmad, 2023-01-13 This book provides a methodical compilation of deriving composites from the hidden treasure of the aquatic world Continuous and rapid progress in the composite industries have increased the demand for resilient economically viable and sustainable composite materials having enhanced mechanical thermal and electrical properties which better suits their respective applications If the materials organisms used for the production or conversion of composites are renewable degradable and easily and abundantly available then it gives great opportunity to the researchers to work on different options or processes to make them a viable technology This work describes the organisms and materials present in the aquatic environment for the production of composite materials Elaborating the versatile green expedients and their potential applications in the field of composites Since growing ecological and environmental consciousness has driven efforts for development of new innovative materials for various end use applications Therefore the LCA an circular bio economy will be discussed to be efficient and sustainable This book is ideal for the students academicians researchers and industry players It also cover the present scenario applications and future perspectives of composites derived from aquatic organisms This compiled book features chapters that discuss the conversion of different materials and organisms present in aquatic environment to composite materials like micro algae seaweeds chitosan collagen agar cyanobacteria etc in a viable manner

*Bioinformatics and Functional Genomics* Jonathan Pevsner, 2015-10-26 The bestselling introduction to bioinformatics and genomics now in its third edition Widely received in its previous editions Bioinformatics and Functional Genomics offers the most broad based introduction to this explosive new discipline Now in a thoroughly updated and expanded third edition it continues to be the

go to source for students and professionals involved in biomedical research This book provides up to the minute coverage of the fields of bioinformatics and genomics Features new to this edition include Extensive revisions and a slight reorder of chapters for a more effective organization A brand new chapter on next generation sequencing An expanded companion website also updated as and when new information becomes available Greater emphasis on a computational approach with clear guidance of how software tools work and introductions to the use of command line tools such as software for next generation sequence analysis the R programming language and NCBI search utilities The book is complemented by lavish illustrations and more than 500 figures and tables many newly created for the third edition to enhance clarity and understanding Each chapter includes learning objectives a problem set pitfalls section boxes explaining key techniques and mathematics statistics principles a summary recommended reading and a list of freely available software Readers may visit a related Web page for supplemental information such as PowerPoints and audiovisual files of lectures and videocasts of how to perform many basic operations [www.wiley.com/go/pevsnerbioinformatics](http://www.wiley.com/go/pevsnerbioinformatics) Bioinformatics and Functional Genomics Third Edition serves as an excellent single source textbook for advanced undergraduate and beginning graduate level courses in the biological sciences and computer sciences It is also an indispensable resource for biologists in a broad variety of disciplines who use the tools of bioinformatics and genomics to study particular research problems bioinformaticists and computer scientists who develop computer algorithms and databases and medical researchers and clinicians who want to understand the genomic basis of viral bacterial parasitic or other diseases

**Energy Efficiency in Buildings** José Manuel Andújar, Sergio Gómez Melgar, 2020-04-28 Buildings are one of the main causes of the emission of greenhouse gases in the world Europe alone is responsible for more than 30% of emissions or about 900 million tons of CO<sub>2</sub> per year Heating and air conditioning are the main cause of greenhouse gas emissions in buildings Most buildings currently in use were built with poor energy efficiency criteria or depending on the country and the date of construction none at all Therefore regardless of whether construction regulations are becoming stricter the real challenge nowadays is the energy rehabilitation of existing buildings It is currently a priority to reduce or ideally eliminate the waste of energy in buildings and at the same time supply the necessary energy through renewable sources The first can be achieved by improving the architectural design construction methods and materials used as well as the efficiency of the facilities and systems the second can be achieved through the integration of renewable energy wind solar geothermal etc in buildings In any case regardless of whether the energy used is renewable or not the efficiency must always be taken into account The most profitable and clean energy is that which is not consumed

fabric architecture to modern textile Provides analysis of relevant textile materials and their properties including coatings and membranes Contains expert insights in to the applications of textiles in architecture presenting a series of relevant case studies from around the world

Communicating Biological Sciences Richard Elliott,2016-05-23 Recent scandals in the biosciences have highlighted the perils of communicating science leading many observers to ask questions about the pressures on scientists and the media to hype up claims of scientific breakthroughs Journalists science writers and scientists themselves have to report complex and rapidly developing scientific issues to society yet work within conceptual and temporal constraints that shape their communication To date there has been little reflection on the ethical implications of science writing and science communication in an era of rapid change Communicating Biological Sciences discusses the ethics of science communication in light of recent developments in biotechnology and biomedicine It focuses on the role of metaphors in the creation of visions and the framing of scientific advances as well as their impact on patterns of public acceptance and rejection trust and scepticism Its rigorous investigation will appeal not only to science writers and scientists but also to scholars of sociology science and technology studies media and journalism

*Climate-Resilient Development* Astrid Carrapatoso,Edith Kürzinger,2013-10-01 The concept of resilience currently infuses policy debates and public discourse and is promoted as a normative concept in climate policy making by governments non governmental organizations and think tanks This book critically discusses climate resilient development in the context of current deficiencies of multilateral climate management strategies and processes It analyses innovative climate policy options at national inter regional and local levels from a mainly Southern perspective thus contributing to the topical debate on alternative climate governance and resilient development models Case studies from Africa Asia and Latin America give a ground level view of how ideas from resilience could be used to inform and guide more radical development and particularly how these ideas might help to rethink the notion of progress in the light of environmental social economic and cultural changes at multiple scales from local to global It integrates theory and practice with the aim of providing practical solutions to improve complement or where necessary reasonably bypass the UNFCCC process through a bottom up approach which can effectively tap unused climate resilient development potentials at the local national and regional levels This innovative book gives students and researchers in environmental and development studies as well as policy makers and practitioners a valuable analysis of climate change mitigation and adaptation options in the absence of effective multilateral provisions

Glocalized Solutions for Sustainability in Manufacturing Jürgen Hesselbach,Christoph Herrmann,2011-03-19 The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 continues a long tradition of scientific meetings focusing on the exchange of industrial and academic knowledge and experiences in life cycle assessment product development sustainable manufacturing and end of life management The theme Glocalized Solutions for

Sustainability in Manufacturing addresses the need for engineers to develop solutions which have the potential to address global challenges by providing products services and processes taking into account local capabilities and constraints to achieve an economically socially and environmentally sustainable society in a global perspective Globalized Solutions for Sustainability in Manufacturing do not only involve products or services that are changed for a local market by simple substitution or the omitting of functions Products and services need to be addressed that ensure a high standard of living everywhere Resources required for manufacturing and use of such products are limited and not evenly distributed in the world Locally available resources local capabilities as well as local constraints have to be drivers for product and process innovations with respect to the entire life cycle The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 serves as a platform for the discussion of the resulting challenges and the collaborative development of new scientific ideas

Assessment of Sea-Turtle Status and Trends National Research Council, Division on Earth and Life Studies, Ocean Studies Board, Committee on the Review of Sea-Turtle Population Assessment Methods, 2010-10-07 All six species of sea turtles found in U S waters are listed as endangered or threatened but the exact population sizes of these species are unknown due to a lack of key information regarding birth and survival rates The U S Endangered Species Act prohibits the hunting of sea turtles and reduces incidental losses from activities such as shrimp trawling and development on beaches used for nesting However current monitoring does not provide enough information on sea turtle populations to evaluate the effectiveness of these protective measures Sea Turtle Status and Trends reviews current methods for assessing sea turtle populations and finds that although counts of sea turtles are essential more detailed information on sea turtle biology such as survival rates and breeding patterns is needed to predict and understand changes in populations in order to develop successful management and conservation plans

## The Enigmatic Realm of **Green Biology Online**: Unleashing the Language is Inner Magic

In a fast-paced digital era where connections and knowledge intertwine, the enigmatic realm of language reveals its inherent magic.
