Department of Education, 1914 Kentucky Criminal and Traffic Law Manual, 2005-2006 Edition Publisher's Editorial Staff, 2005 **Against Prediction** Bernard E. Harcourt, 2008-09-15 From random security checks at airports to the use of risk assessment in sentencing actuarial methods are being used more than ever to determine whom law enforcement officials target and punish And with the exception of racial profiling on our highways and streets most people favor these methods because they believe they are a more cost effective way to fight crime In *Against Prediction* Bernard E Harcourt challenges this growing reliance on actuarial methods These prediction tools he

demonstrates may in fact increase the overall amount of crime in society depending on the relative responsiveness of the profiled populations to heightened security. They may also aggravate the difficulties that minorities already have obtaining work education and a better quality of life thus perpetuating the pattern of criminal behavior. Ultimately Harcourt shows how the perceived success of actuarial methods has begun to distort our very conception of just punishment and to obscure alternate visions of social order. In place of the actuarial he proposes instead a turn to randomization in punishment and policing. The presumption Harcourt concludes should be against prediction.
