plants and animals **A Global Corporate Trust for Agroecological Integrity** John W. Head, 2019-06-14 This book examines global environmental governance and how legal institutional and conceptual reform can facilitate a transformation to a new natural systems form of agriculture. Profound global climate disruption makes it essential that we replace our current agricultural system described in this book as a fossil carbon dependent modern extractive agriculture with a natural systems agriculture featuring perennial grains growing in polycultures thereby mimicking the natural grassland and forest ecosystems that modern extractive agriculture has largely destroyed. After examining relevant international legal and conceptual foundations sovereignty federalism global governance and existing international organizations focusing on agriculture the book explores legal and institutional opportunities to facilitate dramatic agricultural reform and ecological restoration. Among other things it explains how innovative federalism structures around the world provide patterns for reorienting global environmental governance including what the book calls eco states that would through exercise of pluralistic sovereignty be responsible for agroecological management. Drawing from his experience working in international institutions the author provides detailed global governance proposals for facilitating the type of agricultural reform that can help avoid ecological collapse especially through soil degradation and climate change. This book will be of great interest to students and scholars of international law agroecology climate change ecological restoration sustainable development and global governance as well as policy makers and practitioners working in these fields *Earth and Its Environment* Mr. Rohit Manglik, 2024-03-24 Investigates Earth's ecosystems climate systems and natural processes emphasizing human impacts and strategies for sustainable management to preserve environmental balance and resources Environmental Science & Environmental Biology Mr. Rohit Manglik, 2024-03-19 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources.
