**On Ethics, Diversity, and Conflict: the Graduate Years , Vol I** James Triplett, 2011-05-15 Every class I teach on ethics has students who invariably arrive at the question what is ethics This is a question many have wrestled with over the history of the modern human Maybe the problem with ethics is that the definition is as varied and

elusive as those associated with love or leadership Then again there is a possibility it is too closely defined as something that is good when so many situations where an understanding of ethics suggests that an ethical framework may be not so good Here I define ethics in the absence of good or bad rather it is simply a decision making framework humans use to manage their activities and to minimize cognitive dissonance between what one thinks and what one does *Handbook of Bureaucracy* Ali Farazmand,2018-12-13 This encyclopedic reference text provides an analysis of the basic issues and major aspects of bureaucracy bureaucratic politics and administrative theory public policy and public administration in historical and contemporary perspectives Examining theoretical philosophical and empirical interpretations as well as the intricate position of bureaucracy

**How Management Programs Can Improve Organization Performance** Richard E. Crandall,William Crandall,2015-02-01 All organizations operate in an environment that is rapidly changing To be successful the organization must also change The question is what to change and how This book will describe in some detail a number of management programs many of which are known by their three letter acronyms such as Just in Time JIT or Service Oriented Architecture SOA A management program is designed to improve an organization s effectiveness and efficiency However there are so many management programs it is often difficult for managers to decide which one would be most appropriate for their operation This book will describe an array of management programs and group them to indicate their primary purpose The book will also outline a process that will enable managers to select the most appropriate management program to meet their immediate and long term needs Implementing a management program is no small task It can be expensive time consuming and disruptive of normal operations therefore the choice of the management program requires careful selection and implementation Care must be taken to increase the likelihood of successfully implementing new ventures in all types of organizations business nonprofit and governmental agencies Many ventures fail or achieve limited success not because the idea isn t good but because the organization has not adequately prepared its internal capabilities to meet the environmental conditions in which it operates An important feature of this book is that it can be updated periodically to add new programs and phase out programs no longer relevant The book will provide readers with a comprehensive description of the most popular management improvement programs and their primary applications to their organizations We will discuss the philosophy and principles of these programs and include a discussion on how to use each program to achieve optimum success A central theme of this book is to not just adopt an improvement program for the sake of adopting it but to match the improvement program with the specific needs in an organization In the

chapters that follow we will illustrate how this matching process can be conducted Above all we plan the book to be a concise and useful resource to both practitioners and academics Here is what you can expect in the chapters

**and Enactment among the Acholi of Uganda** David Wesley Ofumbi,2019-07-25 The industrial era organizations used dualistic leadership theory which regarded followers as objects of leaders influence to socialize them into passive followership irrespective of context and outcome Consequently organizations focused on leadership and condemned active followership as a toxic behavior that sabotages organizational processes and outcomes However the emergence of relational leadership theory in the information era flattened organizational structure which created a greater need for collaboration within and across sectors In this new era organizations cannot survive without responsible individuals who could be productive as both leaders and followers As a result organizations are experiencing high demand for active followership throughout organizational ranks roles and relationships Nonetheless since followership studies are still in their infancy there is hardly any information on how followers develop and enact active followership Whereas some studies established followership identity role and behaviors and identified factors influencing their development none has explored how they do so This study offers a theory of followership development and enactment anchored in a seamless paradigm that can be used to expand leadership theory beyond dualistic tendencies that absolutized the differences among leadership variables despite their seamlessness Therefore it enhances organizational desire and capacity to develop and engage star followers effectively
