Greensword A Tale Of Extreme Global Warming:

Greensword Donald J. Bingle,2009-01-01 This is a dark comedy about the environment extremism and the lengths to which people will go to to avoid getting a real job *Boondocks Fantasy* Jean Rabe,Martin H. Greenberg,2011-01-04 From vampires in the Appalachians and leprechauns in the Smokies to mermaids in the Mississippi and bloodthirsty trolls in an Alabama trailer park the South makes a unique setting for the 20 stories in this anthology of redneck vampires werewolves wizards elves and other creatures Featuring original stories by Gene Wolfe Timothy Zahn Chris Pierson Mickey Zucker Reichert Steven Savile Elizabeth A Vaughan Jay Lake Anton Strout and many more Love and Rockets Martin H. Greenberg,Kerrie L. Hughes,2010-12-07 Space the final frontier Or is it Many say there s no frontier more forbidding than a romantic relationship between a man and a woman But what if one s a human and the other s an alien Here is an original collection of space opera stories where authors take love unrequited or not on a spaceship space station or planetary colony and add enough drama confusion and mayhem to ensure that the path to true love or short term infatuation is seldom free of obstacles **Encyclopedia of Global Warming** Steven I. Dutch,2010 Designed to provide students at the high school and undergraduate levels with a convenient source of information on the fundamental science and sociopolitical issues including the debates and controversies surrounding climate change The study of climate change involves not only scientists but also politicians policy makers businesses government and nongovernment agencies and the general public A student attempting to understand both the environmental science and social issues and controversies will encounter not just scientific terms and concepts but political organizations geographic areas social concepts persons countries organizations and laws as well The essays in the set fall into one or more of the following broad categories animals Arctic and Antarctic astronomy chemistry and geochemistry climatic events and epochs conferences and meetings cryology and glaciology diseases and health effects economics industries and products energy environmentalism conservation and ecosystems ethics human rights and social justice fossil fuels geology and geography laws treaties and protocols meteorology and atmospheric sciences nations and peoples oceanography organizations and agencies physics and geophysics plants and vegetation pollution and waste popular culture and society science and technology transportation and water resources Publisher **Timeshares** Jean Rabe,Martin H. Greenberg,2010-03-02 Sixteen original stories about taking your dream vacation in any era you desire Take a vacation through time with the help of a Time Travel Agency offering excursions into the past and future Readers will find themselves in exotic adventurous locales and in all manner of trouble and mysteries And figures from the past will be able to squeak by the other way Picture Cleopatra in modern day New York City or Hannibal searching for elephants at Wisconsin s Circus World And that s just the beginning of the thrills and danger **Anthropocene Fictions** Adam Trexler,2015-04-20 Since the Industrial Revolution humans have transformed the Earth s atmosphere committing our planet to more extreme weather rising sea levels melting polar ice caps and mass extinction This period of observable human impact on the Earth s

ecosystems has been called the Anthropocene Age The anthropogenic climate change that has impacted the Earth has also affected our literature but criticism of the contemporary novel has not adequately recognized the literary response to this level of environmental crisis Ecocriticism's theories of place and planet meanwhile are troubled by a climate that is neither natural nor under human control Anthropocene Fictions is the first systematic examination of the hundreds of novels that have been written about anthropogenic climate change Drawing on climatology the sociology and philosophy of science geography and environmental economics Adam Trexler argues that the novel has become an essential tool to construct meaning in an age of climate change The novel expands the reach of climate science beyond the laboratory or model turning abstract predictions into subjectively tangible experiences of place identity and culture Political and economic organizations are also being transformed by their struggle for sustainability In turn the novel has been forced to adapt to new boundaries between truth and fabrication nature and economies and individual choice and larger systems of natural phenomena Anthropocene Fictions argues that new modes of inhabiting climate are of the utmost critical and political importance when unprecedented scientific consensus has failed to lead to action Under the Sign of Nature Explorations in Ecocriticism *The Publishers Weekly*, **Book Review Index - 2009 Cumulation** Dana Ferguson, 2009-08 Book Review Index provides quick access to reviews of books periodicals books on tape and electronic media representing a wide range of popular academic and professional interests The up to date coverage wide scope and inclusion of citations for both newly published and older materials make Book Review Index an exceptionally useful reference tool More than 600 publications are indexed including journals and national general interest publications and newspapers Book Review Index is available in a three issue subscription covering the current year or as an annual cumulation covering the past year *The Writers Directory*, 2013

Green Rising Lauren James, 2021 Gabrielle Theo and Hester have grown up in an ecological catastrophe climate change is making Earth uninhabitable But when they join thousands of teenagers around the world in developing a strange new power the ability to grow plants from their skin it seems there may be hope for the planet after all However plenty of profit hungry organisations would like to exploit these so called Greenfingers for their own means As Gabrielle Theo and Hester battle to master their new ability and navigate first love and family expectations can they outsmart the corporations and bring about a green rising Publisher's description **Seven Little Green Men** William Phiri, 2019-12-11 A chilling climate horror entitled the Seven Little Green Men is a fictional tale set on planet earth's late twenty first century This book was written to try and shed light on the far reaching consequences of climate change and global warming It speaks about what could go wrong if humans do not wake up to the realities of the careless use of fossil fuels and other natural resources **A Chilling Warmth** Jay Kaplan, Lidia Lopinto, 2002-12 The world of 2100 is a terrible place A combination of global warming and the devastation caused by a series of local atomic wars has led to the destruction of the environment By 2050 there's mass starvation and lack of potable water Riots are occurring everywhere as survivors fight for the remaining food and

drinkable water The military all over the world called Fiefs has taken command and built strongholds called Fiefdoms They distribute the remaining food and water to the world populace By 2054 scientists discover means to convert human waste into food and water capsules The story begins in June 2223 when a spaceship from a distant planet lands on earth They find a world of terrible winds excessive temperatures and constant storms but no humans can be found They discover the arid earth has spawned horrible worms that roam the globe A tape is discovered which describes the attempts of three brave people of 2100 to save the earth Dr Alex Mendez a professor of 20th century history Dr Jack Lee Director of a Physics Laboratory and Rebekka an advanced robot Alex and Rebekka plan to return to the world of 2003 to influence a noted environmental scientist Dr Peter O Day to alter his negative opinion of global warming Rebekka is a scribe and is the teller of this tale She has preparing a tape for future generations

Greenhouse; The 200-Year Story Of Global Warming G.E. Christianson,1999 For Most People The Threat Of Global Warming Seems A Contemporary One For Christianson It Is An Absorbing Historical And Scientific Process Intertwined With Two Centuries Of Civilisation And 300 Billion Years In The Life Of The Planet He Blends The Research Of A Scholar With A Novelist S Storytelling Skill His Series Of Elegantly Linked Stories Make Fascinating Connections Between History And Science He Finds Meaning In The Small And The Large From The Mutation Of A Common Moth In Manchester Which Could Have Helped Prove Charles Darwin S Theories Of Natural Selection And Adaptation To The Deaths Of The Anasazi And Viking Civilisations Which Unveil The Close Connection Between Global Warming And Cooling Scientists Inventors And Other Pioneers Are Woven Into The Narrative For The Author Finds Global Warming Both A Memorable Human Drama As Well As An Integral Part Of Our Planet S History

The End of the Long Summer Dianne Dumanoski,2010-07-13 For the past twelve thousand years Earth s stable climate has allowed human civilization to flourish But this long benign summer is an anomaly in the Earth s history and one that is rapidly coming to a close The radical experiment of our modern industrial civilization is now disrupting our planet s very metabolism our future hinges in large part on how Earth responds Climate change is already bearing down hitting harder and faster than expected The greatest danger is not extreme yet discrete weather events such as Hurricane Katrina or the calamitous wildfires that now plague California but profound and systemic disruptions on a global scale Contrary to the pervasive belief that climate change will be a gradual escalator ride into balmy temperatures the Earth s climate system has a history of radical shifts dramatic shocks that could lead to the collapse of social and economic systems The question is no longer simply how can we stop climate change but how can we as a civilization survive it The guiding values of modern culture have become dangerously obsolete in this new era Yet as renowned environmental journalist Dianne Dumanoski shows little has been done to avert the crisis or to prepare human societies for a time of growing instability In a work of astonishing scope Dumanoski deftly weaves history science and culture

to show how the fundamental doctrines of modern society have impeded our ability to respond to this crisis and have fostered an economic globalization that is only increasing our vulnerability at this critical time She exposes the fallacy of banking on a last minute technological fix as well as the perilous trap of believing that humans can succeed in the quest to control nature Only by restructuring our global civilization based on the principles that have allowed Earth's life and our ancestors to survive catastrophe diversity redundancy a degree of self sufficiency social solidarity and an aversion to excessive integration can we restore the flexibility needed to weather the trials ahead In this powerful and prescient book Dumanoski moves beyond now ubiquitous environmental buzzwords about green industries and clean energy to provide a new cultural map through this dangerous passage Though the message is grave it is not without hope Lucid eloquent and urgent *The End of the Long Summer* deserves a place alongside transformative works such as *Silent Spring* and *The Fate of the Earth* *The Fire Dogs of Climate Change* Sally Andrew, 2010-09 The intention of this portfolio of creative essays real life success stories and hard hitting facts about global warming is to investigate the emotional and spiritual components of humankind's relationship to the world By making a connection between the states of heart and mind and the ability to act the inner fire dogs the guardians and watchdogs of the earth are awakened especially in those who do not specialize in activism or environmental concerns Through the stories focus on hope and positive action urgent climate change issues are easily accessible making this collection also ideal for organizations conferences and government groups looking for ways to inspire educate and take effective action *On Fire* Naomi Klein, 2020-09-01 1 New York Times and internationally bestselling author Naomi Klein makes the case for a Green New Deal in this keenly argued well researched and impassioned manifesto The Washington Post An instant bestseller *On Fire* shows Klein at her most prophetic and philosophical investigating the climate crisis not only as a profound political challenge but also as a spiritual and imaginative one Delving into topics ranging from the clash between ecological time and our culture of perpetual now to the soaring history of humans changing and evolving rapidly in the face of grave threats to rising white supremacy and fortified borders as a form of climate barbarism this is a rousing call to action for a planet on the brink An expansive far ranging exploration that sees the battle for a greener world as indistinguishable from the fight for our lives *On Fire* captures the burning urgency of the climate crisis as well as the fiery energy of a rising political movement demanding a catalytic Green New Deal Naomi Klein's work has always moved and guided me She is the great chronicler of our age of climate emergency an inspirer of generations Greta Thunberg climate activist If I were a rich man I'd buy 245 million copies of Naomi Klein's *On Fire* and hand deliver them to every eligible voter in America Klein is a skilled writer Jeff Goodell The New York Times **Green Earth** Kim Stanley Robinson, 2015 *GREEN EARTH* takes the stories first told in *FORTY SIGNS OF RAIN* *FIFTY DEGREES BELOW* and *SIXTY DAYS AND COUNTING* and combines them in a fully updated compressed and compelling single volume Catastrophe is in the air Increasingly strange weather events are pummeling the Earth When the Gulf Stream shuts down and the Antarctic ice

sheet starts melting climate extremes multiply and some winters hit like an ice age New U S President Phil Chase is on a mission he s determined to solve climate change His science advisor Frank Vanderwal is a bit more messed up When massive floods hit Washington Frank finds himself living in a treehouse and in love with a woman who s definitely not what she seems one who will draw him into the shadowy world of Homeland Security and other blacker agencies Only science can save the day Frank knows he has to find a way to save the world so that science can proceed The Story of More Hope

Jahren,2020-03-03 The essential pocket primer on climate change that will leave an indelible impact on everyone who reads it Hope Jahren asks the central question of our time how can we learn to live on a finite planet Elizabeth Kolbert author of The Sixth Extinction Hope Jahren is the voice that science has been waiting for Nature Hope Jahren is an award winning scientist a brilliant writer a passionate teacher and one of the seven billion people with whom we share this earth In The Story of More she illuminates the link between human habits and our imperiled planet In concise highly readable chapters she takes us through the science behind the key inventions from electric power to large scale farming to automobiles that even as they help us release greenhouse gases into the atmosphere like never before She explains the current and projected consequences of global warming from superstorms to rising sea levels and the actions that we all can take to fight back At once an explainer on the mechanisms of global change and a lively personal narrative given to us in Jahren s inimitable voice The Story of More is a superb account of the deadly struggle between humanity and what may prove the only life bearing planet within ten light years E O Wilson **The Climate War** Eric Pooley,2010-06-08 In The Climate War Eric Pooley deputy editor of Bloomberg BusinessWeek does for global warming what Bob Woodward did for presidents and Lawrence Wright did for terrorists In this epic tale of an American civil war Pooley takes us behind the scenes and into the hearts and minds of the most important players in the struggle to cap global warming pollution a fight in which trillions of dollars and the fate of the planet are at stake Why has it been so hard for America to come to grips with climate change Why do so many people believe it isn t really happening As President Obama s science advisor John Holdren has said We re driving in a car with bad brakes in a fog and heading for a cliff We know for sure that cliff is out there We just don t know exactly where it is Prudence would suggest that we should start putting on the brakes But powerful interests are threatened by the carbon cap that would speed the transition to a clean energy economy and their agents have worked successfully to deny the problem and delay the solutions To write this book Pooley the former managing editor of Fortune and chief political correspondent for Time spent three years embedded with an extraordinary cast of characters from the flamboyant head of one of the nation s largest coal burning energy companies to the driven environmental leader who made common cause with him from leading scientists warning of impending catastrophe to professional skeptics disputing almost every aspect of climate science from radical activists chaining themselves to bulldozers to powerful lobbyists media gurus and advisors in Obama s West Wing and to top it off unprecedented access to former Vice President Al Gore and his team of climate activists Pooley captures the

quiet determination and even heroism of climate campaigners who have dedicated their lives to an uphill battle that's still raging today. He asks whether we have what it takes to preserve our planet's habitability and shows how America's climate war sends shock waves from Bali to Copenhagen. No other reporter enjoys such access to this cast of characters. No other book covers this terrain. From the trenches of a North Carolina power plant to the battlefields of Capitol Hill, Madison Avenue, and Wall Street, *The Climate War* is the essential read for anyone who wants to understand the players and politics behind the most important issue we face today.
