

Reading Level Correlation Chart

Correlating reading levels is not an exact science. All correlations are an approximation. It is important to note overlap in both F&P Levels and Lexiles. This chart was compiled using information from Fountas and Pinnell, as well as the Lexile website. Lexile levels reflect current changes as applicable to the CCSS. In an ideal situation, an eighth grade student would reach level Z by the end of the year.

support is invaluable and yet we feel the disjuncture between university and school just as many of you in more traditional student teaching settings. Students hear best practice information from us in methods classes and they receive ample exposure to the research supporting our field but have a hard time implementing research based practices in their classroom settings and an even harder time finding it in the classrooms around them.
