Helping Children Left Behind State Aid And The Pursuit Of Educational Equity:

Helping Children Left Behind John Yinger, 2004 An overview and five case studies of school finance reform a resource for scholars public officials and others interested in education finance reform **Handbook of Research in Education**

Finance and Policy Helen F. Ladd, Edward B. Fiske, 2012-08-21 Sponsored by the Association for Education Finance and Policy AEFPP this groundbreaking new handbook assembles in one place the existing research based knowledge in education finance and policy thereby helping to define this evolving field of research and practice It provides a readily available resource for anyone seriously involved in education finance and policy in the United States and around the world The Handbook traces the evolution of the field from its initial focus on school inputs and the revenue sources used to finance these inputs to a focus on educational outcomes and the larger policies used to achieve them It shows how the current decision making context in school finance inevitably interacts with those of governance accountability equity privatization and other areas of education policy Because a full understanding of the important contemporary issues requires input from a variety of perspectives the Handbook draws on contributors from a variety of disciplines While many of the chapters cover complex state of the art empirical research the authors explain key concepts in language that non specialists can understand

Poverty And Proficiency: The Cost Of And Demand For Local Public Education (A Textbook In Education Finance) John Yinger, 2020-02-27 This book covers a wide range of topics in education finance It is designed to introduce the literature on education finance to scholars and prospective scholars and can be used as a textbook for a graduate level education finance class The topics in the book include the incidence of the property tax as a source of revenue for elementary and secondary education how much more it costs to reach a state s education targets in a high poverty school district than in a rich district the design of state education aid programs the impact of school quality on house values the cost implications of school district consolidations and the impact of state aid on school infrastructure **Choosing Homes, Choosing Schools**

Annette Lareau, Kimberly Goyette, 2014-03-31 A series of policy shifts over the past decade promises to change how Americans decide where to send their children to school In theory the boom in standardized test scores and charter schools will allow parents to evaluate their assigned neighborhood school or move in search of a better option But what kind of data do parents actually use while choosing schools Are there differences among suburban and urban families How do parents choices influence school and residential segregation in America Choosing Homes Choosing Schools presents a breakthrough analysis of the new era of school choice and what it portends for American neighborhoods The distinguished contributors to Choosing Homes Choosing Schools investigate the complex relationship between education neighborhood social networks and larger patterns of inequality Paul Jargowsky reviews recent trends in segregation by race and class His analysis shows that segregation between blacks and whites has declined since 1970 but remains extremely high Moreover white families with children are less likely than childless whites to live in neighborhoods with more minority residents In her chapter

Annette Lareau draws on interviews with parents in three suburban neighborhoods to analyze school choice decisions. Surprisingly she finds that middle and upper class parents do not rely on active research such as school tours or test scores. Instead most simply trust advice from friends and other people in their network. Their decision making process was largely informal and passive. Eliot Weinginer complements this research when he draws from his data on urban parents. He finds that these families worry endlessly about the selection of a school and that parents of all backgrounds actively consider alternatives including charter schools. Middle and upper class parents relied more on federally mandated report cards, district websites and online forums while working class parents use network contacts to gain information on school quality. Little previous research has explored what role school concerns play in the preferences of white and minority parents for particular neighborhoods. Featuring innovative work from more than a dozen scholars, *Choosing Homes, Choosing Schools* adroitly addresses this gap and provides a firmer understanding of how Americans choose where to live and send their children to school.

Handbook of Education Policy Research Gary Sykes, Barbara Schneider, David N. Plank, 2012-09-10. Co published by Routledge for the American Educational Research Association. AERA Educational policy continues to be of major concern. Policy debates about economic growth and national competitiveness for example commonly focus on the importance of human capital and a highly educated workforce. Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive AERA sponsored Handbook. Organized into seven sections, the Handbook focuses on: 1. disciplinary foundations of educational policy, 2. methodological perspectives, 3. the policy process, 4. resources management and organization, 5. teaching and learning policy, 6. actors and institutions, and 7. education access and differentiation. Drawing from multiple disciplines, the Handbook's over one hundred authors address three central questions: What policy issues and questions have oriented current policy research? What research strategies and methods have proven most fruitful? And what issues, questions and methods will drive future policy research? Topics such as early childhood education, school choice, access to higher education, teacher accountability and testing and measurement cut across the 63 chapters in the volume. The politics surrounding these and other issues are objectively analyzed by authors and commentators. Each of the seven sections concludes with two commentaries by leading scholars in the field. The first considers the current state of policy design and the second addresses the current state of policy research. This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic government and think tank researchers engaged in policy research. Impact and Transformation of Education Policy in China Alexander W. Wiseman, Tiedan Huang, 2011-12-08 Examines the transformation of education policy in China with an emphasis on transformations in the post 1978 period This title also emphasises on policy change and its subsequent impact on different aspects of education at various levels of educational institutions particularly in areas of educational financing and curriculum reform **Courts and Kids** Michael A.

Rebell, 2009-11-15 Over the past thirty five years federal courts have dramatically retreated from actively promoting school desegregation In the meantime state courts have taken up the mantle of promoting the vision of educational equity originally articulated in Brown v Board of Education Courts and Kids is the first detailed analysis of why the state courts have taken on this active role and how successful their efforts have been Since 1973 litigants have challenged the constitutionality of education finance systems in forty five states on the grounds that they deprive many poor and minority students of adequate access to a sound education While the plaintiffs have won in the majority of these cases the decisions are often branded judicial activism a stigma that has reduced their impact To counter the charge Michael A Rebell persuasively defends the courts authority and responsibility to pursue the goal of educational equity He envisions their ideal role as supervisory and in Courts and Kids he offers innovative recommendations on how the courts can collaborate with the executive and legislative branches to create a truly democratic educational system *The State of Education Policy Research* Susan H.

Fuhrman, David K. Cohen, Fritz Mosher, 2020-11-25 The State of Education Policy Research is a comprehensive insightful evaluation of the strengths and weaknesses of education policy research in the U S today Editors Susan Fuhrman David Cohen and Fritz Mosher examine key issues facing policymakers and researchers including race education equity teacher quality early education privatization and the politics of education policy Collectively the chapters present a complex mosaic of education policy research that integrates the views of policy experts from education economics and related disciplines Important topics discussed in this influential new text include Politics of education Covers research on key political groups including teachers unions business roundtables parent and or religious advocates as well as state and federal lawmakers Race Discusses race as an issue as well as a non issue and includes a discussion of the testing gap State policies Provides an overview of state policies directed at improving teacher quality and discusses the reality of a teacher shortage National Trends Analyzes current trends toward centralization and standardization and the growing influence of federal and state mandates This book is appropriate for advanced courses in education administration politics and policy It will also appeal to policy researchers in education economics and political science to policy makers at the federal state and local levels and to the academic libraries serving them *Recent Advancements in Education Finance and Policy* Thomas Downes, Kieran M.

Killeen,2022-10-01 The past decade has seen a steady flow of important and innovative papers documenting the short and long term effects of finance reforms and the heterogeneity of the effects of reforms exemplified by papers like Jackson Johnson Persico 2016 Lafortune Rothstein Schanzenbach 2018 Hyman 2017 and Candelaria and Shores 2019 Those papers have reinvigorated research on the effects of finance reforms while raising important questions about how to best design a finance system and generate necessary revenues The papers mentioned above along with other papers too numerous to mention have taken advantage of better data and better methods to address long standing questions and generate provocative new answers Since the landscape has changed quickly policy makers and prospective researchers require a summary of the current state of the research on the effects of school finance reforms Answers are also needed to such questions as To what extent are lessons from the Great Recession applicable to the Covid 19 induced crisis For example how will states allocate cuts in grants and will those cuts undo state progress in equalizing educational access Are there strategies for allocating resources that best preserve student learning How do financing systems need to be modified to accommodate greater use of online education How should school finance systems be designed to provide equal access or at a minimum adequate access to students with special needs Why is there significant heterogeneity in the results of different finance reforms What have been the effects of recent state efforts to reduce the role of the property tax in financing K 12 education How should finance systems be designed to more effectively close persistent achievement gaps How if at all should states integrate the financing of preschool education with the financing of elementary and secondary education To help prepare the next generation of researchers and policy makers in the realm of school finance this volume includes papers that summarize the current state of research on the questions above as well as other pressing questions in education finance and policy The book aims to bridge a space between comprehensive textbooks and journal articles in the field of education finance and policy There are two main target audiences The book is meant to serve professionals like school district administrators and education policy practitioners that desire a contemporary update to their previous study of education finance and policy issues These audiences often have limited access to peer reviewed journals and knowledge of pertinent government and related policy reports in the field The book is also meant to serve students and faculty from programs in public administration public policy community development and applied economics education administration educational leadership and policy studies that are studying content related to education policy the economics of education state and local public finance and taxation Some upper level undergraduate students may also benefit from this resource Money, Mandates, and Local Control in American Public Education Bryan Shelly,2011-07-08 Pointing to the disparities between wealthy and impoverished school districts in areas where revenue depends primarily upon local taxes reformers repeatedly call for the centralization of school funding Their proposals meet resistance from citizens elected officials and school administrators who fear the loss of local autonomy Bryan Shelly finds however that local autonomy has already been

compromised by federal and state governments which exercise a tremendous amount of control over public education despite their small contribution to a school system's funding. This disproportionate relationship between funding and control allows state and federal officials to pass education policy yet excuses them from supplying adequate funding for new programs. The resulting unfunded and underfunded mandates and regulations Shelly insists are the true cause of the loss of community control over public education. Shelly outlines the effects of the most infamous of underfunded federal mandates, the No Child Left Behind Act of 2001 (NCLB), and explores why schools implemented it despite its unpopularity and out-of-pocket costs. Shelly's findings hold significant implications for school finance reform, NCLB, and the future of intergovernmental relations.

Good Governance in Asia Linda Chelan Li, 2016-03-22 The international aid community has advocated governance reforms as a necessary complement to economic aid to developing countries. The resultant Good Governance Agenda has been criticised for its ahistorical bias. The empirical case studies reported in this book further illustrate the limitations by showing the complex logics of governance reforms and their relations with development in the Asian context. The analysis highlights the importance of taking full notice of the Asian reform experiences in the ongoing reflection over the global institutional and development agenda. The message is not to deny the need for governance reforms or the utility of international learning and sharing of experiences. Global development will benefit however from a better understanding of the linkages between governance reforms and the diverse historical conditions they are embedded in, both developing or the advanced economies. This book was published as a special issue of *Journal of Contemporary Asia*.

Handbook of Education Politics and Policy Bruce S. Cooper, James G. Cibulka, Lance D. Fusarelli, 2008-06-30 Written by a mix of established and rising stars in school politics, policy, law, finance, and reform, this comprehensive Handbook provides a three-part framework that helps organize this relatively new and loosely organized field of study. A central theme running through the book is how to harness politics to school equity and improvement. Key features include Thematic Discussions, detailed discussions of key topics in educational politics organized by themes and competing perspectives. The overarching themes are: 1) the goals of the U.S. political system: justice, equity, opportunity, efficiency, and choice; 2) the means and resources for reaching these goals; and 3) the political behaviors and compromises that seek to mitigate ideological differences and conflicts of interest. Research Oriented: In addition to summarizing the latest research connected to key topics, each chapter exemplifies and reports on the methods and techniques for further exploration of these topics. Reform Oriented: Throughout the book, and especially in the summarizing chapter, authors provide suggestions for improving the political behaviors of key educational groups and individuals: unions, superintendents, politicians, school boards, teachers, and parents.

Encyclopedia of Education Economics and Finance Dominic J. Brewer, Lawrence O. Picus, 2014-08-25 Economics can be a lens for understanding the behavior of schools, districts, states, and nations in meeting education needs of their populations, as well as for understanding the individual decisions made by administrators, teachers, and students. Insights from economics help

decision makers at the state level understand how to raise and distribute funds for public schools in an equitable manner for both schools and taxpayers Economics also can assist researchers in analyzing effects of school spending and teacher compensation on student outcomes And economics can provide important insights into public debates on issues such as whether to offer vouchers for subsidizing student attendance at private schools This two volume encyclopedia contains over 300 entries by experts in the field that cover these issues and more Features This work of 2 volumes in both print and electronic formats contains 300 350 signed entries by significant figures in the field Entries conclude with cross references and suggestions for further readings to guide students to in depth resources Although organized in A to Z fashion a thematic Reader s Guide in the front matter groups related entries by topic Also in the front matter a chronology provides students with historical perspective on the development of education economics and finance as a field of study The entire work concludes with a Resources appendix and a comprehensive Index In the electronic version the index Reader s Guide and cross references combine to provide effective search and browse capabilities

The Rising State Bonnie C. Fusarelli, Bruce S. Cooper, 2009-02-02 State and national policymakers are increasingly important in shaping the nature scope and direction of education initiatives resulting in the erosion of local control The Rising State weaves together leading national experts perspectives that focus on equity comparative differences in state educational policies agenda setting and the nationalization of education policy The contributors provide policymakers teachers administrators parents and the general public with an opportunity and means to understand the success and failure of the growth of state power and centralization of control of education in the United States and offer forecasts for future developments

Schoolhouses, Courthouses, and Statehouses Eric A. Hanushek, Alfred A. Lindseth, 2020-10-06 Improving public schools through performance based funding Spurred by court rulings requiring states to increase public school funding the United States now spends more per student on K 12 education than almost any other country Yet

American students still achieve less than their foreign counterparts their performance has been flat for decades millions of them are failing and poor and minority students remain far behind their more advantaged peers In this book Eric Hanushek and Alfred Lindseth trace the history of reform efforts and conclude that the principal focus of both courts and legislatures on ever increasing funding has done little to improve student achievement Instead Hanushek and Lindseth propose a new approach a performance based system that directly links funding to success in raising student achievement This system would empower and motivate educators to make better more cost effective decisions about how to run their schools ultimately leading to improved student performance Hanushek and Lindseth have been important participants in the school funding debate for three decades Here they draw on their experience as well as the best available research and data to show why improving schools will require overhauling the way financing incentives and accountability work in public education
