Houghton Mifflin Literature Series Elizabeth Janeway, 1968 **Figurative Language and Thought** Albert N. Katz, Cristina Cacciari, Raymond W. Gibbs Jr., Mark Turner, 1998-09-10 Our understanding of the nature and processing of figurative language is central to several important issues in cognitive science including the relationship of language and thought how we process language and how we comprehend abstract meaning Over the past fifteen years traditional approaches to these issues have been challenged by experimental psychologists linguists and other cognitive scientists interested in the structures of the mind and the processes that operate on them In *Figurative Language and Thought* internationally recognized experts in the field of figurative language Albert Katz Mark Turner Raymond W Gibbs Jr and Cristina Cacciari provide a coherent and focused debate on the subject The book's authors discuss a variety of fundamental questions including What can figures of speech tell us about the structure of the conceptual system If and how should we distinguish the literal from the nonliteral in our theories of language and thought Are we primarily figurative thinkers and consequently figurative language users or the other way around Why do we prefer to speak metaphorically in everyday conversation when literal options may be available for use Is metaphor the only vehicle through which we can understand abstract concepts What role do cultural and social factors play in our comprehension of figurative language These and related questions are raised and argued in an integrative look at the role of nonliteral language in cognition This volume a part of Counterpoints series will be thought provoking reading for a wide range of cognitive psychologists linguists and philosophers *Houghton Mifflin English*, 1988 *Figurative Language* Dmitrij Dobrovol'skij, Elisabeth Piirainen, 2021-11-08 The book develops a Theory of the Figurative Lexicon Units of the figurative lexicon conventional figurative units CFUs for short differ from all other elements of the language in two points Firstly they are conventionalized That is they are elements of the mental lexicon in contrast to freely created figurative expressions Secondly they consist of two conceptual levels they can be interpreted at the level of their literal reading and at the level of their figurative meaning

which both can be activated simultaneously New insights into the Theory of Figurative Lexicon relate on the one hand to the metaphor theory Over time it became increasingly clear that the Conceptual Metaphor Theory in the sense of Lakoff can only partly explain the conventional figurativeness On the other hand it became clear that intertextuality plays a far greater role in the CFUs of Western cultures than previously assumed The book s main target audience will be linguists researchers in phraseology paremiology and metaphor and cultural studies The data and explanations of the idioms will provide a welcome textbook in courses on linguistics culture history phraseology research and phraseodidactics Mentor Texts Rose Cappelli,2023-10-10 In their first edition of Mentor Texts authors Lynne Dorfman and Rose Cappelli helped teachers across the country make the most of high quality children s literature in their writing instruction Mentor Texts Teaching Writing Through Children s Literature K 6 2nd Edition the authors continue to show teachers how to help students become confident accomplished writers by using literature as their foundation The second edition includes brand new Your Turn Lessons built around the gradual release of responsibility model offering suggestions for demonstrations and shared or guided writing Reflection is emphasized as a necessary component to understanding why mentor authors chose certain strategies literary devices sentence structures and words Dorfman and Cappelli offer new children s book titles in each chapter and in a carefully curated and annotated Treasure Chest At the end of each chapter a Think About It sTalk About It sWrite About It section invites reflection and conversation with colleagues The book is organized around the characteristics of good writing focus content organization style and conventions The authors write in a friendly and conversational style employing numerous anecdotes to help teachers visualize the process and offer strategies that can be immediately implemented in the classroom This practical resource demonstrates the power of learning to read like writers , **The Caught Image** Robert L. Gale,2012-06-01 Gale considers the imagery in all of the 135 novels and short stories of Henry James and presents what may well be the first extensive treatment of figurative language in the complete works of any novelist All of the images have been recorded but the author does not claim too much for his deductions concerning them Originally published in 1964 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value *Affective Computing and Sentiment Analysis* Khurshid Ahmad,2011-08-24 This volume maps the watershed areas between two holy grails of computer science the identification and interpretation of affect including sentiment and mood The expression of sentiment and mood involves the use of metaphors especially in emotive situations Affect computing is rooted in hermeneutics philosophy political science and sociology and is now a key area of research in computer science The 24 7 news sites and blogs facilitate the expression and shaping of opinion locally and globally Sentiment analysis based on text and data mining is being used in the looking at news and blogs for purposes as diverse as brand management film reviews financial

Whetter, 2022 New and fresh assessments of Malory's *Le Morte d'Arthur* The essays here are devoted to that seminal Arthurian work Sir Thomas Malory's *Le Morte d'Arthur* Developments of papers first given at the Malory at 550 Old and New conference they emphasise here the second part of its remit Accordingly several contributors focus new attention on Malory's style using his stock phrases metaphors characterization or manipulation of sources to argue for a deeper appreciation of his merits as an author If as others illustrate Malory is a much better artist than his twentieth century reputation allowed then there is a renewed need to reassess the vexed question of the possible originality of his *Tale of Sir Gareth of Orkeney* Similarly fresh approaches underlie those essays re-examining Malory's attitude to time and the sacred in *The Sankgreal* the manner in which the ghosts of Lot and his sons highlight potential failures in the Round Table Oath or the pleasures and pitfalls of Arthurian hospitality The remaining contributions argue for new approaches to Malory's narrative gaps Launcelot's status as a victim of sexual

violence and the importance of rejecting Victorian moral attitudes towards Gwenivere and Isode moralizing that still informs much recent scholarship addressing Malory's female characters Contributors Joyce Coleman Elizabeth Edwards Kristina Hildebrand Cathy Hume David F Johnson Megan Leitch Andrew Lynch Molly A Martin Cory James Rushton Fiona Tolhurst Michael W Twomey

Conceptual metaphor and embodied cognition in science learning Tamer Amin,Fredrik Jeppsson,Jesper Haglund,2018-10-03 Scientific concepts are abstract human constructions invented to make sense of complex natural phenomena Scientists use specialised languages diagrams and mathematical representations of various kinds to convey these abstract constructions This book uses the perspectives of embodied cognition and conceptual metaphor to explore how learners make sense of these concepts That is it is assumed that human cognition including scientific cognition is grounded in the body and in the material and social contexts in which it is embedded Understanding abstract concepts is therefore grounded via metaphor in knowledge derived from sensory and motor experiences arising from interaction with the physical world The volume consists of nine chapters that examine a number of intertwined themes how systematic metaphorical mappings are implicit in scientific language diagrams mathematical representations and the gestures used by scientists how scientific modelling relies fundamentally on metaphor and can be seen as a form of narrative cognition how implicit metaphors can be the sources of learner misconceptions how

conceptual change and the acquisition of scientific expertise involve learning to coordinate the use of multiple implicit metaphors and how effective instruction can build on recognising the embodied nature of scientific cognition and the role of metaphor in scientific thought and learning The volume also includes three extended commentaries from leading researchers in the fields of cognitive linguistics the learning sciences and science education in which they reflect on theoretical methodological and pedagogical issues raised in the book This book was originally published as a special issue of the International Journal of Science Education

Error in Shakespeare Alice Leonard, 2020-01-27 The traditional view of Shakespeare's mastery of the English language is alive and well today This is an effect of the eighteenth century canonisation of his works and subsequently Shakespeare has come to be perceived as the owner of the vernacular These entrenched attitudes prevent us from seeing the actual substance of the text and the various types of error that it contains and even constitute it This book argues that we need to attend to error to interpret Shakespeare's disputed material text political dramatic interventions and famous literariness The consequences of ignoring error are especially significant in the study of Shakespeare as he mobilises the rebellious marginal and digressive potential of error in the creation of literary drama
