Hourly Rounding Evidence Based Practice:

Impacting Patient Care Experiences: Hourly Rounding Michelle R Johnson Hernandez, 2015 Impacting Patient Care Experiences with Hourly Rounding My global aim consists of cultivating communication and staff responsiveness within a busy nursing unit in an urban setting within a San Francisco hospital thereby improving the patient's perception of staff responsiveness by reducing call lights and patient falls by 25% within three months The patient population consists of cardiovascular and thoracic post operative surgical patients of all ages primarily adults The implementation of the evidence based practice of hourly rounding has been proven to increase overall patient satisfaction by improving staff responsiveness and increasing patient safety within many hospitals The measurement of effectiveness and success will be evidenced by seeing an increase in patient care scores and a reduction of falls within the unit when these metrics are met there is data that proves that this evidence based practice will drive the results we are looking for In this microsystem there are many indicators that a more efficient workflow is necessary to be established There is the constant sound of call lights ringing about an estimated 12-15 in an eight hour shift for non urgent needs Upon interviewing many staff I found there was an inconsistent way and lack of education on how hourly rounds should be performed Basic patient needs were not addressed within each visit from a staff member By using a process map timeline PDSA Lewin's Change Theory SWOT analysis and graphs I can show you my process of improving staff responsiveness within the nursing unit In conclusion as a Clinical Nurse Leader and patient advocate I have utilized the information gained from the microsystem data and implementation of hourly rounding thereby proving how to improve quality safety and patient care experiences within the busy medical surgical nursing unit with the evidence based practice of hourly rounding

evident among the various offerings presented here the book nonetheless creates and sustains a narrative that is bigger or more substantial than the sum of individual parts And across contributions a self assuredly critical stance towards EBP as currently practiced conceptualized and taught coexists alongside respectful admiration for all who make it happen Exploring Evidence based Practice Debates and Challenges in Nursing should be considered essential reading for academics and postgraduate students with an interest in evidence based practice and nursing research *Implementing the Evidence-Based Practice (EBP) Competencies in Healthcare: A Practical Guide for Improving Quality, Safety, and Outcomes* Bernadette Mazurek Melnyk, PhD, RN, CPNP/PMHNP, FAANP, FNAP, FAAN, Lynn Gallagher-Ford, PhD, RN, DPFNAP, NE-BC, Ellen Fineout-Overholt, PhD, RN, FNAP, FAAN, 2016-06-09 Hospitals and healthcare systems around the world have attempted to build and sustain evidence based practice EBP cultures and environments yet they have struggled to clearly understand what EBP competency means Implementing the Evidence Based Practice EBP Competencies in Healthcare clears up that confusion and serves as a guide for clinicians leaders faculty EBP mentors and students in achieving EBP competency facilitating evidence based decision making in daily practice and accelerating the speed at which research knowledge is translated into real world settings to improve health outcomes and decrease healthcare costs Authors Bernadette Mazurek Melnyk Lynn Gallagher Ford and Ellen Fineout Overholt provide step by step explanations and case scenarios that illustrate realistic advice and ready to use resources to help organizations integrate EBP broadly and deeply across their infrastructure to improve patient care quality and safety Evidence-Based Practice: An Integrative Approach to Research, Administration, and Practice Heather R.
