Teaching that Matters Frank Thoms, 2014-11-07 Teaching that Matters invites principals and teachers to make changes that will allow all students to succeed Thoms urges administrators and teachers to reconsider traditional practices in light of today's media driven culture and digitally wired students While sensitive to the

challenges schools face Thoms is relentless in offering strategies to meet these challenges Rather than focus on improving test scores Teaching that Matters advocates that teachers teach to a child s whole symphony not only to one note If students only learn to succeed on bubble tests they will not have opportunities to discover their true potential Thoms sees the teaching process as a joint venture between teacher and student where the teacher brings learning to the student and at the same time brings the student to the learning This process demands at least as much listening as talking a new habit that teachers and principals need to learn By meeting innovative principals and teachers who engage students this book will help you to learn to change traditional classroom practices into exciting alternatives *Honors Education around the World*

Graeme Harper,2021-12-14 This volume is constructed around several significant questions relevant to every honors program and national perspective These questions are How do various nations view honors education How do ideas about honors achievements compare internationally Who defines honors education in each nation and how similar are those definitions from place to place and What do nations consider most significant when an undergraduate is said to graduate with honors The cross disciplinary intersecting epistemology of honors education stands out worldwide No matter whether it is known as honors honours or talent development honors education is associated with a student centric ethos of attainment setting and with comprehensive and often creative approaches to teaching and learning Today in our more globally connected world there is good reason to closely and critically consider how an exploration of honors education worldwide can empower both educators and students to match personal and communal aspirations with educational outcomes *Gifted or Just Plain Smart*

Audrey M. Quinlan,2023-04-14 The 2nd edition of Gifted or Just Plain Smart was revised to address the vast changes in the post COVID educational environment It is designed to be a useful guide for all who work with gifted school age children parents teachers principals and pre service teachers in university settings It covers gifted education from its origins and theories to the practical use of current technology at home or in the school It also addresses strategies to recognize and develop overlooked gifted students such as those who are twice exceptional those from diverse underserved populations and those with a variety of gender issues including students who identify with LGBTQ communities It is an updated practical how to manual with examples anecdotes real life comments and includes a guide to free resources
