Africa Atta's oeuvre has received the praise and respect of several noted African writers such as Buchi Emecheta Chimamanda Ngozi Adichie and Helon Habila. Atta's insights into the roles and treatment of women, neocolonial government structures, patriarchy, 21st century phenomena such as Nigerian e-mail phishing, and the role of geography and place in characters' lives make her works some of the most indelible offerings across contemporary African fiction. Nevertheless, there exists a relative dearth of critical analyses of her works. That Atta writes across the genres perhaps explains some of the lack of literary criticism of her works. This study will facilitate continued examination of Atta's writings and further dissemination of critique. In this premiere edited volume on the works of Sefi Atta, Collins has assembled contributors from around the globe who offer critical analysis on each of Atta's published novels and several of her short stories. The volume is divided into four sections with chapters grouped by thematic connections: Sisterhood, Womanhood, and Rites of Passage; The City; Dark Aspects of Atta's Works; and Atta's Literature in Application. The book examines Atta's treatment of these themes while referencing the proficiency of her writing and style. The collection includes an interview with Atta where she offers an insightful and progressive perspective on current language use by Africans. This book is the first aggregate of literary critique on selected works of Sefi Atta. This book is an important volume of literary criticism for all literature, world literature, and African literature collections. It is part of the Cambria African Studies Series headed by Toyin Falola, University of Texas at Austin, with Moses Ochonu, Vanderbilt University.

How the Color Line Bends Nina Yancy, 2022
In 2019, a group of Louisianans voted to create a new city in part of the Baton Rouge area. The effort drew attention not only because the decision would create a disproportionately White and wealthy city but also because it would leave the area's considerably poorer, majority Black school district behind. As this story suggests, local geography, politics, and prejudice are linked in American racial politics. This book explores the relationship between where White Americans live and their attitudes about race. In *How the Color Line Bends*, Nina M. Yancy shows that what White people think depends on where they live, but not as conventional wisdom might suggest, because they

are more likely to feel threatened where race is salient Rejecting this tendency to tacitly position White Americans as victims this book focuses on power agency and positionality in the study of prejudice and place Yancy looks at the White perspective through a number of racialized issues including education affirmative action and welfare spending in cities across the United States as well as a vivid case study of Baton Rouge Being explicit about Whites Americans racialized vantage point allows us to better appreciate the capacity of prejudice to ebb and flow in response to local conditions across a diverse nation Yancy also illustrates why the color line remains relevant if we appreciate the ability of that line to harden or soften but not necessarily break

Special Effects on the Screen Martin Lefebvre, Marc Furstenau, 2025-10-01 Since the very first days of cinema audiences have marveled at the special effects imagery presented on movie screens While long relegated to the margins of film studies special effects have recently become the object of a burgeoning field of scholarship With the emergence of a digital cinema and the development of computerized visual effects film theorists and historians have been reconsidering the traditional accounts of cinematic representation recognising the important role of special effects Understood as a constituent part of the cinema special effects are a major technical but also aesthetic component of filmmaking and an important part of the experience for the audience In this volume new directions are charted for the exploration of this indispensable aspect of the cinematic experience Each of the essays in this collection offers new insight into the theoretical and historical study of special effects The contributors address the many aspects of special effects from a variety of perspectives considering them as a conceptual problem recounting the history of specific special effects techniques and analysing notable effects films

The Truth Society Noelle Molé Liston,2020-11-15 Noelle Mol Liston s The Truth Society seeks to understand how a period of Italian political spectacle which regularly blurred fact and fiction has shaped how people understand truth mass mediated information scientific knowledge and forms of governance Liston scrutinizes Italy s late twentieth century political culture particularly the impact of the former prime minister and media mogul Silvio Berlusconi By doing so she examines how this truth bending political era made science logic and rationality into ideas that needed saving With the prevalence of fake news and our seeming lack of shared reality in the post truth world many people struggle to figure out where this new normal came from Liston argues that seemingly disparate events and practices that have unfolded in Italy are historical reactions to mediatized political forms and particular cultivated ways of knowing Politics then is always sutured to how knowledge is structured circulated and processed The Truth Society offers Italy as a case study for understanding the remaking of politics in an era of disinformation
