Coping with Population Challenges Louise Lassonde, 2014-04-23 Despite rapidly decreasing rates of population growth caused by reduced fertility in the majority of world regions demographers are predicting that the world's population will still double by the year 2050 The question is therefore no longer the traditional one of whether the planet can support so many people but how to provide a sustainable future for ten billion individuals Quantitative problems have become ethical ones *Coping with Population Challenges* addresses these issues in the context of international debate and agreements since the first World Population Plan of Action in 1974 to the 20 year Programme of Action adopted at the International Conference on Population and Development in Cairo in 1994 The author describes how the Programme of Action focalizes on women's issues reproductive choice and the notion of the individual However she identifies a number of important but neglected areas of the debate that the Programme failed to address and brings to light some of the inconsistencies that need to be resolved if the Programme is to be implemented The author also looks at the underlying ethical dimension of all choices relating to the population issue and suggests measures and machinery for giving effect to states commitments including reformulating problems and defining the appropriate economic framework for solutions The book is an excellent introduction for the non specialist to a very topical debate and a useful reference for researchers LOUISE LASSONDE is director of the Fondation du

Issues in EU and US Foreign Policy Münevver Cebeci, 2011-01-06 Issues in E U and U S Foreign Policy edited by M nevver Cebeci aims at analyzing the perceptions interests and policies of the EU and the US on various international issues It portrays their convergences and divergences and reflects on their interplay The book has a geographical focus rather than a thematic one however some themes such as weapons of mass destruction dual use technology transfer energy security and democratization are unavoidable within their respective geographical contexts For example the authors inquire into the case of Iran with a special focus on nuclear proliferation they investigate Russia with a significant emphasis on energy security Iraq is examined with a discussion on the withdrawal of occupation troops and finally the authors address the case of China with a debate on dual use technology transfer

Issues in European Union and U S Foreign Policy is composed of two parts The first involves an inventive theoretical framework for understanding EU and US foreign policy The analysis extends beyond traditional approaches that seek to explain US and EU foreign policy through various dichotomies such as soft power versus hard power without overlooking the significance of such dichotomies This section further discusses how European and American scholars approach transatlantic relations in different ways The second section covers an intensive comparative analysis of EU and US foreign policy on specific issue areas Some chapters also deal with the impact of their policy divergences and convergences on transatlantic relations and NATO Nevertheless the book aims to go beyond the parochial debates of burden sharing or division of labor in transatlantic relations It focuses on and actually proposes a broader framework of cooperation and coordination for the EU and the US
