The Failure of Competence-Based Education and the Demand for Bildung Luca Moretti, Alessia Marabini, 2025-07-24 This book contrasts two prominent models of education Competence Based Education CBE which is the dominant model in most school systems of the world and Bildung Oriented Education BOE once the basis of school systems of Northern Europe CBE interprets learning as the acquisition of clearly definable and allegedly measurable competences and it is supported by supranational organisations such as the OECD BOE characterises learning holistically aimed at the progressive articulation of a meaningful big picture in the student s mind Moretti and Marabini argue that in spite of its celebrated scientificity CBE is incoherent and unreliable and contributes to structural forms of oppression and injustice fosters social pathologies and fails to provide students with the kind of intellectual autonomy they need in our complex post industrial societies They defend BOE from objections made by critical theorists poststructuralists and postcolonial thinkers and argue that it is a coherent and flexible model of education that endows students with autonomy and responsibility and can help heal social pathologies The book builds analytical bridges and explores connections between philosophy of education and important issues currently debated in critical theory political philosophy and social epistemology
