A Nuclear Weapons-Free World? Nick Ritchie, 2012-10-29 President Obama and the UK Labour and Coalition governments have all backed the renewed momentum for serious progress towards a world free of nuclear weapons whilst the UK finds itself embarked on a controversial and expensive programme to renew its Trident nuclear weapons system. What does the UK process tell about the prospects for disarmament?

Human Rights Protection in Global Politics K. Mills, D. Karp, 2015-01-15 This edited book by Mills and Karp brings together political, legal and moral perspectives on the responsibilities of human rights protection in world politics today. It critiques a narrow focus on states' violations of human rights, incorporates non-state actors and looks beyond the Responsibility to Protect policy framework.

ICC Jurisprudence and the Development of International Humanitarian Law Martin Faix, Ondřej Svaček, 2024-03-28 This book explores how International Humanitarian Law (IHL) has been developed in the jurisprudence and practice of the International Criminal Court (ICC). A partial focus is given to the phenomenon of child soldiering which became symptomatic for the early practice of the ICC. The book provides readers with broad insight into the activity of the ICC. The first part contains chapters focused on the methodology of law finding before the ICC, i.e. identification, interpretation and application of the law. The authors address complex issues concerning the mutual relationship between treaty law, Article 8 of the ICC Statute and customary international humanitarian law and explore the relevance of IHL in the application and interpretation of Article 8 of the Rome Statute. The second part consists of chapters focused on substantive international criminal law. The authors address issues concerning contextual elements of war crimes, passive personal scope of IHL, denying judicial guarantees as a serious breach of IHL, forms of responsibility and circumstances precluding wrongfulness.

Understanding the Earth System Sarah E. Cornell, I. Colin Prentice, Joanna I. House, Catherine J. Downy, 2012-08-09 Explaining the what, the how and the why of climate science, this multidisciplinary new book provides a review of research from the last decade, illustrated with cutting edge data and observations. A key focus is the development of analysis tools that can be used to demonstrate options for mitigating and adapting to increasing climate risks. Emphasis is given to the importance of Earth system feedback mechanisms and the role of the biosphere. The book explains advances in modelling, process understanding and observations and the development of consistent and coherent studies of past, present and possible

Brooks,Ross Jones,2017-07-05 In 1970 Earth Day was first celebrated marking the dawn of worldwide environmental consciousness and the passing of many environmental laws In part these events were the result of the maturing of the science of ecology which recognized the interdependence of the web and cycles of nature This volume explores the relationship between ecology and

environmental law beginning with a description of the two very different disciplines This description is followed by a history of their episodic interactions the early period of origin the mid century formative period from 1950 to 1970 the initial serious period of interaction after Earth Day in 1970 and the testing of the relationship during the next two decades Utilizing a number of case studies examinations of the key linkage persons legal instruments and the migration of ecological concepts and frameworks this book analyzes the final flowering of an ecosystem regime which embraces the connections between the two disciplines of ecology and environmental law Concluding with an inventory of the problems posed by the relationship between the two disciplines and an agenda for future research this clearly structured comprehensive and stringent book is an essential resource for all serious scholars and students of ecology and environmental law

Political Economy of the Environment Simon Dietz,Jonathan Michie,Christine Oughton,2011-02-01 This book is the culmination of several years work by a group of academics policy makers and other professionals looking to understand how alternative economic thinking and indeed thinking from quite different social scientific disciplines could enhance the mainstream economic approach to environmental and natural resource problems Of the editors Dietz comes from the mainstream economics tradition while Michie and Oughton draw explicitly on institutional and evolutionary economics The various authors represent a range of disciplinary backgrounds and approaches This book draws on the strengths of each and all of these approaches to analyse environmental issues and what can be done to tackle these through corporate and public policy The book argues that the need for an inter disciplinary approach Two themes which emerge repeatedly throughout the book are the need for an interdisciplinary theory of technological change and the need for a similarly interdisciplinary approach to the study of human behaviour and how it influences both production and consumption choices The two themes are of course related Resolving environmental questions requires an understanding of their nature of their causes and to the extent that they are anthropogenic of how to change human behaviour These fundamental issues are the focus of the four chapters that form Part 1 of this volume The remainder of the volume develops them in more detail

Research Handbook on Global Climate Constitutionalism Jordi Jaria-Manzano,Susana Borràs,2019-12-27 Climate change is causing traditional political and legal concepts to be revisited The emergence of a global polity through physical economic and social interaction demands global responses which should be founded upon new principles and which cannot simply be modelled on traditional constitutionalism centred on the nation state This Research Handbook explores how to build this climate constitutionalism at a global level starting from the narrative of Anthropocene and its implications for law It provides a critical approach to global environmental constitutionalism analysing the problems of sustainability and global equity which are entwined with the causes and consequences of climate change The Handbook explores how to develop constitutional discourses and strategies to address these issues and thereby tackle the negative effects of climate change whilst also advancing a more sustainable equitable and responsible global society
