Governing China From Revolution Through Reform 2nd Edition:

Governing China Kenneth Lieberthal,1995 Looks at the history of Chinese government from the original imperial system to the current communist government and describes some of the challenges China faces in the future

Higher Education as a Field of Study in China Xin Wang,2010-03-18 Higher Education as a Field of Study in China Defining Knowledge and Curriculum Structure concerns the complexity of higher education as an academic field the evolving nature of the field in light of the overall development of higher education in China It reviews how higher education as a field of study has evolved in China since 1978 and how the field has been shaped by political and social forces as well as institutional culture Xin Wang argues that higher education is becoming an interdisciplinary field rather than a subfield under the discipline of education especially when higher education has become an enterprise with such a broad scope in China Wang also expresses a belief that the field of higher education is being challenged by the professional need for preparing and training competent professionals for various administrative positions in China Higher education as a field will be professionalized with its own knowledge base and a set of skills in applying this knowledge to practical areas This book also provides an account of the U S model of higher education as an example how the field was formed and developed how it has evolved from a generalized area of inquiry into a professional specialization how programs of higher education are structured what classes they offer and what challenges they face The U S model presents a comparative perspective for Chinese scholars and program directors about higher education as a field of study

[China Reconnects: Joining A Deep-rooted Past To A New World Order](#) Gungwu Wang,2019-07-02 The book is engaging informative and provocative and can profitably be read by undergraduates and professors alike You do not have to agree with the dean of China studies to learn from him China Review International The book shows how the Chinese are now confident of their capacity to learn all they need from the developed world and are keen to know which parts of the past they would need to build a modern Chinese civilization They are very conscious of the challenges coming from the United States and are looking for ways and means to respond to a superpower that wants to preserve its dominant position in the international status quo The book seeks to explain what China is doing and what its immediate and long term interests are It is not to defend or judge China It does not employ theoretical frameworks that are not appropriate for describing Chinese conditions It calls for understanding why history is particularly relevant to the Chinese state and most of its people That way we also see how the present and hopes for the future changes our perspectives of the past Related Link s

[Work Safety Regulation in China](#) Jie Gao,2022-03-31 Fatality quotas implemented in China s industrial section and local governments are being used to promote work safety and therefore reducing the number of work related deaths Given the controversial nature of this policy Gao analyzes how the fatality quotas are functioning to aid the country in balancing economic growth and social stability The book also examines significant implications caused of this policy s implementation in the local regions and reveals how local officials attempt to handle these

problems This is the first book to systematically examine the role of death indicators in work safety improvement in contemporary China revealing insight into Beijing's quota oriented approach to policy making **The Economic and Strategic Rise of China and India** D. Denoon,2007-09-03 This book demonstrates the connection between economic and strategic developments in Asia with several interrelated arguments The author asserts that there is no single explanation for the 1997 financial crisis in the Pacific Rim states nor for the slow recovery afterwards The author also points out that China is not the only major power rising in Asia India is close behind and warns that while many observers are proceeding as if current U S treaties will continue indefinitely Asia is already preparing for changing patrons Authoritarian Legality in China Mary E. Gallagher,2017-09-07 This book examines Chinese workers experiences and shows how disenchantment with the legal system drives workers from the courtroom to the streets **Chinese Politics** Daniel Lynch,Stanley Rosen,2024-04-18 Written by a team of leading China specialists this updated 2nd edition of Chinese Politics explores the dynamics of state power and politics in contemporary China focusing on the Xi Jinping era Through its multi disciplinary contributions this book explores the extent to which Xi has reshaped the political economic socio cultural and demographic terrains of the PRC as well as Beijing's foreign policy The book will help readers to think productively about the trajectory of these aspects of Chinese politics and society through Xi's current term and beyond The book also highlights the potential role outside countries and non state actors might play in shaping China's trajectory as the PRC's economic rise may be stalling Through each exploration of these issues the book addresses the central question of what The Xi Jinping Difference has been and will likely continue to be in Chinese politics Key subjects covered in this new edition include Law and the political system Socialization of youth The fate of the private sector Technology and digital authoritarianism The Belt and Road Initiative Population aging Chinese Politics continues to be an essential textbook for all students of contemporary China as well as scholars interested in the dynamics of political and social change China's International Behavior Evan S. Medeiros,2009-08-07 China is now a global actor of significant and growing importance It is involved in regions and on issues that were once only peripheral to its interests and it is effectively using tools previously unavailable China's international behavior is clearly altering the dynamics of the current international system but it is not transforming its structure China's global activism is continually changing and has so many dimensions that it immediately raises questions about China's current and future intentions This study provides a conceptual and empirical framework to assess these important trends It examines how China views its security environment how it defines its international objectives how it is pursuing them and the consequences for U S economic and security interests **Inside Out India and China** William Antholis,2014-09-30 One third of humanity is governed by two capitals New Delhi and Beijing Increasingly these two countries are being led not from the top down but rather from the Inside Out In 2014 India overwhelmingly elected Narendra Modi minister a man who rose to national prominence as chief minister of Gujarat India's fastest growing state Likewise in 2013 Xi Jinping took over as

president of China having served as top official in Zhejiang and Shanghai two of China's most prosperous provinces. Anticipating these trends and leadership transitions, William Antholis spent five months in 2012 traversing twenty Indian states and Chinese provinces conducting over three hundred interviews, including with Narendra Modi. Antholis's detailed narratives show what both Modi and Xi Jinping learned firsthand that local successes and failures will determine the future of the world's largest two nations. And his new foreword prepared for this edition lays out key takeaways from the transitions of 2013 and 2014.

Law and Legal Institutions of Asia E. Ann Black, Gary F. Bell, 2011-03-10. The study of Asia and its plural legal systems is of increasing significance both within and outside Asia. Lawyers, whether in Australia, America, or Europe, or working within an Asian jurisdiction, require a sound knowledge of how the law operates across this fast-growing and diverse region. Law and Legal Institutions of Asia is the first book to offer a comprehensive assessment of eleven key jurisdictions in Asia: China, Hong Kong, Taiwan, Japan, Korea, Vietnam, Malaysia, Indonesia, Brunei Darussalam, Singapore, and the Philippines. Written by academics and practitioners with particular expertise in their state or territory, each chapter uses a breakthrough approach, facilitating cross-jurisdictional comparisons and giving essential insights into how law functions in different ways across the region and in each of the individual jurisdictions.

Run of the Red Queen Dan Breznitz, Michael Murphree, 2011-01-01. This work closely examines the strengths and weaknesses of the Chinese economic system to discover where the nation may be headed and what the Chinese experience reveals about emerging market economies.
