Heavy Weather Avoidance And Route Design Concepts And Applications Of 500 Mb Charts:

Heavy Weather Avoidance and Route Design Mike Ma-Li Chen, Lee S. Chesneau, 2008-10 In *Heavy Weather Avoidance* Chen and Chesneau merge the seamanship of a master mariner and the forecast expertise of a senior meteorologist providing readers with double barrel exposure to what actually goes on in the atmosphere and on the sea's surface. Mariners and recreational sailors are more concerned about the implications of volatile weather rather than its fluid dynamics. From start to finish the authors have cut to the chase creating a readable text brimming with useful graphics. It's focused on the root cause of how and why bad weather develops and where it's likely to go. There's enough theory provided for a reader to get a feel for how air mass energy transfer works but just as the theoretical aspect takes on a mission of its own there's a shift to more practical self-forecasting and storm avoidance wisdom. Captain Ma Li Chen shares his well-tested routing strategy and describes how it factors in the use of the 500 Mb chart.

Voyaging Under Power, 4th Edition Robert P. Beebe, Denis Umstot, 2013-01-16 Originally published in 1975 *Voyaging Under Power* created a revolution in small boat cruising. Until then essentially all long distance cruising was done in sailboats because there simply were no production powerboats capable of crossing oceans. Author Robert Beebe's book showed for the first time how to cruise under power covering boat design, engine selection, outfitting and operations. The result was the birth of a new market served by a whole new industry of power cruiser designers, builders, equipment manufacturers and magazines.
