Heidegger And The Myth Of A Jewish World Conspiracy:

Heidegger and the Myth of a Jewish World Conspiracy Peter Trawny, 2015-12-29 In 2014 the first three volumes of Heidegger's Black Notebooks, the personal and philosophical notebooks that he kept during the war years, were published in Germany. These notebooks provide the first textual evidence of anti-Semitism in Heidegger's philosophy, not simply in passing remarks but as incorporated into his philosophical and political thinking itself. In *Heidegger and the Myth of a Jewish World Conspiracy*, Peter Trawny, the editor of those notebooks, offers the first evaluation of Heidegger's philosophical project in light of the Black Notebooks. While Heidegger's affiliation with National Socialism is well known, the anti-Semitic dimension of that engagement could not be fully told until now. Trawny traces Heidegger's development of a grand narrative of the history of Being, the being-historical thinking at the center of Heidegger's work after *Being and Time*. Two of the protagonists of this narrative are well known to Heidegger's readers: the Greeks and the Germans. The world-historical antagonist of this narrative, however, has remained hitherto undisclosed: the Jews, or more specifically, world Judaism. As Trawny shows, world Judaism emerges as a racialized, destructive, and technological threat to the German homeland, indeed to any homeland whatsoever. Trawny pinpoints recurrent anti-Semitic themes in the Notebooks, including Heidegger's adoption of crude cultural stereotypes, his assigning of racial reasons to philosophical decisions, even undermining his Jewish teacher Edmund Husserl, his endorsement of a Jewish world conspiracy, and his first published remarks on the extermination camps and gas chambers under the troubling aegis of a Jewish self-annihilation. Trawny concludes with a thoughtful meditation on how Heidegger's achievements might still be valued despite these horrifying facets. Unflinching and systematic, this is one of the most important assessments of one of the most important philosophers in our history.

Heidegger and the Jews Donatella Di Cesare, 2018-08-23 Philosophers have long struggled to reconcile Martin Heidegger's involvement in Nazism with his status as one of the greatest thinkers of the twentieth century. The recent publication of his Black Notebooks has reignited a fierce debate on the subject. These thousand-odd pages of jotted observations profoundly challenge our image of the quiet philosopher's exile in the Black Forest, revealing the shocking extent of his anti-Semitism for the first time. For much of the philosophical community, the Black Notebooks have been either used to discredit Heidegger or seen as a bibliographical detail irrelevant to his thought. Yet in this new book, renowned philosopher Donatella Di Cesare argues that Heidegger's metaphysical anti-Semitism was a central part of his philosophical project. Within the context of the Nuremberg race laws, Heidegger felt compelled to define Jewishness and its relationship to his concept of Being. Di Cesare shows that Heidegger saw the Jews as the agents of a modernity that had disfigured the spirit of the West. In a deeply disturbing extrapolation, he presented the Holocaust as both a means for the purification of Being and the Jews' own self-destruction, a process of death on an industrialized scale that was the logical conclusion of the acceleration in technology they themselves had brought about. Situating Heidegger's anti-Semitism firmly within the context of his thought, this groundbreaking work will be essential

reading for students and scholars of philosophy and history as well as the many readers interested in Heidegger's life work and legacy

Heidegger and Jewish Thought Elad Lapidot, Micha Brumlik, 2017-11-15 Once a prophet of critical other thought Heidegger has now for many become the epitome of the unthinkable in the light of the Black Notebooks controversy. The unthinkable here is anti-Semitism. The encounter between Heidegger and the Jews has thus come to signify very much in the spirit of Heidegger's own anti-Judaism: the end of thought. The present volume resists this view by positing not only Heidegger but also the Jewish people as representing thought. The encounter between Heidegger and various traditions of Jewish thought is conceived here as a conversation *inter alia* an exchange between real or perceived others: others to the philosophical tradition, to mainstream modernity, to Western Christian metaphysics, to each other, and even to themselves. The conversation takes shape in this volume as a symposium of seventeen essays by leading scholars both of Heidegger's philosophy and of Jewish Studies.

Heidegger and His Jewish Reception Daniel M. Herskowitz, 2020-10-08 In this book Daniel Herskowitz examines the rich, intense, and persistent Jewish engagement with one of the most important and controversial modern philosophers, Martin Heidegger. Contextualizing this encounter within wider intellectual, cultural, and political contexts, he outlines the main patterns and the diverse Jewish responses to Heidegger. Herskowitz shows that through a dialectic of attraction and repulsion, Jewish thinkers developed a version of Jewishness that sought to offer the way out of the overall crisis plaguing their world, which was embodied as they saw it in Heidegger's life and thought. Neither turning a blind eye to Heidegger's anti-Semitism nor using it as an excuse for ignoring his philosophy, they wrestled with his existential analytic and what they took to be its religious, ethical, and political failings. Ironically, Heidegger's thought proved itself to be fertile ground for re-conceptualizing what it means to be Jewish in the modern world.

Martin Heidegger and the Truth About the Black Notebooks Friedrich-Wilhelm von Herrmann, Francesco Alfieri, 2022-01-01 Toward the beginning of 2013 I received reports of passages in the Black Notebooks that offered observations on Jewry or, as the case may be, world Jewry. It immediately became clear to me that the publication of the Black Notebooks would call forth a wide-spread international debate. Already in the Spring of 2013 I had asked Professor Friedrich Wilhelm von Herrmann, last private assistant and in the words of my grandfather, the chief co-worker of the complete edition, if he might review the Notebooks as a whole based on his profound insight into the thought of Martin Heidegger and, in particular, review those Jewish-related passages that were the focus of the public eye. Publications about the Black Notebooks quickly came to propagate catchy expressions such as being historical anti-Semitism and metaphysical anti-Semitism. The first question that obviously arises is: Does the thought of Martin Heidegger exhibit any kind of anti-Semitism at all? In this book Professor von Herrmann now advances his hermeneutic explication. With Professor Francesco Alfieri of the Pontificia Universit  Lateranense, he has found a colleague who has drawn up a comprehensive philological analysis of volumes GA 94 through GA 97 of the Complete Edition. The fact that Heidegger designated the hitherto published black notebooks as *Ponderings* (*berlegungen*) and as *Observations*

Anmerkungen has been given little consideration He intentionally placed them at the conclusion of the Complete Edition because without acquaintance with the lectures and above all with the being historical treatises that would come to be published in the framework of the Complete Edition they would not be comprehensible Arnulf Heidegger Jews Out of the Question Elad Lapidot,2020-11-01 In post Holocaust philosophy anti Semitism has come to be seen as a paradigmatic political and ideological evil Jews Out of the Question examines the role that opposition to anti Semitism has played in shaping contemporary political philosophy Elad Lapidot argues that post Holocaust philosophy identifies the fundamental epistemological evil of anti Semitic thought not in thinking against Jews but in thinking of Jews In other words what philosophy denounces as anti Semitic is the figure of the Jew in thought Lapidot reveals how paradoxically opposition to anti Semitism has generated a rejection of Jewish thought in post Holocaust philosophy Through critical readings of political philosophers such as Adorno Horkheimer Sartre Arendt Badiou and Nancy the book contends that by rejecting Jewish thought the opposition to anti Semitism comes dangerously close to anti Semitism itself and at work in this rejection is a problematic understanding of the relations between politics and thought a troubling political epistemology Lapidot's critique of this political epistemology is the book's ultimate aim Tsimtsum and Modernity Agata Bielik-Robson, Daniel H. Weiss,2020-12-07 This volume is the first ever collection of essays devoted to the Lurianic concept of tsimtsum It contains eighteen studies in philosophy theology and intellectual history which demonstrate the historical development of this notion and its evolving meaning from the Hebrew Bible and the classical midrashic collections through Kabbalah Isaac Luria himself and his disciples up to modernity ranging from Spinoza B hme Leibniz Newton Schelling and Hegel to Scholem Rosenzweig Heidegger Benjamin Adorno Horkheimer Levinas Jonas Moltmann and Derrida **Mood** Birgit Breidenbach, Thomas Docherty,2019-04-10 Mood is a phenomenon whose study is inherently interdisciplinary While it has remained resistant to theorisation it nonetheless has a substantial influence on art politics and society Since its practical omnipresence in every day life renders it one of the most significant aspects of affect studies it has garnered an increasing amount of critical attention in a number of disciplines across the humanities sciences and social sciences in the past two decades Mood Interdisciplinary Perspectives New Theories provides a comprehensive theoretical and empirical exploration of the phenomenon of mood from an interdisciplinary angle Building on cutting edge research in this emerging field and bringing together established and new voices it bridges the existing disciplinary gap in the study of mood and further consolidates this phenomenon as a crucial concept in disciplinary and interdisciplinary study By combining perspectives and concepts from the literary studies philosophy musicology the social sciences artistic practice and psychology the volume does the complexity and richness of mood related phenomena justice and benefits from the latent connections and synergies in different disciplinary approaches to the study of mood **Heidegger's Entscheidung** Norman K. Swazo,2020-04-08 This book critically examines the debate on Martin Heidegger's concept of Entscheidung decision and his engagement and

confrontation with Nazism in terms of his broader philosophical thought It argues that one cannot explain Heidegger's actions without accounting for his idea of decision and its connection to his understanding of individual fate and national and European destiny The book looks at the relation of biography to philosophy and the ethical and political implications of appropriating Heidegger's thinking in these domains of inquiry It highlights themes such as Heidegger's differences with the neo Kantians in Germany Heidegger on Kant and practical reason and his reading of Nietzsche and Hegel It offers a philosophical assessment grounded in Heidegger's own texts with reference to historical and other philosophical commentaries on the rise of National Socialism in post Weimar Germany and the philosophical issues associated with the interpretation of Nazi genocide and ideology An important intervention in Western philosophy this book will be of great interest to scholars and researchers of political philosophy continental philosophy German philosophy philosophy in general and political studies

Being at Large Santiago Zabala, 2020-04-16 Politicians and philosophers presenting themselves as the ultimate bearers of truth and reality have created unprecedented technological cultural and political framings This new order conspires to undermine the interpretive practices of open ended critique normalizing a sense of threat to preserve control The greatest emergency has become the absence of emergencies Tracing an intellectual alliance between academics such as Jordan Peterson and Christina Hoff Sommers and right wing populist politicians such as Donald Trump and Marine Le Pen this book denounces framings that make a claim to objectivity With the help of contemporary thinkers including Bruno Latour Judith Butler and Giorgio Agamben as well as discussion of the Cambridge Analytica whistleblower Christopher Wylie and the emergency of biodiversity loss due to climate change Santiago Zabala illustrates that the twenty first century question is not whether we can be free but how to be at large unconstrained by the new realist order Being at Large demonstrates the anarchic power of hermeneutics calling for interpretive disruptions of the authoritarian narrative as a way of reclaiming freedom in the age of alternative facts

Probing the Limits of Categorization Christina Morina, Krijn Thijs, 2018-11-29 Of the three categories that Raul Hilberg developed in his analysis of the Holocaust perpetrators victims and bystanders it is the last that is the broadest and most difficult to pinpoint Described by Hilberg as those who were once a part of this history bystanders present unique challenges for those seeking to understand the decisions attitudes and self understanding of historical actors who were neither obviously the instigators nor the targets of Nazi crimes Combining historiographical conceptual and empirical perspectives on the bystander the case studies in this book provide powerful insights into the complex social processes that accompany state sponsored genocidal violence

Philosophical Approaches to Cormac McCarthy Christopher Eagle, 2017-03-27 This book is the first edited collection to explore the role of philosophy in the works of Cormac McCarthy significantly expanding the scope of philosophical inquiry into McCarthy's writings There is a strong and growing interest amongst philosophers in the relevance of McCarthy's writings to key debates in contemporary philosophy for example debates on trauma and violence on the relationship between language and world

and the place of the subject within history temporality and borders To this end the contributors to this collection focus on how McCarthy's writings speak to various philosophical themes including violence war nature history materiality and the environment Emphasizing the form of McCarthy's texts the chapters attend to the myriad ways in which his language effects a philosophy of its own beyond the thematic content of his narratives Bringing together scholars in contemporary philosophy and McCarthy Studies and informed by the release of the Cormac McCarthy Papers the volume reflects on the theoretical relationship between philosophical thinking and literary form This book will appeal to all scholars working in the rapidly growing field of McCarthy Studies Philosophy and Literature and to philosophers working on a wide range of problems in ethics aesthetics epistemology Philosophy of Nature and Philosophy of Film across ancient modern and contemporary philosophy

Heidegger's Black Notebooks Andrew J. Mitchell, Peter Trawny, 2017-09-05 From the 1930s through the 1970s the philosopher Martin Heidegger kept a running series of private writings the so called Black Notebooks The recent publication of the Black Notebooks volumes from the war years have sparked international controversy While Heidegger's engagement with National Socialism was well known the Black Notebooks showed for the first time that this anti-Semitism was not merely a personal resentment They contain not just anti-Semitic remarks they show Heidegger incorporating basic tropes of anti-Semitism into his philosophical thinking In them Heidegger tried to assign a philosophical significance to anti-Semitism with the Jew or world Judaism cast as antagonist in his project How then are we to engage with a philosophy that no matter how significant seems contaminated by anti-Semitism This book brings together an international group of scholars from a variety of disciplines to discuss the ramifications of the Black Notebooks for philosophy and the humanities at large Bettina Bergo Robert Bernasconi Martin Gessmann Sander Gilman Peter E Gordon Hans Ulrich Gumbrecht Michael Marder Eduardo Mendieta Richard Polt Tom Rockmore Peter Trawny and Slavoj Žižek discuss issues including anti-Semitism in the Black Notebooks and Heidegger's thought more broadly such as German conceptions of Jews and Judaism Heidegger's notions of metaphysics and anti-Semitism's entanglement with Heidegger's views on modernity and technology grappling with material as provocative as it is deplorable In contrast to both those who seek to exonerate Heidegger and those who simply condemn him and rather than an all or nothing view of Heidegger's anti-Semitism they urge careful reading and rereading of his work to turn Heideggerian thought against itself These measured and thoughtful responses to one of the major scandals in the history of philosophy unflinchingly take up the tangled and contested legacy of Heideggerian thought

Jacques Derrida and the Challenge of History Sean Gaston, 2018-11-23 This important new book argues that Jacques Derrida's work can be treated as the basis for a distinctive historiography The possibility of seeing Derrida not as a philosopher of language but as a philosopher of history has become more apparent with the recent publication of Derrida's 1964-1965 seminar *Heidegger: The Question of Being and History* We now know that the problem of history was at the heart of Derrida's writing in the mid 1960s prior to the publication of his best known work *Of Grammatology* 1967 Arguing that

Derrida's scholarship in the 1960s and early 1970s on historicism, historicity and the problem of history can be treated as the basis for a philosophy of history. Sean Gaston focuses on Derrida's work from the mid 1970s to the mid 1990s and his relentless questioning of context, memory and narrative as the delineation of a deconstructive historiography. The book raises a challenge for historians to think about both deconstruction and historiography, arguing that contemporary philosophy can provide a basis for thinking about history in the name of a deconstructive historiography that is not incompatible with rigorous historical scholarship.

Continental Perspectives on Community Chantal Bax, Gert-Jan van der Heiden, 2019-10-02

This volume explores the issues at the center of many historical and contemporary reflections on community and sociality in Continental philosophy. The essays reflect on the thought of Nietzsche, Heidegger, Levinas, Arendt, Derrida, Badiou, Fanon, Baldwin, Nancy, Agamben and Laruelle. *Continental Perspectives on Community* brings the different approaches of these thinkers into conversation with each other. It discusses the possibility of how the concept of community can extend beyond the one and beyond any sense of unity and totality. Additionally, the book shows how the notion of community in plurality is at the heart of ethical and political reflections on alterity and race, of political philosophical reflections on the exception and of ontological reflections on what it means for humans to be social. In this way, it offers an important contribution to the examination of how a community can be thought today. This book will be of interest to scholars and advanced students working on social, political and cultural issues in Continental philosophy.

Sound and Affect Judith Lochhead, Eduardo Mendieta, Stephen Decatur Smith, 2021-04-23

There is no place on earth that does not echo with the near or distant sounds of human activity. More than half of humanity lives in cities, meaning the daily soundtrack of our lives is filled with sound, whether it be sonorous, harmonious, melodic, syncopated, discordant, cacophonous or even screeching. This new anthology aims to explore how humans are placed in certain affective attitudes and dispositions by the music sounds and noises that envelop us. *Sound and Affect* maps a new territory for inquiry at the intersection of music philosophy, affect theory and sound studies. The essays in this volume consider objects and experiences marked by the correlation of sound and affect in music and beyond the voice as it speaks, stutters, cries or sings music, whether vocal, instrumental or machine-made, and our sonic environments, whether natural or artificial, and how they provoke responses in us. Far from being stable, correlations of sound and affect are influenced and even determined by factors as diverse as race, class, gender and social and political experience. Examining these factors is key to the project, which gathers contributions from a cross-disciplinary roster of scholars, including both established and new voices. This agenda-setting collection will prove indispensable to anyone interested in innovative approaches to the study of sound and its many intersections with affect and the emotions.

Speaking the Truth in Love: The Catechism and the New Evangelization Petroc Willey, Scott R. Sollom, 2020-01-08

It is now just over twenty-five years since the publication of the Catechism of the Catholic Church. It is also more than thirty-five years since St John Paul II called for a new evangelization to be characterized by a new ardor, a new expression and new methods. The

conviction common to the contributors in this volume is that the Catechism flows from just such an ardor Speaking the Truth in Love draws together a group of Catholic scholars and field practitioners to focus on the capacity of the Catechism to be a powerful point for the renewal of Christian catechesis education and culture through its reclamation of the Christian heritage its explanatory power and its compelling articulation of a civilization characterized by faith hope and love A special focus of the book is how the Catechism provides a creative reference point for pedagogical renewal in the Church Since the publication of the Catechism of the Catholic Church in 1992 catechists and pastors of souls have discovered how it has served as a great instrument of the New Evangelization We have awaited this volume as a mature reflection on its vital place in the hope expressed by St John Paul II for a springtime of New Evangelization In these pages you will find testimony on how through the Catechism this springtime is already taking shape Most Rev Mark Davies Bishop of Shrewsbury Province of Birmingham England

Theology and Contemporary Continental Philosophy Colby Dickinson, 2018-12-31 This book aims to put modern continental philosophy specifically the sub fields of phenomenology existentialism hermeneutics deconstruction critical theory and genealogy into conversation with the field of contemporary theology Colby Dickinson demonstrates the way in which negative dialectics or the negation of negation may help us to grasp the thin or non existent borders between continental philosophy and theology as the leading thinkers of both fields wrestle with their entrance into a new era With the declining place of the sacred in the public sphere we need to pay more attention than ever to how continental philosophy seems to be returning to distinctly theological roots Through a genealogical mapping of 20th century continental philosophers Dickinson highlights the ever present Judeo Christian roots of modern Western philosophical thought Opposing categories such as immanence transcendence finitude infinitude universal particular subject object are at the center of works by thinkers such as Agamben Marion Vattimo Levinas Latour Caputo and Adorno This book argues that utilizing a negative dialectic allows us to move beyond the apparent fixation with dichotomies present within those fields and begin to perform both philosophy and theology anew

The Ruse of Techne Dimitris Vardoulakis, 2024-09-03 The Ruse of Techne offers a reappraisal of Heidegger s entire work by focusing on the forms of activity he regards as separate from instrumentality Non instrumental activities like authenticity poetry and thinking in short the ineffectual are critical for Heidegger as they offer the only path to the truth of being throughout his work By unearthing the source of the conception of non instrumental action in Heidegger s reading of Aristotle Vardoulakis elaborates how it forms part of Heidegger s response to an old problem namely how to account for difference after positing a single and unified being that is not amenable to change He further demonstrates that an action without ends and effects leads to an ethics and politics rife with difficulties and contradictions that only become starker when compared to other responses to the same problem that we find in the philosophical tradition and which rely on instrumentality Heidegger s conception of an action without ends or effect forgets the role of instrumentality in the tradition that posits a single unified being And yet the ineffectual has had a profound

influence in how continental philosophy determines the ethical and the political since World War II The critique of the ineffectual in Heidegger is thus effectively a critique of the conception of praxis in continental philosophy Vardoulakis proposes that it is urgent to undo the forgetting of instrumentality if we are to conceive of a democratic politics and an ethics fit to respond to the challenges of high capitalism

The Religion of Existence Noreen Khawaja, 2016-12-02 Keen insight reveals existentialism as one more chapter in Christianity's history Journal of the American Academy of Religion The Religion of Existence reopens an old debate on an important question What was existentialism At the heart of existentialism Noreen Khawaja argues is a story about secular thought experimenting with the traditions of European Christianity This book explores how a distinctly Protestant asceticism formed the basis for the chief existentialist ideal personal authenticity which is reflected in approaches ranging from Kierkegaard's religious theory of the self to Heidegger's phenomenology of everyday life to Sartre's global mission of atheistic humanism Through these three philosophers she argues we observe how ascetic norms have shaped one of the twentieth century's most powerful ways of thinking about identity and difference the idea that the true self is not simply given but something that each of us is responsible for producing Engaging with many central figures in modern European thought this book is of value to philosophers and historians of European philosophy scholars of modern Christianity and those working on problems at the intersection of religion and modernity
