

Why *pressure* fry?

Convenience

Pressure frying takes less time than conventional deep fat frying, so you can serve more orders more quickly. Henny Penny offers computer-controlled pressure frying that lets you cook up to ten menu items at the touch of a button.

Economy

Lower frying temperatures mean pressure frying uses less energy. Shortening lasts longer, too. With easy operation, more orders cooked in less time and less cleanup involved, pressure frying gives you tremendous productivity with lower labor, shortening and energy costs.

Taste

Pressure Frying seals in the food's natural juices, nutrients and flavors, making anything you cook more tender and flavorful. And you can cook just about anything in Henny Penny pressure fryers... chicken, chops, seafood, vegetables—even ribs and steaks!

How it works:

1. Thermostat-controlled heating elements (A) are located around the perimeter of the fry pot, above the bottom level.
2. Fresh or frozen food is placed in fry basket and lowered into preheated shortening. Fryer lid is closed and latched (B), and spindle is locked down (C), forming a secure, airtight seal.
3. A small amount of moisture from food is released immediately, building pressure in closed steam zone (D) to 12 psi.
4. A pressurized cooking environment (E) prevents further moisture from being released, sealing in food's natural juices and locking shortening out. Pressure increases turbulence at lower temperatures for faster, energy efficient cooking.
5. Rectangular fry pot (F) promotes random turbulence and tumbling action, resulting in more even cooking.
6. "Cold" zone (G) below heating source allows cracklings to accumulate without scorching.
7. When filtration cycle is activated, used shortening drains through a disposable filter envelope in the built-in filtration system (H). Switch-activated pump returns hot filtered shortening to fry pot for immediate use.
