How Homo Became Sapiens On The Evolution Of Thinking:

How Homo Became Sapiens Peter Gardenfors, 2003 In this work Peter Gardenfors embarks on an evolutionary detective story to try and solve one of the big mysteries surrounding human existence how has the modern human being's way of thinking come into existence He starts by taking in turn the more basic cognitive processes such as attention and memory then builds upon these to explore more complex behaviours such as self consciousness mind reading and imitation

How Homo Became Sapiens Peter Gärdenfors, 2003 Our ability to think is really one of our most puzzling characteristics What it would be like to be unable to think What would it be like to lack self awareness The complexity of this activity is striking Thinking involves the interaction of a range of mental processes attention emotion memory planning self consciousness free will and language So where did these processes arise What evolutionary advantages were bestowed upon those with an ability to deceive to plan to empathize or to understand the intention of others In this compelling new work Peter Gardenfors embarks on an evolutionary detective story to try and solve one of the big mysteries surrounding human existence how has the modern human being's way of thinking come into existence He starts by taking in turn the more basic cognitive processes such as attention and memory then builds upon these to explore more complex behaviors such as self consciousness mindreading and imitation Having done this he examines the consequences of putting thought into the world i e using external media like cave paintings drawings and writing Immensely readable and humorous the book will be valuable for students in psychology and biology and accessible to readers of popular science

Evolutionary Processes in the Natural History of Religion Hansjörg Hemminger, 2021-09-22 The study of religion by the humanities and social sciences has become receptive for an evolutionary perspective Some proposals model the evolution of religion in Darwinian terms or construct a synergy between biological and non Darwinian processes The results however have not yet become truly interdisciplinary The biological theory of evolution in form of the Extended Evolutionary Synthesis EES is only sparsely represented in theories published so far by scholars of religion Therefore this book reverses the line of view and asks how their results assort with evolutionary biology How can the subject area religion integrated into behavioral biology How is theory building affected by the asymmetry between the scarce empirical knowledge of prehistoric religion and the body of knowledge about extant and historic religions How does hominin evolution in general relate to the evolution of religion Are there evolutionary pre adaptations Subsequent versions of evolutionary biology from the original Darwinism to EES are used in interdisciplinary constructs Can they be integrated into a comprehensive theory The biological concept most often used is co evolution in form of a gene culture co evolution However the term denotes a process different from biological co evolution Important EES concepts do not appear in present models of religious evolution e g neutral evolution evolutionary drift evolutionary constraints etc How to include them into an interdisciplinary approach Does the cognitive science of religion CSR harmonize with behavioral biology and the brain sciences Religion as part of human culture is supported by a complex

multi level behavioral system How can it be modeled scientifically The book addresses graduate students and researchers concerned about the scientific study of religion and biologist interested in interdisciplinary theory building in the field

Cosmopolitanism and the Evils of the World Michael H. DeArmey,2020-05-28 This book analyses five forms of transnational evils and offers cosmopolitan recommendations for reducing their occurrence With civilisation in crisis it is crucial now more than ever to attempt to mitigate the catastrophes that face us in the decades to come In a compelling and frightening account of transnational evil DeArmey identifies and explores in depth the dark side of human behaviour from genocide slavery torture and terrorism to the greatest disaster of our time the worldwide destruction of the earth s biosphere Building on Kant s theory of a new world organisation designed to eliminate the evil of war and strengthen the world community DeArmey develops a biotic and value based theory of dignity reconstructing a cosmopolitan world order that supports the Kantian theories of respect care and hospitality Cosmopolitan changes to the United Nations are proposed including a bicameral assembly and crucially an environmental council with legal powers In each chapter cosmopolitan recommendations are made that will reduce the occurrence of the transnational evil in question it is through these recommendations that the dignity and world citizenship of humanity can be protected and strengthened Without them we are headed towards the collapse of civilisation and mass extinction in the biosphere Experience and Beyond Jan

Faye,2016-09-30 This book presents a persuasive argument in favour of evolutionary naturalism and outlines what such a stance means for our capacity of observation and understanding reality The author discusses how our capacity of knowledge is adapted to handle sensory information about the environment in the light of Charles Darwin s theory of evolution The implication of this is that much of our thinking in science and philosophy that goes beyond our immediate experience rests on abstractions and hypostatization This book rejects the possibility of having any knowledge of reality as it is in itself while not denying that our capacity of conceptual abstractions is of great benefit for our survival *Cave Art, Perception and Knowledge* M. Rosengren,2012-10-29 Using the example of prehistoric paintings discovered in the late 19th century in Spain and France Cave Art Perception and Knowledge inquires into epistemic questions related to images depicting and perception that this rich material has given rise to The book traces the outline of the doxa of cave art studies *The Challenges of Born-Digital Fiction* Dene Grigar,Mariusz Pisarski,2024-03-13 The Challenges of Born Digital Fiction Editions Translations and Emulations addresses the growing concern about how best to maintain and extend the accessibility of early interactive novels and hypertext fiction or narratives These forms of born digital literature were produced before or shortly after the mainstreaming of the World Wide Web with proprietary software and on formats now obsolete Preserving and extending them for a broad study by scholars of book culture literary studies and digital culture necessitate they are migrated translated and emulated yet these activities can impact the integrity of the reader experience Thus this Element centers on three key challenges facing such efforts 1 precision of references identifying correct editions and versions of migrated works

in scholarship 2 enhanced media translation approaching translation informed by the changing media context in a collaborative environment and 3 media integrity relying on emulation as the prime mode for long term preservation of born digital novels

The Benefit of Broad Horizons, 2010-10-25 More than perhaps anybody else in the world the Swedish political scientist and sociologist Björn Wittrock has contributed both on the intellectual and institutional level to making a truly global social science possible This volume contains contributions from twenty six world renowned scholars who address different aspects of his ambitious research program as well as current trends in the institutionalization of the social and human sciences The essays in this volume focus on such topics as the role of the state the reintegration of history and the social sciences the importance of civilizational studies and the comparison of civilizations the interaction of cultural and social dynamics the analysis of trends in higher education and the institutionalization of social scientific research

Rethinking Stevin, Stevin Rethinking, 2020-10-20 This book studies the Dutch mathematician Simon Stevin 1548 1620 as a new type of man of knowledge Traditionally Stevin is best known for his contributions to the Archimedean turn This innovative volume moves beyond this conventional image by bringing many other aspects of his work into view by analysing the connections between the multiple strands of his thinking and by situating him in a broader European context Like other multi talents polymaths in his time several of whom are discussed in this volume Stevin made an important contribution to the transformation of the ideal of knowledge in early modern Europe This book thus provides new insights into the phenomenon of polymaths in general and in the case of Stevin in particular

How Do We Know? Dirk Evers, Antje Jackelen, Taede Smedes, 2010-04-15 A study on the relationship between science and theology with respect to epistemological differences between religious belief and scientific knowledge

The Human Evolutionary Transition Magnus Enquist, Stefano Ghirlanda, Johan Lind, 2023-02-28 A major new theory of why human intelligence has not evolved in other species The Human Evolutionary Transition offers a unified view of the evolution of intelligence presenting a bold and provocative new account of how animals and humans have followed two powerful yet very different evolutionary paths to intelligence This incisive book shows how animals rely on robust associative mechanisms that are guided by genetic information which enable animals to sidestep complex problems in learning and decision making but ultimately limit what they can learn Humans embody an evolutionary transition to a different kind of intelligence one that relies on behavioral and mental flexibility The book argues that flexibility is useless to most animals because they lack sufficient opportunities to learn new behavioral and mental skills Humans find these opportunities in lengthy childhoods and through culture Blending the latest findings in fields ranging from psychology to evolutionary anthropology The Human Evolutionary Transition draws on computational analyses of the problems organisms face extensive overviews of empirical data on animal and human learning and mathematical modeling and computer simulations of hypotheses about intelligence This compelling book demonstrates

that animal and human intelligence evolved from similar selection pressures while identifying bottlenecks in evolution that may explain why human like intelligence is so rare Humans in Outer Space - Interdisciplinary Perspectives Ulrike Landfester,Nina-Louisa Remuss,Kai-Uwe Schrogl,Jean-Claude Worms,2010-11-04 Following the first comprehensive transdisciplinary dialogue on humans in outer space which resulted in Humans in Outer Space Interdisciplinary Odysseys the European Science Foundation ESF the European Space Agency ESA and the European Space Policy Institute ESPI have continued and deepened this transdisciplinary dialogue which can now be found in Humans in Outer Space Interdisciplinary Perspectives Going further than regarding humans as better than robot tools for exploration it investigates the human quest for odysseys beyond Earth s atmosphere and reflects on arising issues related to Europe s role among the States conducting human exploration It provides perspectives related to governance management of space exploration space settlements the role of astronauts in the future as well as related to the encounter of extraterrestrial life Primate Neuroethology Asif A. Ghazanfar,2012-08-16 This edited volume is the first of its kind to bridge the epistemological gap between primate ethologists and primate neurobiologists Leading experts in several fields review work ranging from primate foraging behavior to the neurophysiology of motor control from vocal communication to the functions of the auditory cortex

Philosophy of Leisure Johan Bouwer,Marco van Leeuwen,2017-02-17 What is leisure How does leisure relate to leading a good life This critical and intelligent study interrogates the basic principles of leisure and demonstrates the continuing relevance of these questions for our society today It not only explores the traditional philosophical concepts at the heart of leisure studies but also pursues new possibilities for reconceptualising leisure that have emerged from recent developments in society technology and the broader discipline of philosophy itself Approaching leisure from a philosophically inquisitive perspective the book argues that leisure revolves around the pursuit of happiness human flourishing and well being making it both a state of mind and a state of being Its exploration of the meaning of leisure addresses key issues such as identity ethics spirituality human experience freedom technology embodiment well being the fundamental properties of leisure and the challenge of offering a meaningful definition Revitalising the subject of leisure studies with its originality Philosophy of Leisure Foundations of the Good Life is fascinating reading for all students and scholars of leisure studies philosophy sociology psychology and ethics

Embodiment Tom Ziemke,Jordan Zlatev,Roslyn M. Frank,2008-09-25 The first volume of the two volume set Body Language and Mind focuses on the concept of embodiment understood in most general terms as the bodily basis of phenomena such as meaning mind cognition and language The volume offers a representative multi and interdisciplinary state of the art collection of papers on embodiment and brings together a large variety of different perspectives from cognitive linguistics cognitive science philosophy psychology semiotics and artificial intelligence Being envisioned as a reader of sorts in theoretical and empirical research on embodiment the book revolves around several core issues that have been addressed previously to a large degree independently in various disciplines In particular the volume

illustrates the diversity of notions of embodiment that has arisen in various disciplines over the last twenty years and addresses the question how these different interpretations relate to each other i e are they different aspects of or different perspectives on the same phenomena or do they actually contradict each other For this purpose several aspects of cognition and language such as phenomenal experience perception action conceptualization communication meaning creation social interaction and culture are illuminated from the perspective of different theories of embodiment The contributions are integrated through cross connections between individual authors papers and through an introductory essay that identifies the different strands of research the central issues that they share and the synergies that can be gained from addressing embodiment from an interdisciplinary perspective

Body, Language, and Mind Tom Ziemke, Jordan Zlatev, Roslyn M. What a Piece of Work Helen Oppenheimer, 2016-10-17 This is a small book on a large subject What is special about human beings Hamlet mused What a piece of work is man How noble in reason how like a god but went on to speak of this quintessence of dust Helen Oppenheimer prefers to start with the dust and move to the glory we really are animals and from these animals has come Shakespeare People are indeed miserable sinners and also magnificent creatures The author does not disguise that she is a Christian theologian whose subject is ethics but she writes equally for non Christians Her invitation to the reader is Here is a way of looking at things that I find exciting and convincing I hope you do too

A Theory of General Ethics Warwick Fox, 2006-09-22 With *A Theory of General Ethics* Warwick Fox both defines the field of General Ethics and offers the first example of a truly general ethics Specifically he develops a single integrated approach to ethics that encompasses the realms

of interhuman ethics the ethics of the natural environment and the ethics of the built environment Thus Fox offers what is in effect the first example of an ethical Theory of Everything Fox refers to his own approach to General Ethics as the theory of responsive cohesion He argues that the best examples in any domain of interest from psychology to politics from conversations to theories exemplify the quality of responsive cohesion that is they hold together by virtue of the mutual responsiveness of the elements that constitute them Fox argues that the relational quality of responsive cohesion represents the most fundamental value there is He then develops the theory of responsive cohesion central features of which include the elaboration of a theory of contexts as well as a differentiated model of our obligations in respect of all beings In doing this he draws on cutting edge work in cognitive science in order to develop a powerful distinction between beings who use language and beings that do not Fox tests his theory against eighteen central problems in General Ethics including challenges raised by abortion euthanasia personal obligations politics animal welfare invasive species ecological management architecture and planning and shows that it offers sensible and defensible answers to the widest possible range of ethical problems
