Social impact of media discourse in the age of iDeology. A perspective from the global periphery Martin A. M. Gansinger, 2019-05-23 In the age of iDeology in which individual access and participation to technology is about to replace the rich texture of religion culture tradition and political convictions the social impact of media discourse only magnifies This volume is an attempt to explore the influence of ever available communication content on the minds and behavior of a population that has made the permanent and often obsessive use of communication technology a defining element of social orientation Unlike the many accounts that focus on the remarkably redefined patterns in the context of Western society ranging from twittering Presidents to the emerging populist movements all over Europe this volume portrays the situation from the frequently neglected perspective of the global periphery As opposed to simply transfer and measure perspectives taken from a Western point of view the clear intention of this volume is to provide ample space for the sincere and explorative consideration of local characteristics and settings of the different social cultural and political contexts and therefore contribute to providing the ground for future research

Before Journalism Schools Randall S. Sumpter, 2018-06-29 Randall Sumpter questions the dominant notion that reporters entering

the field in the late nineteenth century relied on an informal apprenticeship system to learn the rules of journalism Drawing from the experiences of more than fifty reporters he argues that cub reporters could and did access multiple sources of instruction including autobiographies and memoirs of journalists fiction guidebooks and trade magazines Arguments for professional journalism did not resonate with the workaday journalists examined here These news workers were more concerned with following a personal rather than a professional code of ethics and implemented their own work rules Some of those rules governed delinquent behavior While scholars have traced some of the connections between beginning journalists and learning opportunities Sumpter shows that much more can be discovered with implications for understanding the development of journalistic professionalism and present day instances of journalistic behavior
