Robotized technologies for enhanced shipyard operations: challenges and solutions Jawad Masood, Felix Vidal, David Castro, Afra M. Pertusa, Abel Feijoo, 2024-03-25 Large component manufacturing relies heavily on manual operations and human workers Human centric solutions can preserve industry specific knowledge extend capabilities and improve job performance Three robotized technologies were developed for shipyard operations ABB and KUKA robot hand guiding systems HGS a lightweight collaborative system for plasma cutting and a cost effective 3D projection system for retrofitting These technologies were developed at the open didactic factory which served as platforms for rapid technological advancement The HGS was integrated with ABB and KUKA and the 3D projection technology and lightweight collaborative system offered a cost effective solution for small and medium shipyards However transitioning to non flat surfaces presents challenges due to geometric variations and discrepancies between the computer aided design model and the actual component
