

# MATH REVIEW

THEORY • FORMULAS • PROPORTION • VALUE • STATISTICS • PROBABILITY

## A COMPREHENSIVE OVERVIEW OF BASIC MATHEMATICAL CONCEPTS

### SET THEORY

#### NOTATION

1. Braces indicate the beginning and end of a set notation, when listed, elements or members must be separated by commas.  
EX:  $A = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$
2. The empty set, or null set, is a set containing no elements or members, the empty set is a subset of all sets and is also written as  $\emptyset$ .
3. In a symbol that means "such that".
4. Means is a member of or is an element of.  
EX: If  $A = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$ , then  $A$  is an element of  $A$ .
5. Means is not a member of or is not an element of.  
EX: If  $B = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$ , then  $A$  is not an element of  $B$ .
6. Means is a subset of, also may be written as  $\subset$ .
7. Means is not a subset of, also may be written as  $\not\subset$ .
8. Indicates that every element of set  $A$  is also an element of set  $B$ .  
EX: If  $A = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$  and  $B = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$ , then  $A \subset B$  because the 2 sets are the same.
9. Is the number of elements of a set when it equals the number of elements in that set.  
EX: If  $A = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$ , then  $A$  has 26 elements and  $26 = A$ .

#### OPERATIONS

- A, B Indicates the union of set  $A$  with set  $B$ , every element of set  $A$  is either an element of set  $A$  or an element of set  $B$ , that is, to form the union of two sets, put all of the elements of the two sets together into one set, making sure not to write any element more than once.  
EX: If  $A = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$  and  $B = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$ , then  $A \cup B = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$ .
- A, B Indicates the intersection of set  $A$  with set  $B$ , every element of this set is an element of set  $A$  and set  $B$ , that is, to form the intersection of two sets, list only those elements that are found in both of the two sets.  
EX: If  $A = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$  and  $B = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$ , then  $A \cap B = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$ .
- X Indicates the complement of set  $A$ —that is, all elements in the universal set that are not in set  $A$ .  
EX: If the universal set is the set of integers and  $A = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$ , then  $A^c = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$ .

#### PROPERTIES

- A, B Indicates all the elements in set  $A$  are also in set  $B$  and all elements in set  $B$  are also in set  $A$ , these elements do not have to be in the same order.  
EX: If  $A = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$  and  $B = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$ , then  $A = B$ .
- n(A) Indicates the number of elements in set  $A$ —that is, the cardinal number of the set.  
EX: If  $A = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$ , then  $n(A) = 26$ .
- A, B Means is equivalent to, that is, set  $A$  and set  $B$  have the same number of elements, although the elements themselves may or may not be the same.  
EX: If  $A = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$  and  $B = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$ , then  $A \sim B$  because  $n(A) = 26$  and  $n(B) = 26$ .
- A, B, C Indicates disjoint sets that have no elements in common.  
EX: If  $A = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$  and  $B = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$  and  $C = \{A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z\}$ , then  $A \cap B = \emptyset$  because there are no common elements.

### PROPERTIES OF REAL NUMBERS

#### CLOSURE PROPERTIES

- $a + b$  is a real number; when you add two real numbers, the result is also a real number.  
EX: 3 and 4 are both real numbers;  $3 + 4 = 7$  and the sum, 7, is also a real number.
- $a - b$  is a real number; when you subtract two real numbers, the result is also a real number.  
EX: 4 and 10 are both real numbers;  $4 - 10 = -6$  and the difference, -6, is also a real number.
- $a \cdot b$  is a real number; when you multiply two real numbers, the result is also a real number.  
EX: 10 and -3 are both real numbers;  $(10)(-3) = -30$  and the product, -30, is also a real number.
- $\frac{a}{b}$  is a real number when  $b \neq 0$ ; when you divide two real numbers, the result is also a real number unless the denominator (divisor) is 0.  
EX: -20 and 5 are both real numbers;  $\frac{-20}{5} = -4$  and the quotient, -4, is also a real number.

#### COMMUTATIVE PROPERTIES

- $a + b = b + a$ ; the order in which you add two numbers does not change the sum.  
EX:  $6 + 15 = 21$  and  $15 + 6 = 21$ , so  $6 + 15 = 15 + 6$ .
- $a \cdot b = b \cdot a$ ; the order in which you multiply two numbers does not change the product.  
EX:  $(4)(24) = 96$  and  $(24)(4) = 96$ , so  $(4)(24) = (24)(4)$ .
- $a - b = b - a$ ; you cannot subtract in any order and get the same answer.  
EX:  $6 - 2 = 4$ , but  $2 - 6 = -4$ , there is no commutative property for subtraction.
- $\frac{a}{b} = \frac{b}{a}$ ; you cannot divide in any order and get the same answer.  
EX:  $\frac{6}{2} = 3$ , but  $\frac{2}{6} = 0.33$ , so there is no commutative property for division.

#### ASSOCIATIVE PROPERTIES

- $(a + b) + c = a + (b + c)$ ; the order in which you group more than two numbers when adding does not change the sum.  
EX:  $(2 + 3) + 4 = 7 + 4 = 11$  and  $2 + (3 + 4) = 2 + 7 = 9$ , so  $(2 + 3) + 4 = 2 + (3 + 4)$ .
- $(a \cdot b) \cdot c = a \cdot (b \cdot c)$ ; the order in which you group more than two numbers when multiplying does not change the product.  
EX:  $(4 \cdot 5) \cdot 6 = 20 \cdot 6 = 120$  and  $4 \cdot (5 \cdot 6) = 4 \cdot 30 = 120$ , so  $(4 \cdot 5) \cdot 6 = 4 \cdot (5 \cdot 6)$ .
- The associative property does not work for subtraction or division.  
EX: For subtraction,  $(10 - 4) - 2 = 6 - 2 = 4$ , but  $10 - (4 - 2) = 10 - 2 = 8$ ; for division,  $(12 \cdot 3) \cdot 2 = 36 \cdot 2 = 72$ , but  $12 \cdot (3 \cdot 2) = 12 \cdot 6 = 72$ , note that these answers are not the same.

#### IDENTITY PROPERTIES

- $a + 0 = a$ ; adding 0 to a number does not change its value.

- $a \cdot 1 = a$ ; multiplying a number by 1 does not change its value.  
EX:  $2(11) = 22$  and  $(1)(2) = 2$ .
- There are no identities for subtraction or division.

#### INVERSE PROPERTIES

- $a + (-a) = 0$ ; a number plus its additive inverse (the number with the opposite sign) is 0.  
EX:  $5 + (-5) = 0$  and  $-10 + 10 = 0$ .
- $a \cdot \frac{1}{a} = 1$ ; a number times its multiplicative inverse (the number written as a fraction and flipped) is 1.  
EX:  $3 \cdot \frac{1}{3} = 1$ , the exception is 0 because 0 cannot be multiplied by any number and result is a product of 0.

#### DISTRIBUTIVE PROPERTY

- $a(b + c) = ab + ac$  or  $a(b - c) = ab - ac$ ; each term in the parentheses must be multiplied by the term in front of the parentheses.  
EX:  $4(5 + 7) = 4(5) + 4(7) = 20 + 28 = 48$ .
- Sometimes variables are included within parentheses in mathematical expressions using the distributive property allows you to remove the parentheses in such a expression.  
EX:  $4(5x + 7) = 4(5x) + 4(7) = 20x + 28$ .

#### PROPERTIES OF EQUALITY

- Reflexive:  $a = a$ ; both sides of the equation are identical.  
EX:  $5 = 5$ .
- Symmetric: If  $a = b$ , then  $b = a$ ; this property allows you to exchange the two sides of an equation.  
EX: If  $7 = 9$ ,  $9 = 7$  becomes  $9 = 7$ .
- Transitive: If  $a = b$  and  $b = c$ , then  $a = c$ ; this property allows you to connect statements that are each equal to the same common statement.  
EX: If  $5 = 6$  and  $6 = 7$ , you can eliminate the common term 6 and write the new equation:  $5 = 7$ .
- Addition property of equality: If  $a = b$ , then  $a + c = b + c$ ; this property allows you to add any number or algebraic term to any equation as long as you add it to both sides to keep the equation true.  
EX: If  $5 = 6$ , if you add 3 to one side and not the other, the equation becomes  $8 = 9$ , which is false, but if you add 3 to both sides, you get a true equation  $8 = 9$ , also,  $5 + 3 = 8$  becomes  $6 + 3 = 9$  and  $6 + 3 = 9$  is true.
- Multiplication property of equality: If  $a = b$ , then  $ac = bc$ ; when  $c \neq 0$ , this property allows you to multiply both sides of an equation by any nonzero value.  
EX: If  $5 = 6$ , then  $(4)(5) = (4)(6)$  and  $20 = 24$ , and  $5 = 6$ , note that both sides of the equation were multiplied by 4.

### SETS OF NUMBERS

#### DEFINITIONS

- Natural or counting numbers:  $\{1, 2, 3, 4, 5, \dots, 16, 17, 18, \dots\}$
- Whole numbers:  $\{0, 1, 2, 3, \dots, 16, 17, 18, 19, \dots\}$
- Integers:  $\{\dots, -4, -3, -2, -1, 0, 1, 2, 3, 4, \dots\}$
- Rational numbers:  $\{\frac{p}{q} | p \text{ and } q \text{ are integers, } q \neq 0\}$ ; the sets of natural numbers, whole numbers, and integers, as well as numbers that can be written as proper or improper fractions, are all subsets of the set of rational numbers.
- Irrational numbers:  $\{x | x \text{ is a real number that is not a rational number}\}$ ; the sets of rational numbers and irrational numbers have no elements in common and are therefore disjoint sets.
- Real numbers:  $\{x | x \text{ is the coordinate of a point on a number line}\}$ ; the union of the set of rational numbers with the set of irrational numbers equals the set of real numbers.
- Imaginary numbers:  $\{x | x \text{ is a real number and } i \text{ is the number whose square is } -1, i^2 = -1\}$ ; the sets of real numbers and imaginary numbers have no elements in common and are therefore disjoint sets.

- Complex numbers:  $\{a + bi | a \text{ and } b \text{ are real numbers and } i \text{ is the number whose square is } -1\}$ ; the set of real numbers and the set of imaginary numbers are both subsets of the set of complex numbers.  
EX:  $4 + 3i$  and  $3 - 2i$  are complex numbers.

#### COMPLEX NUMBER S

## **Math Review Quick Study Academic:**

This is likewise one of the factors by obtaining the soft documents of this **Math Review Quick Study Academic** by online. You might not require more period to spend to go to the book foundation as skillfully as search for them. In some cases, you likewise attain not discover the declaration Math Review Quick Study Academic that you are looking for. It will certainly squander the time.

However below, similar to you visit this web page, it will be as a result completely easy to acquire as well as download lead Math Review Quick Study Academic

It will not acknowledge many epoch as we accustom before. You can get it even if statute something else at home and even in your workplace. in view of that easy! So, are you question? Just exercise just what we have enough money under as without difficulty as evaluation **Math Review Quick Study Academic** what you taking into consideration to read!

### **Math Review Quick Study Academic Introduction**

In the digital age, access to information has become easier than ever before. The ability to download Math Review Quick Study Academic has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Math Review Quick Study Academic has opened up a world of possibilities. Downloading Math Review Quick Study Academic provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Math Review Quick Study Academic has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Math Review Quick Study Academic. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Math Review Quick Study Academic. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Math Review Quick Study Academic, users should also consider the potential

security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Math Review Quick Study Academic has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

### FAQs About Math Review Quick Study Academic Books

1. Where can I buy Math Review Quick Study Academic books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Math Review Quick Study Academic book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Math Review Quick Study Academic books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Math Review Quick Study Academic audiobooks, and where can I find them? Audiobooks: Audio recordings of

books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.

8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Math Review Quick Study Academic books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
