Little Learning Labs: Math Games for Kids Rebecca Rapoport, J.A. Yoder, 2019-09-03 Little Learning Labs Math Games for Kids an abridged paperback edition of Math Games Lab for Kids presents 25 hands on activities that include coloring, art, puzzles, and more that make learning about math fun. Explore geometry and topology by building, drawing, and transforming shapes. Discover how to color maps like a mathematician by using the fewest colors possible. Draw graphs to learn the language of connections. Create mind bending fractals with straight lines and repeat shapes. Everything you need to complete the activities can either be found in the book or around the house. The popular Little Learning Labs series based on the larger format Lab for Kids series features a growing list of books that share hands on activities and projects on a wide host of topics including art, astronomy, geology, math, and even bugs, all authored by established experts in their fields. Each lab contains a complete materials list, clear step by step photographs of the process, as well as finished samples. The activities are open ended, designed to be explored over and over often with different results. Geared toward being taught or guided by adults, they are enriching for a range of ages and skill levels. Gain firsthand knowledge on your favorite topic with Little Learning Labs. Open Little Learning Labs Math Games for Kids and start exploring the exciting world of math.

Strengths-Based Teaching and Learning in Mathematics Beth McCord Kobett, Karen S. Karp, 2020-02-27 This book is a game changer. Strengths Based Teaching and Learning in Mathematics 5 Teaching Turnarounds for Grades K-6 goes beyond simply providing information by sharing a pathway for changing practice. Focusing on our students' strengths should be routine and can be lost in the day to day teaching demands. A teacher using these approaches can change the trajectory of students' lives forever. All teachers need this resource. Connie S. Schrock, Emporia State University, National Council of Supervisors of Mathematics President, 2017-2019.

NEW COVID RESOURCES ADDED: A Parent's Toolkit to Strengths Based Learning in Math is now available on the book's companion website to support families engaged in math learning at home. This toolkit provides a variety of home based activities and games for families to engage in together. Your game plan for unlocking mathematics by focusing on students' strengths. We often evaluate student thinking and their work from a deficit point of view, particularly in mathematics where many teachers have been taught that their role is to diagnose and eradicate students' misconceptions. But what if instead of focusing on what students don't know or haven't mastered, we identify their mathematical strengths and build next instructional steps on students' points of power? Beth McCord Kobett and Karen S. Karp answer this question and others by highlighting five key teaching turnarounds for improving students' mathematics learning: identify teaching strengths

discover and leverage students strengths design instruction from a strengths based perspective help students identify their points of power and promote strengths in the school community and at home Each chapter provides opportunities to stop and consider current practice reflect and transfer practice while also sharing Downloadable resources activities and tools Examples of student work within Grades K 6 Real teachers notes and reflections for discussion It s time to turn around our approach to mathematics instruction end deficit thinking and nurture each student s mathematical strengths by emphasizing what makes them each unique and powerful *Today's Mathematics, Activities and Instructional Ideas* James W.
