Mathematics Problem Solving Through Recreational Mathematics Mathematical Sciences Series:

Mathematics Bonnie Averbach, Patricia Brewer, Orin Chein, 1980 Basic mathematical principles are explained and problem solving skills developed through a series of exercises puzzles and games Problem Solving Through Recreational Mathematics Bonnie Averbach, Orin Chein, 2012-03-15 Fascinating approach to mathematical teaching stresses use of recreational problems puzzles and games to teach critical thinking Logic number and graph theory games of strategy much more Includes answers to selected problems Free solutions manual available for download at the Dover website *An Introduction to Fourier Series and Integrals* Robert T. Seeley, 2014-02-20 A compact sophomore to senior level guide Dr Seeley's text introduces Fourier series in the way that Joseph Fourier himself used them as solutions of the heat equation in a disk Emphasizing the relationship between physics and mathematics Dr Seeley focuses on results of greatest significance to modern readers Starting with a physical problem Dr Seeley sets up and analyzes the mathematical modes establishes the principal properties and then proceeds to apply these results and methods to new situations The chapter on Fourier transforms derives analogs of the results obtained for Fourier series which the author applies to the analysis of a problem of heat conduction Numerous computational and theoretical problems appear throughout the text Ivan Moscovich, 2004 Presents a collection of puzzles that demonstrate the principles of mathematics **Mathematical Labyrinths. Pathfinding** Boris Pritsker, 2021-01-04 Mathematical Labyrinths Pathfinding provides an overview of various non standard problems and the approaches to their solutions The essential idea is a framework laid upon the reader on how to solve nonconventional problems particularly in the realm of mathematics and logic It goes over the key steps in approaching a difficult problem contemplating a plan for its solution and discusses set of mental models to solve math problems The book is not a routine set of problems It is rather an entertaining and educational journey into the fascinating world of mathematical reasoning and logic It is about finding the best path to a solution depending on the information given asking and answering the right questions analyzing and comparing alternative approaches to problem solving searching for generalizations and inventing new problems It also considers as an important pedagogical tool playing mathematical and logical games deciphering mathematical sophisms and interpreting mathematical paradoxes It is suitable for mathematically talented and curious students in the age range 10 20 There are many Eureka type out of the ordinary fun problems that require bright idea and insight These intriguing and thought provoking brainteasers and logic puzzles should be enjoyable by the audience of almost any age group from 6 year old children to 80 year old and older adults **Calculus Refresher** A. A. Klaf, 2012-06-08 This book is unique in English as a refresher for engineers technicians and students who either wish to brush up their calculus or find parts of calculus unclear It is not an ordinary textbook It is instead an examination of the most important aspects of integral and differential calculus in terms of the 756 questions most likely to occur to the technical reader It provides a very easily followed presentation and may also be used as either an introductory or supplementary

textbook The first part of this book covers simple differential calculus with constants variables functions increments derivatives differentiation logarithms curvature of curves and similar topics The second part covers fundamental ideas of integration inspection substitution transformation reduction areas and volumes mean value successive and partial integration double and triple integration In all cases the author stresses practical aspects rather than theoretical and builds upon such situations as might occur A 50 page section illustrates the application of calculus to specific problems of civil and nautical engineering electricity stress and strain elasticity industrial engineering and similar fields 756 questions answered 566 problems to measure your knowledge and improvement answers 36 pages of useful constants formulae for ready reference Index
