Primary School Teachers Skills To Help Dyscalculic Children Geetha; N. Jaya, 2009. Study conducted in Coimbatore District of Tamil Nadu, India. The Routledge International Handbook of Dyscalculia and Mathematical Learning Difficulties Steve Chinn, 2014-11-20. Mathematics plays an important part in every person's life so why isn't everyone good at it? The Routledge International Handbook of Dyscalculia and Mathematical Learning Difficulties brings together commissioned pieces by a range of hand-picked influential international authors from a variety of disciplines, all of whom share a high public profile. More than fifty experts write about mathematics learning difficulties and disabilities from a range of perspectives and answer questions such as: What are mathematics learning difficulties and disabilities? What are the key skills and concepts for learning mathematics? How will IT help now and in the future? What is the role of language and vocabulary? How should we teach mathematics? By posing notoriously difficult questions such as these and studying the answers, The Routledge International Handbook of Dyscalculia and Mathematical Learning Difficulties is the authoritative volume and is essential reading for academics in the field of mathematics. It is an incredibly important contribution to the study of dyscalculia and mathematical difficulties in children and young adults. *Paired Maths Handbook* Judi Bamford, Keith J. Topping, 2013-11-12. First Published in 1998. This book is one of a family of three related books consisting of two resource Handbooks for everyday use supported by a more detailed background text for deeper reading and reference. The Paired Maths Handbook gives a brief introduction to the rationale, materials, organisation and evaluation of the Paired Maths method for parental involvement and peer tutoring in mathematics for children aged 4 to 14. This is followed by 12 different practical resources to copy to help with the organisation of the method. The main part of the book consists of two dimensional mathematical games to copy complete with instructions and needing minimal other materials. These games are particularly suitable for children aged 9 to 12 especially when involved in cooperative learning or peer tutoring in schools or other study centres. *More Trouble with Maths* Steve Chinn, 2012-05-23. There are many factors that can contribute to the learning difficulties children and adults

have with mathematics These include poor working memory difficulties in retrieving so called basic facts and the ability to remember and apply formulas and procedures correctly This highly practical teacher resource is for anyone who would like to accurately and effectively identify dyscalculia amongst their pupils Written in an engaging and user friendly style Steve Chinn draws on his extensive experience and expertise and shows how to consider all the factors relating to mathematical learning difficulties explains how these factors can be investigated explores their impact on learning discusses and provides a range of tests ranging from pre requisite skills such as working memory to a critique of normative tests for mathematics knowledge and skills The book will guide the reader in the interpretation of tests emphasising the need for a clinical approach when assessing individuals and shows how diagnosis and assessment can become part of everyday teaching This resource also includes pragmatic tests which can be implemented in the classroom and shows how identifying the barriers is the first step in setting up any programme of intervention *Assessment and Learning in the Primary School* E. C.
