Hegel 60 Minuten Walther Ziegler:

Hegel in 60 Minutes Walther Ziegler, 2016-07-08 Already as a student Hegel was often reprimanded for excessive drinking and gambling and he is surely one of the most unconventional today one might say coolest thinkers of all time He is sometimes mockingly accused of having been drunk when he hit on his key idea of a World Spirit Nevertheless his philosophy remains fascinating and highly relevant even today Hegel was the first philosopher to realize the full implications of the dimension of becoming He can fairly be called the Charles Darwin of philosophy Because for Hegel everything literally everything is in constant motion Human life has as much the character of a process as do Nature and History A human being comes into the world as a tiny baby and becomes a child an adolescent and finally an adult Likewise human history marches onward from small beginnings One epoch follows another The expression spirit of the times that we use so casually today is in fact one we owe to Hegel's great discovery that every epoch possesses a specific spirit that completely permeates it This spirit of the age or as Hegel also called it World Spirit manifests itself in all the ideas held by this age's people regarding morality justice art music and architecture But Hegel says more A second contention central to his great philosophical discovery was that these different epochs and their spirits do not follow one another merely randomly and by chance but rather obey a logical principle of movement the so called dialectic The pendulum of history swings dialectically first in one direction then in the other But human history is nonetheless steering its way slowly but unstoppably toward a great final goal The book *Hegel in 60 Minutes* explains using the best quotations from Hegel's work and many examples how this dialectic and thus the motor of human history is argued by him to function Many books claim to clearly explain the ideas of the notoriously difficult philosopher Hegel But this one really does this All the exciting questions raised by Hegel's fascinating philosophical vision are all answered here at what point do we reach the end of History Are we only spectators of this History or actors in it Who or what is the World Spirit What is the meaning of life Of what use is Hegel's discovery to us today The book forms part of the popular series *Great Thinkers in 60 Minutes* *Great Thinkers in 60 Minutes - Volume 4* Walther Ziegler, 2023-01-11 *Great Thinkers in 60 Minutes* Volume 4 comprises the five Books Schopenhauer in 60 Minutes Nietzsche in 60 Minutes Wittgenstein in 60 Minutes Kafka in 60 Minutes and Arendt in 60 Minutes Each short study sums up the key idea at the heart of each respective thinker and asks the question Of what use is this key idea to us today But above all the philosophers get to speak for themselves Their most important statements are prominently presented as direct quotations in speech balloons with appropriate graphics with exact indication of the source of each quote in the author's works This light hearted but nonetheless scholarly precise rendering of the ideas of each thinker makes it easy for the reader to acquaint him or herself with the great questions of our lives Because every philosopher who has achieved global fame has posed the question of meaning what is it that holds at the most essential level the world together For Schopenhauer it is the blind will that drives on every entity in the world For Nietzsche it is will to power that urges human beings to a radical individual

realization of the self Wittgenstein for his part sees in language and our day to day language games the central element that marks our existence and society as a whole Kafka by contrast discovered a very secret and fragile dimension of our lives the dimension of inter human relations and this relation s dark side Arendt finally provides us with her thesis of the banality of evil a marvellous insight into the morality and amorality of entire societies In other words the meaning of the world and thus of our own lives remains among philosophers a topic of great controversy One thing though is sure each of these five thinkers struck from his own perspective one brilliant spark out of that complex crystal that is the truth

Epicurus in 60 Minutes

Walther Ziegler,2022-11-03 The philosopher Epicurus 341 270 BC has been controversial since antiquity His provocative key idea is of compelling simplicity Every human being possesses by nature an internal compass In order to be happy he must do what causes him pleasure and joy and avoid what causes him displeasure and harm He writes Pleasure is the starting point and goal of living blessedly It is our first innate good and our starting point for every choice and avoidance Already newborns follow this pleasure principle But this discovery which might at first seem so obvious struck Epicurus s contemporaries as a monstrous provocation The notion that the highest goal of life is enjoying pleasure stands in stark contrast to the then established teachings of Plato Aristotle and the Stoics These latter saw reason and a life lived by reason as the highest goal of Man Because Epicurus accepted women into his school and even had a love affair with one of them his contemporaries called him a glutton and sex fiend The Greek poet Timon described him as doggish the Stoic Epictetus as a wastrel Christian authors later even called him the Antichrist But these critiques are fundamentally false because beyond a superficial striving for pleasure Epicurus s deeper concern was a lifelong painstaking care of the self His questions then remain burningly relevant What are the basic human needs whose satisfaction yields a happy life Which needs are really necessary to life and which not How concretely should we deal with these needs for example with the need for food drink sexual intercourse and friendship The book contains almost a hundred quotes from this charismatic ancient philosopher It appears as part of the beloved series Great Thinkers in 60 Minutes which has now been translated worldwide into six languages

Great Thinkers in 60 minutes - Volume 3

Walther Ziegler,2023-01-11 Great Thinkers in 60 Minutes Volume 3 comprises the five books Confucius in 60 Minutes Buddha in 60 Minutes Epicurus in 60 Minutes Descartes in 60 Minutes and Hobbes in 60 Minutes Each short study sums up the key idea at the heart of each respective thinker and asks the question Of what use is this key idea to us today But above all the philosophers get to speak for themselves Their most important statements are prominently presented as direct quotations in speech balloons with appropriate graphics with exact indication of the source of each quote in the author s works This light hearted but nonetheless scholarly precise rendering of the ideas of each thinker makes it easy for the reader to acquaint him or herself with the great questions of our lives Because every philosopher who has achieved global fame has posed the question of meaning what is it that holds at the most essential level the world together For Confucius it is the search for the Dao for the right path that leads us human beings to one another For the Buddha it is a

radical liberation from our needs and the approach through meditation to Nirvana For Epicurus by contrast the meaning of life consists in the letting be of our pleasures and the imbeddedness of existence in our bodies Descartes for his part considers thinking to be the decisive quality of Man allowing him to explore and master the world Hobbes finally sees the central element of meaning to consist in humans peaceful coexistence thanks to the founding of states i e in a political act In other words the meaning of the world and thus of our own lives remains among philosophers a topic of great controversy One thing though is sure each of these five thinkers struck from his own perspective one brilliant spark out of that complex crystal that is the truth

Schopenhauer in 60 Minutes Walther Ziegler, 2021 Schopenhauer is renowned as the greatest most brilliant pessimist among philosophers He was the first to discover that our lives and world history are governed not by reason or rational planning but rather by the same blind hungry will as drives the lives of animals and plants Instead of reason says Schopenhauer there rules as the basic metaphysical principle just the the blind will appearing as the tendency to life the love of life vital energy the same thing as makes the plant grow Because every being on earth is filled with this blind will and needs in order itself to live to find its place in the sun by pushing other beings aside persecuting and hunting them devouring them and itself fearing being devoured Even the majestic lion stands on a mountain of corpses to which he owes his existence But worst of all are human beings who inflict pain both on animals and on each other They use their intelligence to systematically exploit build factories lock animals in cages and stalls and fight wars for land and materials Like the Buddhists Schopenhauer concludes that life necessarily means suffering Every life story is a story of suffering he writes And like the Buddhists too he draws a radical conclusion We must say no to life and resists its pressure by means of art asceticism and meditation But what does it mean to say no to life If our lives are indeed just a devouring and being devoured under the impulse of blind will how can we ever escape this fate Of what use is a pessimism like Schopenhauer s today Schopenhauer provides uncompromising answers to these questions that still fascinate us two hundred years on His key ideas are presented here with the aid of over a hundred quotations from his finest work The book appears as part of the popular series Great Thinkers in 60 Minutes

Buddha in 60 Minutes Walther Ziegler, 2021-11-22 The Buddha is renowned as the founder of one of the five world religions This is all the more astonishing because he never claimed to be a prophet Unlike Mohammed Moses or Jesus he promises human beings no afterlife in Paradise Nor does he have any stories of God or God s grace He simply shows us how we can free ourselves by our own efforts from fear and attain to the experience of Nirvana His concern is Man s self salvation He formulates his key idea in the doctrine of the Four Noble Truths To live always means also to suffer runs the first Noble Truth because says the Buddha Ageing is suffering sickness is suffering death is suffering to be parted from loved ones is suffering The second truth then explains the causes of this suffering These are above all our own wishes and needs for pleasure youth attractiveness health eternal life and happiness If we succeeded in freeing ourselves from these things then the Buddha s third Noble Truth runs the suffering would end The fourth Noble Truth finally describes the famous

Eightfold Path that we need to follow in order to achieve liberation awakening and serenity vis vis our own needs The book Buddha in 60 Minutes explains this fascinating doctrine in an easy to follow way especially the key idea nirvana The Buddha indeed arrived at his Four Noble Truths and the nirvana experience only through meditation But his doctrine can be grasped simply through reason Are the Four Truths correct Is the Eightfold Path one we can actually travel Can the nirvana experience actually help us to achieve a redeeming serenity Here the Buddha s key ideas are explained using over a hundred of his most important quotations The book appears as part of the popular series Great Thinkers in 60 Minutes which has now been translated worldwide into six languages **Great Thinkers in 60 Minutes - Volume 2** Walther Ziegler,2016-08-04

Great Thinkers in 60 Minutes is the second omnibus volume drawn from the popular book series of the same name It comprises the five books already published as separate volumes Marx in 60 Minutes Freud in 60 Minutes Sartre in 60 Minutes Camus in 60 Minutes and Heidegger in 60 Minutes Each short study sums up the key idea at the heart of each respective thinker and asks the question Of what use is this key idea to us today But above all the philosophers get to speak for themselves Their most important statements are prominently presented as direct quotations in speech balloons with appropriate graphics with exact indication of the source of each quote in the author s works Between 40 and 80 representative passages are given from the work of each of the five philosophers This light hearted but nonetheless scholarly precise rendering of the ideas of each thinker makes it easy for the reader to acquaint him or herself with the great questions of our lives Because every philosopher who has achieved global fame has posed the question of meaning what is it that holds at the most essential level the world together There have emerged here a range of very different answers In Marx it is the relations of production that is to say the conditions under which we labour and produce the goods we need which ultimately determine our sense of our lives our thinking and our whole culture In Freud it is the libido and thus the energy of our drives which we can either live out repress or sublimate In Sartre it is the absolutely free human will which compels Man to make himself what he is In Heidegger what absorbs us is the struggle for the authenticity of Dasein and the care for the Being of the world Camus is the only philosopher in this series who gives no answer at all to the question of meaning There is no meaning says Camus life is absurd and depends merely upon a sequence of random chance events In other words the meaning of the world and thus of our own lives remains among philosophers a topic of great controversy One thing though is sure each of these five thinkers struck from his own perspective one brilliant spark out of that complex crystal that is the truth **Great Thinkers in 60 Minutes - Volume 5** Walther Ziegler,2023-01-12 Great Thinkers in 60 Minutes Volume 5

comprises the five books Adorno in 60 Minutes Habermas in 60 Minutes Foucault in 60 Minutes Rawls in 60 Minutes and Popper in 60 Minutes Each short study sums up the key idea at the heart of each respective thinker and asks the question Of what use is this key idea to us today But above all the philosophers get to speak for themselves Their most important statements are prominently presented as direct quotations in speech balloons with appropriate graphics with exact indication

of the source of each quote in the author's works This light hearted but nonetheless scholarly precise rendering of the ideas of each thinker makes it easy for the reader to acquaint him or herself with the great questions of our lives Because every philosopher who has achieved global fame has posed the question of meaning what is it that holds at the most essential level the world together For Adorno it is the dialectical development of civilization from the Stone Age up to capitalism along with the alienation of Man from Nature that goes with it Habermas by contrast sees in this historical process of development the chance to gradually improve society through the emancipatory power of language in communicative action Foucault remains sceptical here and reveals to us the rigid structures in which we as modern individuals are trapped Rawls develops a complex and compelling procedure for the creation of an ideally just state of affairs Popper finally establishes a quite new theory of science whereby every scientific truth has only a provisional character so that it must eventually be relieved and replaced by better truths In other words the meaning of the world and thus of our own lives remains among philosophers a topic of great controversy One thing though is sure each of these five thinkers struck from his own perspective one brilliant spark out of that complex crystal that is the truth

Freud in 60 Minutes Walther Ziegler, 2016-07-08 The Viennese physician and psychoanalyst Sigmund Freud moved from hypnotizing his patients to interpreting their dreams and discovered thereby the hitherto unexplored dimension of the unconscious mind Each of us argued Freud has hidden wishes desires and drives which influence our actions below the level of our awareness A great role is played here already from childhood on by sexual desire and pleasure The nursing infant still lives entirely by the pleasure principle taking everything into his mouth crying when he wants something and laughing when he is satisfied But he must soon learn to obey the rules set by his parents teachers and society in general The infantile pleasure principle is brutally superseded by the reality principle This is an experience we all must undergo But it is also one which sometimes leads to grievances and traumatization as do other aspects of the development of our sexuality and of our relationships Freud was a doctor and practiced a revolutionary method of treatment psychoanalysis He was the first to discover that the way people experience their own lives is often to be traced back to experiences which cannot indeed be altered but can be emotionally re evaluated Furthermore Freud impressively explains how our psychical apparatus functions day to day and how we process in every second with lightning speed our drives thoughts and perceptions It was with good reason that the readers of the New York Times voted Freud the most important thinker of the 20th Century The small book *Freud in 60 Minutes* explains Freud's new and revolutionary perspective on human life step by step by means of many examples and over forty quotes from Freud's own works Because all the key components of his theory from the oral stage the Oedipus Complex the conflict of the drives sublimation repression resistance symptom formation transference right on to the therapy itself interlock with one another In the second part of the book it is asked Of what use is Freud's discovery to us today It is astounding how important and helpful his insights can be for forming and directing our own lives provided they are applied rightly The book forms part of the popular series Great

Thinkers in 60 Minutes **Smith in 60 Minutes** Walther Ziegler, 2016-07-08 It was of all people to a Scottish philosopher of morality that there fell the role of intellectual forefather of capitalism It was Adam Smith who was the first to recognize and describe in 1776 the basic principle of the market economy His magnum opus The Wealth of Nations is still looked on today as the Bible of capitalism And indeed for a period of ten years it was after the Bible itself the most translated book on earth Smith created the magic formula of the free play of supply and demand and his theory of the invisible hand spread like wildfire around the world remaining still today the core of the capitalist market model What is more Smith provided a philosophical justification for capitalism in the form of a theory of human nature Man he argued is by nature egoistic and self interested And nothing suits such a being so well as a market economy because it gives everyone the chance to increase their wealth But this in the end benefits all since each of us working at improving his or her own quality of life is led willy nilly as if by an invisible hand to promote also the welfare of society as a whole Do egoistic energies really tend to be transformed into social prosperity in this way How does the market model work Can one really simply let the economy run its course Is capitalism natural The book Smith in 60 Minutes explains the incisive theories of this philosopher and economist in a clear and comprehensible way using over 50 key passages from Smith's own works The final chapter on what use Smith's discovery is for us today discusses both the triumphal progress of Smith's market model and the catastrophic crises that capitalism's triumph has brought with it A thorough knowledge of Smith is indispensable for politicians bankers and economic policy leaders But really anyone who lives in a market economy and there are few today who don't should be familiar with Smith's basic ideas The mechanism of the invisible hand and the free play of supply and demand are more than just theories They form the very heart of the capitalist world and it is indispensable to know the economic and philosophical foundations of the social order in which we live The book forms part of the popular series Great Thinkers in 60 Minutes

Arendt in 60 Minutes Walther Ziegler, 2020-12-06 Hannah Arendt 1906-1975 is rightly viewed as the world's most important female philosopher No other thinker female or male had such a personal experience of the age of totalitarianism or analysed it so precisely and objectively Arendt still attracts worldwide attention with her discoveries of the rule of Nobody and the banality of Evil In our modern mass societies she argues we obey authority far too easily and seldom take responsibility for ourselves A typical modern man in this respect she goes on was the Nazi functionary Eichmann who organized the transport of millions of human beings into extermination camps simply because it was part of his job to do it Arendt was present at his trial for war crimes and made an amazing discovery Eichmann was not as many contended a perverted monster Rather The trouble with Eichmann was precisely that so many were like him and that the many were neither perverse nor sadistic but were and still are terribly and terrifyingly normal It was here that Arendt formulated her brilliant but controversial thesis of the banality of Evil Because it was the banal mentality of doing one's daily duty of Eichmann and many others that made the horrors of Nazism possible Still today we obey authority far too easily But each

citizen Arendt argues should be able if need be to think and act against all laws and rules Should classes in such civil disobedience be part of our children s education Is there an Eichmann in all of us How much civic courage can and must still be demanded even of the modern individual Hannah Arendt gives clear trenchant answers to these questions The book is published as part of the popular series Great Thinkers in 60 Minutes **Marx in 60 Minutes** Walther Ziegler,2016-07-08 Never before or since has a single philosopher produced such a tremendous effect as Karl Marx His great vision of a society without private property was heeded worldwide and had huge historical effects Allegiance to his ideas was proclaimed by revolutionaries parties governments and states Marxism spread all around the globe Marxist revolutions occurred in countries as different as Russia China Vietnam Cuba Nicaragua and Mozambique as well as many others until at one point almost a third of humanity were living under communism But some hundred years after Marx s death the communist world that he had inspired fell apart After the fall of the Iron Curtain many claimed that Marx had been entirely in error and that the sole viable economic system is really capitalism after all It was hoped that democracy market economy and a fair distribution of wealth could all be combined together But this optimism did not last long The global economic and financial crises of recent decades have profoundly shaken belief in the power of the market to regulate itself It has become ever clearer that capitalism does indeed display the structural flaws that Marx described in his main work Capital Certain of Marx s predictions such as the forming of powerful economic monopolies and the ever growing gulf between rich and poor have already come true Others can be seen approaching on the horizon of current social developments His acute critique of capitalism is then more relevant today than ever There is no question but that Marx still has a lot to say to us The book Marx in 60 Minutes explains in clear and perspicuous terms using some seventy key quotations from Marx s works such topics as the materialist philosophy of history the doctrine of base and superstructure Marx s critique of religion and the analyses developed in Capital of surplus value capital accumulation and the immiseration of the workers In the second part of the book entitled Of what use is Marx s discovery to us today Marx s insights are applied to the present situation The book forms part of the popular series Great Thinkers in 60 Minutes *Nietzsche in 60 Minutes* Walther Ziegler,2018-06-21 Nietzsche has the reputation of being the most provocative and controversial of all philosophers What he demanded of humanity was something tremendous that we should develop beyond ourselves and become overmen Formerly we could draw a meaning for our lives from religion But this is no longer possible because as Nietzsche says God is dead This brief dictum has echoed around the world Man Nietzsche argues has freed himself with the rise of the natural sciences from all belief in a beyond and now has for the first time the chance to take his existence into his own hands Most human beings however prove unable to fill the gap in their lives that the death of God has left They continue to seek salvation in such new gods or idols as nationalism socialism racism or capitalism But instead of slipping into the blind worship of these new gods or godlets we need so argues Nietzsche rather to trust in our own selves allow our own will to power to unfold and become overmen Just as

flowers stretch up toward the sun and animals seek constantly after nourishment we human beings too must struggle every day to secure our lives and render them richer and more intense In daily life conducting this struggle must always mean in part conducting it at other people's expense whoever for example applies for a job as a manager and gets it will necessarily cause bitter disappointment among those who applied and failed One furthers one's ego always at the expense of others writes Nietzsche But will to power finds a whole series of very different forms of expression The artist the father of a family the politician the businessman the employee indeed every one of us individually must find his or her own highly personal and particular path to self development Become who you are Nietzsche in 60 Minutes explains his exhilarating philosophy step by step making use of some 160 of the most important passages from his works Camus in 60 Minutes Walther Ziegler, 2016-07-08 Albert Camus was a legend in his own lifetime as a successful author a philosopher and a ladies man His philosophical discoveries remain provocative even today Because like all great philosophers Camus posed the question of the meaning of life But his answer to this question was an answer of an entirely new kind This question as to the meaning of life has been answered of course very differently down the centuries For Plato it is the Good that holds the world together for Hegel the World Spirit for Marx the relations of production for Sartre freedom for Nietzsche will to power and for Habermas the development of communicative reason Really each philosopher has his own answer to this question But Camus is the exception here He has none Or rather worse he has an answer but one of very sobering effect His answer to the question what is the meaning of life is simply It has no meaning Life is absurd We plan ahead and make decisions but in the last analysis our whole life depends on a series of chance events over which we have no control Nor is there really a goal Nevertheless it is our task to live proudly and undauntedly on Camus compares the life of Man with the myth of Sisyphus The mythical Sisyphus strained tirelessly to push a boulder up a mountainside even though it always rolled back down before he reached the top But precisely in this apparently senseless and absurd activity lay argued Camus a chance for a fulfilled life Camus explains to us how we can live with absurdity We must he says imagine Sisyphus happy The book Camus in 60 Minutes explains using selected quotations and examples this theory of the absurd as it is developed by Camus in his main philosophical works The Myth of Sisyphus and The Rebel The chapter on what use Camus' discovery is for us today describes the absurd style of life that Camus recommends Camus' colourful examples of absurd life projects and his descriptions of how one best confronts the absurd itself and leads a life without God or ideological orientation are above all in our modern societies of powerful relevance and topicality The book forms part of the popular series Great Thinkers in 60 Minutes

Sartre in 60 Minutes Walther Ziegler, 2016-07-08 Sartre is surely one of the most important philosophers of the 20th Century His philosophy of existence influenced not just academic debate but the whole of Western civilization especially European youth In France from the end of WW2 on into the 1960s a certain youth culture milieu composed of secondary school and university students and young artists and intellectuals proclaimed their existential attitude to life by wearing the

black clothes and horn rimmed glasses that Sartre was seen to wear in so many photos from the period The motto of these existentialists ran do not let anyone else tell you how you are to live They advocated a frank and intensive style of life both as regards friendships and love affairs and political commitments Sartre was the great philosopher of freedom No other philosopher has so strongly emphasized the freedom of the human will And because Man is free he must make something out of his life and lives as he believes it right to live if necessary contrary to existing social rules and traditions Sartre for example opposed many of his country's wars fought for a more just society launched many petitions and carried on a so called open relationship with his lifelong companion Simone de Beauvoir In his principal work Being and Nothingness Sartre also became one of the first philosophers to explore the nature of love How does love actually work What does it mean to lead a free and self determined life How free are we The book Sartre in 60 Minutes explains the most important of Sartre's theses in a clear and comprehensible way keeping close to Sartre's own text and including over fifty selected passages from his work and focussing on the central theme of his ideas about freedom and the structure of inter human relations In the chapter on what use Sartre's discovery is to us today it is then shown how important Sartre's thoughts still are for our personal lives and for the society of the 21st Century The book forms part of the popular series Great Thinkers in 60 Minutes

Platon in 60 Minutes Walther Ziegler, 2016-07-08 Plato's great discovery was radically new but has echoed down the ages His theory of Ideas has shaped the whole of Western culture and his name is known worldwide More than 2000 years ago Plato used his allegory of the cave which envisaged people looking at shadows on a cavern wall and taking them for realities to express a terrible suspicion He saw his fellow Athenians living in a manipulated world of appearances cut off from reality and put to sleep by material pleasures wealth and demagogic politicians and hoped with this image to shake them out of this sleep Plato's suspicions here are astonishingly relevant still in our Digital Age Do we not also risk getting entirely lost in the shadows and projections of our TV Internet and mobile phone dominated lives To know truth argued Plato Man must learn to see again with his inner eye We are able to sense the truth if we succeed in looking beyond the mere appearances For behind the everyday objects that surround us and the immediately visible world there is another invisible reality a sort of higher level of Being which can reveal to us the world as it truly is This second higher reality is the realm of the Ideas above all the Ideas of the Good the True and the Beautiful by which we must be guided in our lives But what exactly are these Ideas Where do they come from What does Plato mean when he speaks of the Good And most importantly how can we know this Good and live a life in accordance with it The book Plato in 60 Minutes uses three of Plato's marvellous allegories the chariot the sun and the cave to explain the philosopher's fascinating vision of the Ideas But it also presents citing key passages Plato's great political vision of an ideal state ruled by philosopher kings Finally in a chapter on what use Plato's discovery is for us today it is shown how burningly relevant the ancient philosopher's thoughts still are The book forms part of the popular series Great Thinkers in 60 Minutes

Habermas in 60 Minutes Walther Ziegler, 2020-10-09 Habermas's great philosophical discovery is a

rousing and a modest one Rousing because almost two centuries after the great philosophers of history Hegel and Marx he attempts once again to discover a meaning and purpose for human history modest because he describes without bombast humanity's ability to shape its own future and deduces this ability from a phenomenon we encounter in our daily life language It is no longer as in Hegel the World Spirit nor as in Marx class struggle that forms the motor of development but rather human speech Agreement achieved through language will says Habermas eventually unite humanity The wish for such an ever greater agreement based on an unforced exchange of views is inherent in the structure of our speech Because as soon as anyone speaks with anyone else anywhere on earth he must consciously or unconsciously raise four universal validity claims such as the claim to be understood What begins so simply is developed by Habermas in an hypothesis of great breadth In communicative action and thus in language there inheres a stubborn claim to rationality even if it is constantly suppressed Does language really compel us to rationality Does it really have such emancipatory power or is it in the end just a tool And if language really causes humanity to draw closer together why are there still wars Habermas answers all these questions The book Habermas in 60 Minutes explains the core of his philosophy using over 60 key quotations and many examples The chapter Of What Use is Habermas's Discovery to Us Today points up the meaning of his Critical Theory for our present world and for our personal lives The book appears as part of the popular series Great Thinkers in 60 Minutes

Adorno in 60 Minutes Walther Ziegler, 2020-03-26 Adorno is one of the most charismatic thinkers in philosophical history The bald headed professor in horn rimmed glasses gave our modern civilization a fatal diagnosis perhaps the most fatal one conceivable we may have raised ourselves through science capitalism and techniques of state administration to the position of masters over Nature and brought this latter under our control but we have precisely thereby also enslaved ourselves We have become in the end manipulated victims of the mass consumer society that we ourselves created All our lives are lived in delusions whose shell we cannot penetrate Wrong life cannot be lived rightly this famous dictum of Adorno's symbolizes still today modern Man's uncertainties and contradictions On the one hand we Westerners enjoy thanks to capitalism unprecedented medical and technical blessings on the other we feel we're losing ourselves becoming slaves Many people sell their labour power all day and then spend the evening in front of the TV which dangles before them a happy and adventurous world that is long since lost to them Are we all completely manipulated Has the Enlightenment project of freeing Man through reason and science from superstition really as Adorno claims turned into its opposite Is he right in thinking that science itself is leading us into the danger of a new barbarism Adorno gives extremely exciting and original answers to these questions The book Adorno in 60 Minutes explains step by step his main works aided in this by over 50 direct quotations from them In the last chapter Of What Use is Adorno's Discovery for Us Today it is shown what burning relevance his Critical Theory has for the personal life of every one of us today The book is published as part of the popular series Great Thinkers in 60 Minutes

Great Thinkers in 60 Minutes - Volume 1 Walther Ziegler, 2017-03-09 Great Thinkers in 60 Minutes Volume 1

comprises the five books already published as separate volumes Plato in 60 Minutes Rousseau in 60 Minutes Smith in 60 Minutes Kant in 60 Minutes and Hegel in 60 Minutes Each short study sums up the key idea at the heart of each respective thinker and asks the question Of what use is this key idea to us today But above all the philosophers get to speak for themselves Their most important statements are prominently presented as direct quotations in speech balloons with appropriate graphics with exact indication of the source of each quote in the author's works This light hearted but nonetheless scholarly precise rendering of the ideas of each thinker makes it easy for the reader to acquaint him or herself with the great questions of our lives Because every philosopher who has achieved global fame has posed the question of meaning what is it that holds at the most essential level the world together There have emerged here a range of very different answers In Plato for example the Idea of the Good is that to which we need to open our souls in Rousseau it is rather only in our own original nature that we need to trust in Adam Smith it is in self interest which spurs on each individual and is finally transformed by an invisible hand into the common good in Kant it is the application of Reason which frees us and makes us capable of extraordinary moral actions and in Hegel finally everything is held together by the dialectical self development of the World Spirit which drives onward from epoch to epoch through the deeds of individuals and of nations until it has finally reached its great goal In other words the meaning of the world and thus of our own lives remains among philosophers a topic of great controversy One thing though is sure each of these five thinkers struck from his own perspective one brilliant spark out of that complex crystal that is the truth

Descartes in 60 Minutes Walther Ziegler, 2022-09-08 The French thinker Ren Descartes is one of the best known philosophers in the world His brief dictum I think therefore I am has become part of all humanity's cultural heritage Just as Columbus discovered an unknown continent the so called New World Descartes succeeded in opening up a new dimension of knowledge and altering our view of reality Prior to Descartes people in the Christian West believed for over a thousand years in the Bible as testimony to God's revealed truth Then came Descartes with the radical demand that knowledge had from then on to rely on a basis of absolute certainty It was always my most earnest desire to learn to distinguish the true from the false He posed the fundamental question how does one arrive at sure and certain knowledge On what can I really rely On what I see and hear On thought and logic Or perhaps on what I have learned from my earliest childhood on His radical answer runs on nothing at all We must doubt absolutely everything In his famous Meditations on First Philosophy Descartes describes his search for this absolutely certain knowledge The result he arrives at I can doubt anything and everything but in the moment of my doubting I cannot doubt that there is an I that thinks and doubts I think therefore I am Is thinking really the human trait that decides everything about us Is there really nothing in the world except thinking within us and thoughtless soulless bodies outside of us Is it science's task to subjugate matter plants and animals and even the human body itself Descartes does more than just lay the ground for modern science In a sense his thought has become our destiny both for good and for bad The book appears as

part of the well loved series Great Thinkers in 60 Minutes which has now been translated worldwide into six languages

The Top Books of the Year Hegel 60 Minuten Walther Ziegler The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the fascinating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Hegel 60 Minuten Walther Ziegler : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and gripping novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
