

An intricate embroidery on a black fabric background. The design features three hummingbirds with iridescent green heads, red throats, and white chests. One bird is in flight in the upper center, another is perched on a branch on the left, and a third is in flight at the bottom left. They are surrounded by delicate, thin branches with small green and yellow leaves, and several large, vibrant pink flowers with yellow centers. The entire scene is framed by elegant, swirling white lines.

Kuefler,2015-06-18 Commanding its own museum and over 200 years of examination observation and scholarship the monumental embroidery known popularly as the Bayeux Tapestry and documenting William the Conqueror s invasion of England in October 1066 is perhaps the most important surviving artifact of the Middle Ages This magnificent textile both celebrated and panned is both enigmatic artwork and confounding historical record With over 1780 entries Szabo and Kuefler offer the largest and most heavily annotated bibliography on the Tapestry ever written Notably the Bayeux Tapestry has produced some of the most compelling questions of the medieval period Who commissioned it and for what purpose What was the intended venue for its display Who was the designer and who executed the enormous task of its manufacture How does it inform our understanding of eleventh century life And who was the mysterious Aelfgyva depicted in the Tapestry s main register This book is an effort to capture and describe the scholarship that attempts to answer these questions But the bibliography also reflects the popularity of the Tapestry in literature covering a surprisingly broad array of subjects The inclusion of this material will assist future scholars who may study references to the work in contemporary non fiction and popular works as well as use of the Bayeux Tapestry as a primary and secondary source in the classroom The

The Lost Art of the Anglo-Saxon World Alexandra Lester-Makin, 2019-11-01 This latest title in the highly successful Ancient Textiles series is the first substantial monograph length historiography of early medieval embroideries and their context within the British Isles The book brings together and analyses for the first time all 43 embroideries believed to have been made in the British Isles and Ireland in the early medieval period New research carried out on those embroideries that are accessible today involving the collection of technical data stitch analysis observations of condition and wear marks and microscopic photography supplements a survey of existing published and archival sources The research has been used to write for the first time the story of embroidery including what we can learn of its producers their techniques and the material functions and metaphorical meanings of embroidery within early medieval Anglo Saxon society The author presents embroideries as evidence for the evolution of embroidery production in Anglo Saxon society from a community based activity based on the extended family to organized workshops in urban settings employing standardized skill levels and as evidence of changing material use from small amounts of fibers produced locally for specific projects to large batches brought in from a distance and stored until needed She demonstrate that embroideries were not simply used decoratively but to incorporate and enact different meanings within different parts of society for example the newly arrived Germanic settlers of the fifth century used embroidery to maintain links with their homelands and to create tribal ties and obligations As such the results inform discussion of embroidery contexts use and deposition and the significance of this form of material culture within society as well as an evaluation of the status of embroiderers within early medieval society The results contribute significantly to our understanding of production systems in Anglo Saxon England and Ireland
