Climate Change and Social Ecology Stephen M. Wheeler, 2012 Industrial cultures have proved unable to confront the issues underlying the climate problem such as overconsumption overpopulation inequity and dysfunctional political systems Political and social obstacles have prevented the adoption of improved technologies and these would provide only a partial solution in any case Climate Change and Social Ecology takes a new approach to the climate crisis arguing that climate change is a challenge of rapid social evolution In order to address this impending catastrophe and bring about more sustainable development this book argues that we must focus on improving social ecologies our values mind sets and organizations The text presents a compelling vision of how to help social ecologies evolve toward sustainability and explores the social transformations needed to deal with the climate crisis in the long term It reviews the climate change strategies considered to date presents a detailed vision of a future sustainable society and analyzes how this vision might be realized through more conscious public nurturing of our social ecologies This interdisciplinary volume provides a compelling rethink of the climate crisis Authoritative and accessible it will be of great interest to anyone concerned about climate change and sustainability

Moving Through Fear Jeff Gollhofer, 2011-03-17 A powerful and important new work that will help readers develop their spiritual instincts and move from a life of fear to one of freedom In seeking truth success and ultimately a happy life there is no escaping fear even while we may not always perceive it fear is ever present But what is it What are we afraid of really and what can we do about it These are the questions that Jeff Gollhofer answers in Moving Through Fear a sensitive personal and wholly inspiring work of guidance In this original and exciting work of spiritual self help Gollhofer illuminates five insights about fear and then reveals chapter by chapter the seven instincts that can allow each of us to move from a life of fear to one of freedom As we cultivate each of these seven instincts we will in turn be creating a life where fear

doesn't rule our emotions and hold our lives hostage Through a mix of stories and anecdotes Golliher illustrates the nature of man from his cultivation of love and justice to the power of community before tackling fear and its role in these aspects of our lives Spiritual practices follow and the reader is encouraged to develop his tools for navigating and ultimately moving through fear **Riders on the Storm** Alastair McIntosh, 2020-12-14 A journey into science and spirituality to help us reconnect with soil soul and society from one of the world's leading environmental campaigners BBC TV Climate change is the greatest challenge to humankind today While the coronavirus sheds a light on the vulnerability of our interconnected world the effects of global warming will be permanent indeed catastrophic without a massive shift in human behavior Writer scholar and broadcaster Alastair McIntosh sums up the present knowledge and shows that conventional solutions are not enough In rejecting the blind alleys of climate change denial exaggeration and false optimism he offers a scintillating discussion of ways forward Weaving together science politics psychology and spirituality this guide examines what it takes to make us riders on the storm A climate primer for our times Michael E Mann author of *The New Climate War* A profusion of ideas insight honesty and wit The Herald Imbued with the deepest hope for a better world Sir Jonathon Porritt author of *Hope in Hell* Solid on the science yet dedicated to the human spirit Professor Katharine Hayhoe Chief Scientist The Nature Conservancy **The Politics of Actually Existing Unsustainability** John Barry, 2012-02-23 At the level of developing a progressive and critical theoretical understanding of unsustainability it argues for the importance of integrating vulnerability which has been largely neglected by both mainstream western political theory and analyses of the current global ecological crisis It suggests that valuable insights into the causes of and alternatives to unsustainability can be found in a critical embracing of human vulnerability and dependency as both constitutive and ineliminable aspects of what it means to be human Rather than seeing invulnerability as the appropriate response the book defends resilience and the ability to cope with rather than solve vulnerability as more productive *Defending Politics* Matthew Flinders, 2012-04-26 If the 20th century witnessed the triumph of democracy then something appears to have gone seriously wrong Citizens around the world have become distrustful of politicians and sceptical about democratic institutions This book meets this contemporary pessimism about the political process head on **Sun Power** Neville Williams, 2025-10-16 America is on the brink of a green energy revolution that can save the planet and increase peace and prosperity by harnessing the unlimited solar power After decades of promise the technology for alternative energy solutions now exists to replace our dangerous addiction to fossil fuels with cheap clean solar energy Neville Williams has been on the leading edge of this revolution for decades and knows from firsthand experience how sun power can transform lives and communities for the better He has traveled the globe bringing solar generated electricity to struggling communities throughout Asia Africa India and the developing world From isolated villages high in the mountains of Nepal to remote settlements in South Africa Williams has worked to bring sun power to even the most off the grid reaches of the planet He has brought that knowledge and experience back to America

where he founded one of the country's fastest growing solar companies. If millions of poor families in the Third World can get their power from the sun, why can't Americans concerned with their rising power bills dependence on foreign oil and carbon footprints do the same? The answer is that sun power is here; it works and can light up a new era of economic and environmental security if we have the will to seize this historic opportunity. This book is not about predictions or promises. It's about what's happening now all over the world and what still needs to be done. Genre Bending Jeremy Rosen, 2025-12-09 Detective horror fantasy romance science fiction spy thrillers westerns zombie novels. In recent decades, acclaimed and ambitious writers of literary fiction have increasingly gravitated to popular fiction genres. In this comprehensive account, Jeremy Rosen describes literary fiction's embrace of genre fiction's conceits as genre bending and argues that while literary writers adopt genres for a wide variety of purposes, what they share is a revitalized attitude toward genre: a recognition that while genres can be used in formulaic ways, they can also be adapted and transformed endlessly. Rosen reads across the outpouring of fiction of the last several decades by writers like Margaret Atwood, Michael Chabon, Jennifer Egan, Louise Erdrich, Kazuo Ishiguro, Chang-rae Lee, David Mitchell, Cormac McCarthy, Ian McEwan, Haruki Murakami, and Colson Whitehead. He finds that literary writers' embrace of popular genres is the product of several seemingly contradictory forces, including their attempt to extend a modernist-inspired project of formal experiment to pursue high cultural prestige and to preserve the distinctiveness of the literary, which they perceive to be under threat, while also embracing the role of providing pleasure to readers. Examining what today's most critically acclaimed and widely read literary writers have done with the genres of genre fiction, *Genre Bending* reveals the values, practices, and forms as well as the tensions that constitute literary fiction today.

Lopsided Schools Gerard Giordano, 2011-01-16 *Lopsided Schools* introduces readers to the case method and helps the reader to use the case method to examine the scholastic challenges that critics posed from World War I to the present. Some critics have stirred up educators with threats to reduce their budgets or fire them. Others upset them with disconcerting questions: Should parents demand that their children learn speed reading? Should teachers emphasize vocational activities? Should principals train their own successors? Should superintendents award bonuses to teachers? Should employers hire the graduates with the highest scores on standardized tests? Should politicians assume greater responsibility for schooling? Should journalists publicize information about lopsided schools? This book examines these and the numerous other questions that critics posed.

The Psychology of Supremacy Dwight Turner, 2023-08-18 *The Psychology of Supremacy* brings a developmental, philosophical, and psychological lens to understanding the systems embedded within the socially constructed aspects of our intersectional identities. Offering a philosophical understanding of supremacy and its meaning within counselling and psychotherapy, the book examines just how and why supremacy exists, some of the psychology behind supremacy, and how it impacts clients' training and practice. Chapters offer means and ways of observing and challenging systems of supremacy as

they may appear within counselling and psychotherapy relationships Featured psychotherapeutic case studies detail stories from participants who have endured the painful experience of being involved in the power structures of supremacy A must read for psychotherapists and counsellors this book will also appeal to psychologists social workers qualitative and quantitative researchers and anyone else interested in further deepening their understanding of supremacy privilege and otherness

Being Human Now Raili Marling, Sara Bédard-Goulet, Tanel Lepsoo, 2022-07-25 Today's world is characterized by a pervasive sense of crisis and uncertainty This has created an increasingly urgent set of questions about who counts as human today and the nature of meaningful human life Although the human impact on earth is as visible as ever we can no longer take the centrality of the human for granted This tension is at the center of this volume which engages with ontological theories of posthumanism and new materialism combining them with poststructuralist theories of power and subjectivity to create a comprehensive matrix for diagnosing the present Within this framework the authors discuss American and French novels and French language plays that offer an insight into today's diverse challenges to being human They consider the impact of neoliberalism on shaping human affects and intimacies as well as literary responses to socio economic precarity The current environmental catastrophe is tackled through novels that question the human responsibility in bringing about for example the sixth mass extinction of species and the anthropocentricity of literature itself The art and artificiality of theater are shown to be means that allow us to delve into the extremes of human experience for example by revisiting myths that re interpret desire and question the possibility of a future for human beings
