and contrast them with articles which reveal grounded practice The articles are selected from across the full breadth of museum disciplines and are linked by a logical narrative as detailed in the section introductions The choice of articles reveals how the debate has opened up on disciplinary practice how the practices of the past have been critiqued and in some cases replaced how it has become necessary to look beyond and outside disciplinary boundaries and how old practices can in many circumstances continue to have validity Museums in the Material World is about broadening horizons and moving museum studies students and others beyond the narrow confines of their own disciplinary thinking or indeed any narrow conception of collections In essence this is a book about the practice of interpretation and will therefore be of great use to those students and museum practitioners involved in the field of material culture in museums
